## SPECIAL INSTRUCTIONS (Continued on page 43)

M. Trainmen and enginemen are cautioned that there are structures alongside tracks at stations and elsewhere which do not provide clearance for a man to ride on top or side of cars and they must familiarize themselves with location of such structures.

All wires and overhead conductors must be considered alive at all times. Employes must not place dependence for their safety on the covering of wire.

Unqualified employes must not work near overhead wires or apparatus unless a qualified employe is assigned to protect them against personal injury.

### 3. Standard Clocks:

Randolph Street trainmen's room and office of Power Supervisor.  
27th Street engine house office

8. Switchtenders will use yellow flag by day and yellow light by night.

8(a). Electric lanterns displaying yellow light will be used for signalling by levermen and switchtenders.

10(g). Maintenance of Way Department slow flags will be placed a minimum distance of one mile from point where reduced speed is required.

11. To eliminate unnecessary whistling by trains on the Chicago Terminal, when a train makes a momentary stop and start for a burning fusee on or near its track, engineman will comply with Rule 29, but will not be required to sound whistle signal for flagman, being governed by the requirements of Rule 990.

These instructions do not supersede or modify any rules or special instructions requiring the prompt and proper protection of trains whenever or wherever necessary.

14. Signal 14(h) will be omitted in answer to 16(d) on all suburban trains.

21(a). The display of white classification lights will be omitted on all extra trains except passenger extras on Richton, South Chicago and Blue Island districts.

83. Trains must not enter upon any main track at points not protected by interlocking or switchtender without first obtaining permission from leverman who will secure authority from dispatcher.

83(a). Trains may leave initial station without a clearance.

### 93. Yard limit:

Randolph Street to 18th Street.....Tracks 1, 2, 3 and 4  
Matteson to Richton.....Tracks 1 and 2

All trains or engines using Suburban Tracks will comply with rule 93 through yard limits as shown herein.

98. Trains must stop at junctions and railroad crossings as follows:

11th Place.....I.O.R.R. Junction and crossing  
83rd Place (So. Chgo. Dist.).....B.&O.O.T.R.R. crossing

Trains and engines must stop before reaching crossings in vicinity of 11th Place and may proceed only when fixed signals display proceed indication. In the event of failure of fixed signals, trains may proceed after verbal understanding with switch tender.

At 83rd Place, South Chicago District, four-arm fixed signal governs movements over crossing only. Trains or engines will be governed by Rule 663 (a). Two top arms, one for each direction, govern B. & O.O.T. trains, and two lower arms, one for each direction, govern Illinois Central trains.

101. Speed Restrictions: Speeds shown are maximum authorized between points named, but do not modify any rule or special instructions which may be required.

Territory or Location	Electric Trains	Passenger Train With Diesel Engine	All Freight Trains	Engines Handling Derrick	Miles Per Hour			
<b>Richton, South Chicago &amp; Blue Island Districts</b>								
<i>Suburban Tracks</i>

	45	45	35	30				

**104. Electrically locked hand throw switches:**

Between 67th Street and 119th Street switches are controlled by Leverman at 67th Street and Kensington towers. (automatic phone 5796 and 3977.)

At Matteson, north end of Suburban yard, switch in track 1.

Instructions inside door of lock.

If switch will not unlock notify Dispatcher.

Electrically locked hand throw switches at Harvey on Tracks 1, 2 and 3.

Instructions for operating shown on door of lock at each location.

On Blue Island District; Switches are controlled by Leverman at West Pullman tower (automatic phone 3043) on signals from push buttons as follows:

- Blue Island (Conductor's booth).....Push button 1 time
- Racine Avenue, Plano.....Push button 3 times
- Oak Street.....Push button 2 times

**109. Bulletin Boards:**

Randolph Street, train and enginemen's rooms.  
27th Street, engine house office.

**D-151. Two Tracks:**

Between 67th Street and South Chicago.

Between P. O. C. & St. L. crossing and Junction switch 1625 feet west of West Pullman station.

**More than two tracks:**

No.	Location	Use
<b>Monroe St. to 11th Place</b>		
1.	West.....	Southward, suburban.
2.	Second.....	Southward and northward suburban.
3.	Third.....	Northward, suburban.
4.	East.....	Northward, and southward, suburban.
<b>11th Place and Kensington</b>		
1.	West.....	Southward, suburban. (See Rule 261)
2.	Second.....	Southward, suburban.
3.	Third.....	Northward, suburban.
4.	Fourth.....	Northward, suburban.
<b>Kensington and Richton</b>		
1.	West.....	Southward, suburban. } (See Rule 261)
2.	Second.....	Northward, suburban. }

Movements against the current of traffic between 67th Street and 51st Street interlocking on Track No. 1 may be made on receipt of proper proceed signal that is controlled by 67th Street interlocking tower. Leverman must know that route is clear before lining switches.

**251.** On Chicago Terminal, block signal indication will supersede time table superiority.

**261**—Between 67th Street and Kensington, track 1 may be used in either direction and signal indications will supersede time table superiority. They do not dispense with the use or observance of other signals whenever and wherever they may be required. Block cards will not be used.

Between Homewood and Kensington interlocking tracks 1 and 2 may be used in either direction and signal indications will supersede timetable superiority. They do not dispense with the use or observance of other signals whenever and wherever they may be required. Block cards will not be used.

Controlled manual block system; Blue Island District. Block signals govern the use of blocks and their indications supersede the superiority of trains. They do not dispense with the use or observance of other signals whenever and wherever they may be required. Authority to proceed when stopped by Stop-indication (Rule 292) may be granted by signalman in interlocking tower at West Pullman, (automatic phone 3043). Block cards will not be used.

Authority to proceed, When Stop - Indication (Rule 292) at signals located at Homewood, Kensington may be granted by Power Supervisor (automatic phone 2622.)

**290.** When southward home signal at West Pullman interlocking displays a proceed at restricted speed indication (red over yellow), this will authorize southward movements over northward track to spring switch at end of two main tracks.

**505.** Automatic block system territory extends from: Chicago to Richton  
67th St. to South Chicago.

**509.** If a train or engine is stopped by Stop-indication (Rule 292) at 70th Street on northward main track, South Chicago District, permission to proceed may be given by Leverman at 67th Street tower, (automatic phone 5796).

If a train or engine is stopped by Stop-indication (Rule 292) on track one between 67th Street and Kensington, permission to proceed may be given by leverman on automatic telephone 5796 or 3977.

If a train or engine is stopped by Stop Indication (Rule 292) at: Kensington tracks 1 and 2 (120th Street)  
Permission to proceed may be given by leverman on automatic telephone 3977 or 3077.

Homewood tracks 1 and 2 - Permission to proceed may be given by Leverman on automatic telephone 4980-4860.

Block cards will not be used.

**539. Spring switches:**

Location	Normal position
Randolph St.....	For Track No. 4 Southward
11th Place Junction.....	For Track No. 3
⊗ Matteson, North end Richton Interlocking ..	For Track No. 2
⊗ West Pullman.....	South end double track } For northward
90th Street, South Chicago District.....	main track.
⊗ Equipped with Lunar White Marker.	

**683.** In the event of signal failure at Remote Control and other Interlocking as listed below, trains and engines must stop at the interlocking signal and must not proceed until proper authority is received from leverman. Movement must then be made at restricted speed.

Randolph St: Call Automatic Phones 2948-2691 or use "Talk Back System."

51st St. } (Call 67th St. Tower on Automatic phones 5796-5797)  
67th St. }

Kensington: Automatic phones 3977-3077.

Homewood: Automatic phones 4980-4860.

Richton: For trains or engines entering or leaving the tail track, to or from Tracks One or Two, and on Track One, to and including southward stop signal, north of spring switch near bridge 28-54. (Automatic phone 2622 Power Supervisor)

**717.** When hot boxes are discovered on passenger trains during the night hours, the employee inspecting the train should give stop signal in addition to signal provided for under rule 717.

**727.** Engineers while operating multiple unit suburban trains are prohibited from conversing or visiting with anyone. Any visitors who put their heads in the cab for this purpose should be courteously requested to read the sign on the door and remove themselves.

920. When car with hot box is found in train, or such car is set out, unusual care must be taken to prevent possibility of fire spreading to the body of car or lading. Packing must be pulled from the blazing box and all fire thoroughly extinguished and inspection made to know that no danger of fire exists.

1123. In cases of throwing stones or other missiles at trains, details should be reported immediately to Load Supervisor on automatic phone 2622 or as soon thereafter as telephone can be reached without excessive delay.

1200. Engineman of any train or engine approaching crossing protected by gates on South Chicago or Blue Island Districts, finding gate or gates up on either side, must stop before crossing street and then proceed over crossing at reduced speed.

Gate signal indications governing movements over protected highway and pedestrian crossings are located at various streets on the South Chicago District and the Blue Island District.

When a red aspect is displayed on any of these signals, trains and engines must stop and be governed by first paragraph of this rule.

At 82nd Street, South Chicago District, circuit for northward moves on northward track will keep gates down for one and one-half minutes at which time the gates will rise. When trains are ready to depart, engineer should move to "X Re-start" sign and wait until gates are fully lowered before moving on to crosswalk or street. Ten seconds are required for gates to lower.

Northward trains having to wait for time at 83rd Street Station, South Chicago District, must not pass the eight car mark while doing so.

At West Pullman, Blue Island District, circuit for southward moves on southward track will keep gates at Peoria Street down for one and one-half minutes at which time the gates will rise. When trains are ready to depart and gates are up, engineer should move to "X Re-start" sign and wait until gates are fully lowered before moving on to crosswalk or street. Ten seconds are required for gates to lower.

In the event of failure of gates, trains will be governed by the first paragraph of this rule.

1201. Trainmen of trains handling passengers to or from a place other than a station platform must protect passengers until they reach point of safety.

All Illinois Central Electric trains will stop at the sign in accordance with number of cars in train on track 1 at all times except between 2:30 p.m. and 5:00 p.m. daily except Saturdays, Sundays and Holidays. Between the hours of 2:30 p.m. and 5:00 p.m. daily except Saturdays, Sundays and Holidays, all Kensington, South Chicago and Blue Island trains will run on track 2, unless otherwise authorized, between Monroe Street and 11th Place stopping at Van Buren Street at sign in accordance with number of cars in train. Suffix "S" on Car Stop Sign indicates South Chicago Trains. Also between 2:30 p.m. and 5:00 p.m., unless otherwise authorized, all Richton and OSS&SB trains will run on track 1. All OSS&SB trains between 5 a.m. and 5 p.m. except Sundays and Holidays will stop at north end of Track 1 platform.

1202. Power Section Break Signals identified by yellow bordered marker with letter "B" adjacent to automatic block signals are located at:

	Track No.	4 automatic block signal	4-211	.....	2.17
	Track No. 1	"	"	1-1989	..... 19.89
	Track No. 2	"	"	2-2056	..... 20.56
	Track No. 1	"	"	1-2550	..... 25.50
	Track No. 2	"	"	2-2642	..... 26.42

Southward main, South Chicago District, automatic block signal SO-277, mile post SO-2.77.

Northward main, South Chicago District, automatic block signal SO-316, mile post SO-3.16.

Blue Island District "Southward" ..... AA 2.45  
Blue Island District "Northward" ..... AA 2.67

Illuminated red aspect on Power Section Break Signal—Indication—Power Off-STOP. Electric trains must stop and not proceed until authorized by Power Supervisor (automatic 2622).

Northward electric trains on track two, one, or the Blue Island lead at Kensington, receiving a stop indication on the interlocking signal vicinity of 117th Street, will stop south of air-gaps immediately in advance of these signals.

1203. Employes working on or about Multiple Unit electric suburban cars must exercise due caution in keeping clear of all pantographs and 1500 volt equipment when one pantograph is up; when one pantograph is in contact with the overhead wire, the second pantograph, even when latched down, is energized and electrically alive.

Employes must not work on any 1500 volt equipment, wiring, open switch box or equipment cover without first lowering all pantographs.

If it is necessary to touch 1500 volt equipment all pantographs must be grounded.

Employes must not work on or about storage battery boxes on M U electric suburban cars with open flame lights or torches. This to avoid explosion of gas generated in such battery boxes.

Trains arriving at Randolph Street will not be coupled to standing cars, and after making station stop, brakes must be re-applied. Relay engineers must not cut or couple cars while passengers are boarding or alighting.

A carman or electrician doing work around or under cars must place STOP SIGN on rotary stem of brake valve on both ends of train. Pantographs must be lowered. Engineers finding above-referred-to stop sign in cab will not raise pantographs or cut in brakes until sign has been removed by workmen authorized to do so. In making cuts or couplings, engineers must do this in company with carman. When making couplings, time must be allowed for brakes to release on car coupled into, also on car from which coupling is made, and the brakes must be re-applied before breaking up cab.

Engineers finding pantographs lowered on cars between South Water Street and 11th Place, must NOT raise pantographs.

Advice relative mechanical or electrical trouble on M. U. equipment can be obtained by calling 2803 or 2903 on automatic phone.

Water must never be used on hot journals on suburban multiple unit equipment.

If a train damages a pantograph or causes wire trouble, the train must be brought to a stop immediately and the Power Supervisor notified at once on Automatic Telephone 2622.

In case your train is unable to proceed on account of accident or trouble to your own, or other trains, each train so delayed must report to the Dispatcher on Automatic Telephone No. 2722. If unable to get this number, report should be made to Power Supervisor on Automatic Telephone 2622.

1204. Suburban Enginemen operating multiple unit equipment are prohibited from placing reverser in neutral at any time train is in motion. Enginemen are required to operate multiple unit equipment from the leading car in the direction train is moving unless equipment is defective.

Suburban trains in motion must not be operated with car door open in engineer's cab without fastening door rail across opening. When making up cab, engineer must know that safety bar is properly latched.

Power must not be used with brakes applied and ample time allowed for brakes to release before starting trains.

When couplings are made on Multiple Unit equipment, tell-tale plunger on both couplers must be examined and if either one is found to be not flush with the coupler plate, the coupling is not properly made and train must not depart until trouble has been found and corrected.

Engineers must not couple their trains into cars ahead when tying up at outlying points.

When coupling or setouts are made at outlying points, it is the duty of trainmen to check position of drum switches and hook or unhook pantograph gates.

All cars tied up at outlying points must be left with all windows closed, doors locked, except one side door at the end of the train to be left open for the crew to alight. The double doors in this vestibule must both be locked. All switches on A, B, F and G boards must be opened when tying up units at outlying points.

**1205.** Electric trains must come to a stop at least 100 feet to rear of standing train on same track before proceeding at restricted speed, except in closing up within interlocking limits. At Randolph Street, interlocking rules will govern.

On hearing electric squawker signal sounded on either the northeast or southeast corner of MU shed at 18th Street, engineer operating cars through the car washer will stop immediately and not proceed until hand signal is given by foreman in charge of this washer.

In the event of a power failure during the morning or evening rush hour, which results in trains being stopped in the same section, the engineer on each train should lower his pantographs and only the first train should keep his up or raise them and try to start. After this train starts to move the second train should raise its pantograph and continue so one at a time until all trains again are in motion.

**1206.** Bell must be rung on trains passing platforms on tracks adjacent thereto when no stop is being made.

Diaphragm door and end gate at head end of trains should be kept closed and securely latched while train is in operation.

Engineers must not pull electric plug to break-up cab until train has come to a stop.

**1207.** In the event of cab signal failure conductor will give proceed signal by pressing communication buzzer two times, pause and press two more times, at following stations, pressing button two times.

All southward scheduled suburban trains leaving Randolph Street between 3:00 PM and 6:00 PM, Mondays through Fridays, will display one lighted signal, on cab side only.

Kensington and Blue Island trains or other trains which will use Track Two from 67th Street south, should display red signal.

South Chicago trains will display white signal.

Richton or other trains not having station stops between 67th and Kensington will display a green signal.

The engineer on each train will unscrew the signal light bulb on the left hand side of the front vestibule to avoid both signals being displayed, and will again tighten the same bulb on arrival at their final destination.

Enginemen should have headlight in dim position leaving 63rd Street and passing 67th Street Tower to enable levermen to identify the color of this signal.

**1208.** During cold weather, heat switches on suburban cars must be turned off by Trainmen as follows:

To yard on arrival Randolph Street—at 23rd Street. Tying up at 83rd Street or South Chicago—at South Shore Station. Tying up at Matteson—at Homewood. Tying up at K Y D—at Ochesterfield. From Blue Island for K Y D—at Burr Oak. Tying up at Blue Island—at Kensington.

In cold weather, efforts should be made to keep doors closed at both ends of cars. Not more than one ventilator should be opened on either side at opposite ends of each car except in smoking cars. Trainmen will handle the ventilators in smoking cars in accordance with the density of smoke and need for fresh air as well as considering the temperature in the car.

Individual cab heaters must not be turned on by trainmen on opposite end of train until instructed to do so by engineer. Care should be exercised that heaters are not turned on at other points in the train.

Lights will be turned on in all cars leaving Roosevelt Road northward and turned off immediately after all passengers have been unloaded at Randolph Street.

During daylight hours, lights will be turned off in all cars leaving Roosevelt Road Southward.

**1209.** Maximum depth of water, over top of Lower Rail, thru which Suburban Multiple Unit equipment may be handled is 4 inches except when greater depths are authorized by special instructions:

When trains are operated through water, a maximum speed of 5 miles per hour must not be exceeded.

**1210.** Employees must not get on or off Multiple Unit suburban cars while in motion.

**1211.** On portions of the railroad where trains are governed by block signals in accordance with Rule 261 or Rule 525, Train Dispatchers or levermen operators must be advised of proposed movement of Rail Detector Cars, Joint Oilers, Weed Burners, and other such heavy equipment which can not readily be removed from the track, but which nevertheless may not positively shunt the track. An opposing train must not be permitted to enter a block occupied by such equipment.

Such equipment must not be operated over highway grade crossings which are provided with automatic protection, except by hand flagging, unless it is known that the automatic protection is operating.

Such equipment will come to a stop at railroad crossings where automatic interlocking is in use, and must not proceed over crossings until instructions covering emergency use of such crossings have been followed. (See Rule 672.)

Levermen or operators must not operate any switches or derails in the route lined for this equipment while it remains within interlocking limits.

**1212** It is not permissible to handle more than 14 (7 multiple units) electric Suburban cars in any one cut or train in any yard, or between Randolph St. and 18th St. M. U. Yard, and not more than 12 cars will be permitted in any one train in road service.

## REFERENCE NOTES

The following signs indicate when placed before the figure of a Schedule—

B—Blue Island connection on Sunday only.

D—Blue Island connection Saturday only.

K—South Chicago connection Sunday only.

H—Regular stop Sunday only.

K—No Blue Island connection on Saturday.

F—Regular stop Saturday only.

FH—Flag stop Sunday only.

FY—Flag stop Saturday only.

YH—Regular stop on Saturday and Sunday only.

Sunday service in effect New Year's, Memorial Day, July Fourth, Labor Day, Thanksgiving and Christmas.

**Rules and Instructions Governing Air Brakes**  
**on**  
**Multiple-Unit Suburban Trains**  
**March - 1957**

*Rule 1.* The signal system must be tested and known to be in a safe and suitable condition for service before each trip.

*Rule 2.* Enginemen, upon taking charge of multiple-unit equipment must know that brakes are in operative condition.

*Rule 3.* Foremen and inspectors are jointly responsible with enginemen and trainmen for condition of air brake and signal equipment on multiple-unit equipment to the extent that it is possible to detect defective equipment by required tests.

*Rule 4.* Each train must have air brakes in effective operating condition and at no time should the number and location of operative air brakes be less than permitted by Federal requirements.

**TRAIN AIR BRAKE TEST TO BE MADE AT RANDOLPH STREET EXCEPT TRAINS COVERED BY RULE 6**

*Rule 5 (a).* After air brake system is charged to within ten pounds of standard brake pipe pressure, and upon receipt of proper request or signal to apply brakes for test, a fifteen (15) pound brake pipe service reduction must be made, then note the number of pounds of brake pipe leakage per minute as indicated by brake pipe gauge. Inspection of train brakes must be made to determine if brakes are applied on each car, that piston travel is correct, that brake rigging does not bind or foul and that all parts of brake equipment are properly secured. When this inspection has been completed, release signal must be given and brakes released and brakes inspected to see that all have properly released.

*Rule 5 (b).* Brake pipe leakage must not exceed three (3) pounds per minute.

*Rule 5 (c).* When test of air brakes is completed the inspector who made the test will personally inform the engineman and conductor and advise them the number of cars in train and number having inoperative brakes.

**TRAIN AIR BRAKE TEST TO BE MADE AT 18TH STREET**

*Rule 6.* Before departure, suburban trains at 18th Street must be given the following train brake test:

With the air brakes cut-in and operating from the south operating compartment on the train, after air brake system is charged to within ten (10) pounds of standard brake pipe pressure and upon receipt of proper request or signal to apply brakes for test, a fifteen (15) pound brake pipe service reduction must be made, then note the number of pounds of brake pipe

leakage per minute (must not exceed three (3) pounds per minute) as indicated by brake pipe gauge. Inspection of train brakes must then be made to determine if brakes are applied on each car, that piston travel is correct, that brake rigging does not bind or foul, and that all parts of brake equipment are properly secured. When this inspection has been completed, release signal must be given, brakes released and each brake inspected to see that all have properly released. The engineer must then make a full service brake application, cut-out brake valve and close south end operating compartment. Engineman must then go to the operating compartment at the north end of the train, cut-in brake valve and release train brakes. Upon proper signal, a full service application of the brakes must then be made from the north operating compartment, then upon proper signal, brakes must be released. Inspector during this test of the brakes from the north operating compartment must station himself on the ground and see that the brakes on the south car in the train apply and release properly.

When test of air brake is completed, the inspector who made the test will personally inform the engineman and conductor and advise them the number of cars in the train and number of cars having inoperative brakes.

*Rule 7.* Defects discovered during a standing test that can not be repaired promptly must be reported for appropriate action.

*Rule 8.* During standing tests brakes must not be applied or released until proper signal is given.

*Rule 9.* Before adjusting piston travel or working on brake rigging, side-vented cut-out cock on brake cylinder pipes must be closed.

**TRAIN AIR BRAKE TEST TO BE MADE AT POINTS OTHER THAN RANDOLPH STREET AND 18TH STREET**

*Rule 10.* At points other than Randolph Street and 18th Street, where cars, engineman or train crew is changed, except as provided for in Rule 11 and 12, tests of the train brake system must be made as follows:

After air brake system is charged to within ten (10) pounds of standard brake pipe pressure, and upon receipt of proper request or signal to apply brakes for test, a fifteen (15) pound brake pipe service reduction must be made, then note the number of pounds of brake pipe leakage per minute as indicated by brake pipe gauge. Inspection of train brakes must be made to determine if brakes are applied on each car, that piston travel is correct, that brake rigging does not bind or foul and that all parts of brake equipment are properly secured. When this inspection has been completed, release signal must be given, brakes released, and each brake inspected to see that all have properly released.

When test of air brake is completed, the inspector or trainman who made the test will personally inform the engineman and conductor and advise them the number of cars in the train and the number of cars having inoperative brakes.

**TRAIN AIR BRAKE TEST TO BE MADE WHEN CARS ARE ADDED TO TRAIN**

*Rule 11.* When cars are added to a train at any point, and after such cars are placed in position where they are to be handled in train, test of air brakes on these cars must be made as prescribed by Rule 10. Before proceeding it must be known that the rear brakes apply and release during this test.

**TRAIN AIR BRAKE TEST TO BE MADE WHEN CARS ARE CUT OFF OF TRAIN**

*Rule 12.* When cutting off cars from train and remaining consist of train is to remain in service, brakes must be applied and released from operating compartment to be used and it must be known that brakes on rear car apply and release properly.

**RUNNING BRAKE TEST**

*Rule 13.* Running brake test must be made when leaving Randolph Street or 18th Street or whenever engineers or train crews have been changed, or whenever cars have been added to the train, or whenever engineer changes operating compartments. A running test of brakes must be made as soon as the speed of train permits. Such tests should be

made by applying the brakes with sufficient force to ascertain whether they are operating properly. Power should be shut off during running brake test. In case brakes do not operate properly during this test, signal for brakes must be given by engineman with whistle, train stopped as soon as possible and cause of trouble ascertained and corrected before proceeding. Just prior to making this test, flagman must station himself on rear car and note that brakes apply on same. If engineman fails to apply brakes for test, flagman must call his attention to same with one buzz on the signal system. If engineer still fails to apply brakes for test, flagman must stop train and ascertain cause.

**CONDUCTOR'S VALVE**

*Rule 14.* A conductor's valve is located at the "B" end of each suburban car. This valve is connected by a red rope that extends throughout the car to both vestibules. On suburban equipment, when it is necessary to apply the brakes with the conductor's valve, care must be taken to open valve slowly until conductor's valve is wide open. After starting to open conductor's valve, it must not be closed until train has come to a stop. If necessary to make an emergency application of the brakes the conductor's valve should be opened immediately and left open until train stops. Conductor's valve must not be used to apply brakes for purpose of attempting to control speed of train.
