LOS ANGELES DIVISION

FOURTH SUBDIVISION

M.P.192.0-273.9

SAN DIEGO

REVISED: Jan. 22, 1988

CAR LOCATION IDENTITY CODES

This booklet contains instructions and maps for the Car Location Identity Code (CLIC) and procedures governing the Work Order Document System.

Maps are not drawn to scale and are to be used only as a guide to locating customer and yard tracks and the numbers assigned to them.

The geographical area covered in this booklet is divided into zones. Each zone has designated tracks and/or industries within its boundary.

A CLIC number will consist of six digits—the first two digits designate the zone; the second two digits indicate the track number within the zone; the last two digits represent the actual spot along the track.

The combination of the zone-track-spot number is known as the "Car Location Identity Code" (CLIC) System.

This "CLIC" number will be used for switching and reporting purposes rather than the industry or track name.

EXAMPLE OF CLIC NUMBER

12	22	04	__	Spot Number
			_____	Track Number
			_____	Zone Number

All switch targets or stands have been painted with a combination of the zone and track number.

Spot numbers have been painted on doors, docks, buildings, gates, etc., wherever possible.

WORK ORDER DOCUMENT

Any written or verbal instructions issued to yard or road crews requiring work to be performed during their tour of duty will constitute a work order.

NOTE: Exceptions to written work orders must be noted on the work orders according to current instructions; cars handled on verbal work orders must be reported on the prescribed form.

B

Conductors and Engine Foremen will be furnished work orders during their tour of duty.

This document will specify the cars to be picked up or set out at various stations, industries or interchange tracks served by the train or switch job.

Certain information (described below) must be recorded on the work order document by the Conductor or Engine Foreman. Prior to turning in the document at the designated reporting station, it must be dated and signed — even if no work was accomplished. This is necessary to comply with switching and demurrage tariffs, as well as other rules and regulations.

Conductors and Engine Foreman must show on work order cars handled, time and date work performed, CLIC number taken from, CLIC number left and appropriate code as listed below:

- BO - Bad order
- ND - Work indicated not done (State reason.)
- NIT - Car not in train or not on track
- OTCC - Car on track, carriers convenience
- OTNP - Car on track not placed (State reason.)
- PULL - Car pulled, time and date
- SPOT - Car spotted, time and date

Conductor/Engine Foreman must make notation on work order and notify the appropriate employe (S/O, RYO clerk, Dispatcher) of any exceptions taken to the work order, such as no car, car not on list, car out of line, car is hazardous, excess dimension (when the information is not so indicated on work order), car is carded rear or head end movement, or any other exceptions noted.

If switching is performed without a work order, the Conductor or Engine Foreman must complete the prescribed form showing all the information required above and turn it in at the designated reporting station.

If an industry requests service not shown on work order, Conductor/Engine Foreman should obtain such request in writing. This request is to be turned in with work order for processing. If unable to obtain request in writing, Conductor/Engine Foreman should record on work order the name of person making request and the service requested and performed.

For observation and guidance, the following codes may appear on work order.

AI - Agri. Industries
BI - Bad Order
BA - Blasting Agent (Hazardous)
CG - Cargill
CD - Condemned
CB - Combustible (Hazardous)
CL - Chlorine (Hazardous)
CM - Corrosive (Hazardous)
DG - Dangerous
DH - Do Not Hump
DU - Do Not Uncouple
EQ - Equity Export - Houston
FG - Flammable Gas (Hazardous)
FL - Flammable (Hazardous)
FS - Flammable Solid (Hazardous)
FW - Flam. Solid W (Dangerous When Wet)
HE - Head End Only
HL - High Wide Load
PE - Houston Public Elevator
HV - High Value
IP - Interchange Prohibited
IPSW - Intraplant Switch (Respot Car)
MR - Mechanical Refrig. Maintain - Degrees
MCNR - Mechanical Car or Trailer - No Refrigeration Required
NG - Non-Flammable Gas (Hazardous)
NP - No Placards Required
OM - Oxidizer (Hazardous)
OP - Organic Peroxide (Hazardous)
OR - Other Regulated Material
OX - Oxygen
PA - Poison Gas (Hazardous)
PB - Poison
RE - Rear End Only
RM - Radioactive Material
REJT - Car Rejected by Shipper
RSPT - Respot Due to Railroad Error
TURN - Turn Car & Respot
WH - Weight Heavy
WI - Waive Inspection - Set Direct
WL - Weigh Light
XA - Explosive "A"
XB - Explosive "B"
XX - DO NOT MOVE THIS CAR
