Local Truck Transfer services are available by arrangement with our Freight Agent.

## A BIT OF HISTORY - - -

Cadillac & Lake City Railway was formed in 1964 to operate a former Pennsylvania Railroad Branch Line between Cadillac and Lake City, Mich. thus the present corporate name. Operations of Freight and Passenger Trains continued until 1971, when the Collapse of Penn Central Railroad caused the operation to cease. In 1977, C & L C moved to Colorado and began operations at Denver's Airlawn Industrial Park in 1980 on former Rock Island Trackage, serving about 20 Patrons. In July 1981, C & L C began serving Colorado Springs patrons in the Fillmore Street Industrial Area, and the former Rock Island Main Line from Limon, Co. to Colby, Kansas serving the Agricultural Market in that 135 mile area. Innovative marketing and pricing were used to increase shipments by rail over the three year period of Temporary Service on Rock Island Trackage, including Storage of Wheat and Fertilizer in cars, reduced Freight Rates for Volume Shippers, and reduced Freight Rates for quick unloading of Farm Implements.

C&LC has now reopened the former Rock Island Line from Limon to the Colorado Springs Area as shown to the left, a line that has been out of service for more than 5 years. The economic growth of Colorado Springs makes this Possible. Industry is moving into the North East section where good sites with Rail and Highway Access, and convenient living are close by.

Cimarron Hills (Colorado Springs Sta.)

Conveniently located at Marksheffel Road & Cement Road - (City Gas Plant) --- is close to all industries in the Cimarron Hills Industrial Park, and is 3 miles north of Peterson Field. - 1 mile north of Highway 24.

Forklift (8,000 Lb Lift) with Sideshift Available from C&LC, Rental \$35. per Car
