

Middle Division CLIC Bulletin No. 3

THE ATCHISON, TOPEKA and SANTA FE RAILWAY COMPANY

**-CLIC-**

CAR LOCATION and INVENTORY CONTROL  
OKLAHOMA CITY, OKLAHOMA

Reissue Date: Oct. 1, 1973

E. Gillmore, Supt.  
Newton, Kansas

## INTRODUCTION

This pamphlet contains instructions and maps concerning the Santa Fe Car Location and Inventory Control (CLIC) System for Oklahoma City, Oklahoma.

The Oklahoma City area has been divided into nine (9) zones, with each zone having designated yard tracks and/or industrial tracks within it's boundaries. Each track is numbered and each spot is numbered. By using these zone, track and spot numbers, we are able to print the exact location to which a car is to be spotted. This is referred to as the CLIC spot number.

A CLIC spot number consists of five (5) digits. The first digit designates the zone; the second and third designate the track number within that zone; and the last two digits represent the spot on that track.

EXAMPLE:     1       02     01  
                  Zone   Track   Spot

NOTE: Where no spot number is shown (such as 1 02 00), the car is simply ordered to track 02 in Zone 1, and not to a specific location on that track.

This pamphlet contains a complete alphabetical listing and a complete numerical listing of the industries and tracks. Also a set of zone maps is included. These maps are not drawn to scale. They merely serve as a guide in locating proper tracks and spots.

(1) All switching in the yard and at industries will be performed by use of switch lists unless otherwise instructed by responsible Yardmaster.

(2) Disposition to be made of car will be shown on list opposite car number. This disposition will be indicated by means of track and/or spot number (five-digit number).

(3) Engine Foreman will switch cars according to list. Should Engine Foreman switch or place a car to a location other than that marked on list, he must promptly advise Yardmaster of disposition made of car(s).

## INTRODUCTION (Cont'd)

(4) Engine Foreman will advise Yardmaster of any disposition made of car not shown on list. Engine Foreman must also notify Yardmaster of any exceptions taken to list, such as no car, car not on list, or car out of line.

(5) If any industry requests service not indicated on Engine Foreman's list, the Engine Foreman must obtain written request from industry and deliver request, along with copy of switch list, to Yardmaster after switching is completed.

(6) If a car other than one ordered is spotted into an industry, Engine Foreman must notify Yardmaster of substitution, advising him which car was furnished.

(7) Yardmaster should be aware of all switching moves made in the yard and at industries, and Engine Foreman should advise Yardmaster of extra moves.

(8) AFTER SWITCHING IS COMPLETED, ENGINE FOREMAN WILL RETURN HIS COPY OF SWITCH LIST TO YARDMASTER.

(9) For observation and precaution, the following codes may be shown on switch lists preceding car initials:

XX - Do not move this car  
EX - Explosive  
DN - Dangerous  
PE - Pull empty  
PU - Part unload  
PL - Part load  
WH - Weigh car

There is a Control Clerk in the Yard Office. His function is to keep track of the location of every car in the Oklahoma City Area. In order to do this, the Yardmasters must advise CONTROL of every move made by every engine. Consequently, the Engine Foreman must advise the Yardmaster of all exceptions to the Yardmaster's instructions. This communication is absolutely essential in order to produce accurate lists of cars on tracks.
