SPECIAL NOTES.

Following each R. P. O. making the same will be found lists of pouches made by that line and points at which they are dispatched. Empty pouches are not shown.

Mexican Railway Postal Clerks run on all Mexican R. R's shown in this Schedule.

Railroad mileage is track distance.

TYPE FACES.

The numbers of trains on which RPO service is performed are indicated by **heavy-faced type**. All other trains are indicated by **light-faced type**.

Offices shown in *italics* are not located on that line.

TIME.

All A. M. time commencing one minute after midnight is shown in light-faced type—thus: 12:01. All P. M. time commencing one minute after noon is shown in heavy-faced type—thus: 12:01. 12:00 (heavy face) is midnight. 12:00 (light face) is noon. Careful attention must be paid to this explanation.

Mexican time is 36 minutes slower and Mountain time is one hour slower than Central time.

Unless otherwise stated, trains are run by Central time.

SPACE AUTHORIZATION.

The units of space authorized are shown following the time-tables of routes stated on space basis. Unless otherwise stated the space authorization covers the run of train between points and with frequency as shown in schedule.

The space units when shown in heavy-faced type denotes R. P. O. space, light-faced type denotes storage or closed pouch space.

FREQUENCY OF SERVICE.

Frequency of trains, R. P. O's and dispatch of pouches is indicated by reference letters as follows, and when applied to trains and pouches, these signs refer to the days of departure from the initial and terminal offices of a line:

NOTES.

Perishable parcel post should not be sent to Terminal RPO's.

When practicable directs should be made of bulky and fragile parcel post at office of origin for offices in a state, any part of which is within the first or second zone, residue to be dispatched to designated Terminal if no material delay or backhaul results.

(a) Parcel post from a local office for offices in the same zone must not be sent to a Terminal RPO but should be distributed to directs and lines, except where unusual conditions obtain and special instructions govern.

Distribution of parcel post from local offices for other zones any part of which is within the first or second zones and which other mails are distributed, will be made on lines retaining them, if distribution can be made without interfering with other duties and material delay or backhaul would result through dispatch to a Terminal.

Parcel post received from local offices for states beyond the second zone shall not be distributed with other classes of parcel post except that when direct sacks are made for post offices, parcels and parcels may be combined where the parcels are not fragile. Parcel post, not made up into directs, shall be massed upon proper Terminal, except perishable matter or that which is liable to damage other parcels, which shall be treated as per special rules governing.

Mixed sacks of parcel post properly labeled to show contents and address of Terminal RPO, may be made for any Terminal when the number of pieces or packages does not warrant separate state sacks. These "mixed" sacks must contain only parcel post due to the Terminal addressed, according to this scheme.
