Main track crossover movements at crossovers not interlocked must not be made without permission.

FLAGGING RULES.

When a train stops under circumstances in which it may be overtaken by another train, the flagman must go back immediately with flagman's signals a sufficient distance to insure full protection, placing two torpedoes and when necessary, in addition, displaying lighted fuses.

When flagman is recalled and safety to train will permit he may return. When the conditions require he will leave two torpedoes and a lighted fuse.

The front of the train must be protected in the same manner by head brakeman, baggageman or fireman.

When a train is moving under circumstances in which it may be overtaken by another train, the flagman must take immediate action to insure full protection. By night, or by day when the view is obscured, lighted fuses must be thrown off at proper intervals.

When day signals cannot be plainly seen, owing to weather or other conditions, night signals must also be used.

Conductors and enginemen are responsible for the protection of their trains or engines. Block signals in no way relieve them of this responsibility.

Flagman's signals.

Day signals:

A red flag,
Torpedoes and
Fuses.

Night signals:

A red light,
A white light,
Torpedoes and
Fuses.

FUSEES.

A train in automatic block territory stopped by a burning red fusee may proceed at restricted speed to the next block signal, expecting to find the block occupied.

SIGNAL RULES.

The following signal rules will govern between Polk and 61st Streets.

Rule 10 C. R. I. & P. Ry. and N. Y. C. R. R. Operating Department Book of Rules applies.

All Home, Dwarf, Automatic Block and Entrance signals are of the color light type.

Home Signals—Display three vertical lights.

Green light governs straight route.

Yellow light governs any route—Slow speed prepared to stop expecting to find broken rail, open switch, track occupied or obstructed.

Dwarf signals—Displaying two vertical lights.

Top light yellow, governs straight route—Restricted speed.

Bottom light yellow, governs any route—Slow speed prepared to stop expecting to find broken rail, open switch, track occupied or obstructed.

Automatic Block Signals—Display two diagonal or staggered lights.

Top light governs straight route.

Bottom light, marker, indicates location of automatic signal.

*Entrance Signals—Display two vertical lights.

Top light governs straight route.

Bottom light governs straight route—Slow speed prepared to stop expecting to find broken rail, open switch, track occupied or obstructed.

Tracks Number 3 and 4 are equipped with automatic block signals governing train movements with the current of traffic between limits of various interlocking plants.

Tracks Number 2 and 5 are equipped with automatic block signals governing train movements in both directions and are divided into sections which are governed by entrance signals controlled by Towerman between limits of various interlocking plants as follows:

TRACK	FROM	TO	DIRECTION	CONTROLLED BY
2 and 5	12th St.	15th St.	Both	Towerman at Polk St. and 16th St.
2 and 5	18th St.	25th St.	Both	Towerman at 16th St.
2 and 5	25th St.	38th St.	Both	Towerman at 16th St. and Root St.
2 and 5	47th St.	59th St.	Both	Towerman at 45th St. and 61st St.

*When a train or engine is stopped by an entrance signal and proceed indication is not immediately displayed by signal, trainmen or enginemen must communicate with Towerman controlling the section, and in case of failure of communication may proceed when preceded by flagman to next point of communication.

Switches connecting to tracks Number 2 and 5 must not be opened without permission of parties controlling the section occupied or to be occupied. No movements shall be made in the reverse direction to that authorized by entrance signal or Towerman, without further permission from Towerman controlling the section occupied.

Conductors of trains and enginemen of light engines must report promptly delays caused by signals, giving number.

Electrically locked outlying switches are controlled as follows:

- Polk Street to 28th Street by 16th Street Towerman.
- 28 Street to Root Street by Root Street Towerman.
- 47th Street to 53rd Street by 45th Street Towerman.
- 53rd Street to 59th Street by 61st Street Towerman.

Telephones are located near all switches electrically locked. Trains wishing to use these switches must obtain an unlock from Towerman. After using switch, apparatus must be restored to normal position and Towerman advised.

In case of failure of electric lock, notify Towerman and be governed by his instructions.

The unlocking of electrically locked outlying switches does not relieve enginemen and trainmen from protecting their train.

Loud speaker line must not be used for any purpose except train movement. Pole phones on loud speaker line are for the purpose of allowing enginemen and trainmen to communicate with parties at loud speaker points. Pole boxes on this line are equipped with both N. Y. C. and C. R. I. & P. switch locks. Parties using these lines will first listen on line, if not in use, call for party desired, waiting a few moments for reply before again calling.

Use of this line must be brief as possible.
