Trackage Diagrams

April 1, 1982

**Prepared by David W. Moore
Information from ATSF Car Location Identity Codes (CLIC)**

CLIC Instructions – This booklet contains instructions and maps for Car Location Identity Code (CLIC).

Maps are not drawn to scale and are to be used only as a guide to locating customer and yard tracks and the numbers assigned to them. The geographical area covered in this booklet is divided into zones. Each zone has designated tracks and/or industries within its boundary.

A CLIC number will consist of six digits. The first two digits designate the zone, the second two digits indicate the track number within the zone, the last two digits represent the actual spot along the track.

All switch targets or stands have been painted with a combination of the zone and track number. Spot numbers have been painted on doors, docks, buildings, gates, etc., wherever possible.
