RULE 251 IN EFFECT:
Congo to Marceline, except on Gantlet track, Bridge 425-A, east of Sibley.

Trains must secure numbered clearance cards before leaving originating stations.

Main Track No. 3 between C.A. Jct. and Hardin is located south of Eastward Main Track. Trains have no time table superiority and operation thereon must be authorized by train order. Manual Block Rules govern.

Mo. Pac. tracks between Rock Creek Jct. and Congo may be used on signal indication, which will supersede time table superiority. Movements against current of traffic must be authorized by Mo. Pac. Terminal Trainmaster. All trains must move prepared to stop short of train, obstruction or switch not properly lined, and protect as per Rule 99, when using these tracks. Speed limit 10 MPH through Rock Creek Jct. interlocking.

Trains between Kansas City Union Station and Sheffield, or Rock Creek Jct. will be governed by Kansas City Terminal Ry. Co. Rules and Regulations.

SIGNAL SYSTEM TWO IN EFFECT:

B.C. Jct.

Trains must secure numbered clearance cards before leaving originating stations, except westward C.G.W. trains at B.C. Jct.; and St. Joseph U.S., eastward trains secure at Terminal Yard.

At B.C. Jct. authorized speed within home signal limits 15 MPH. Rule 606 applicable when home signal displays "stop" indication and reason therefor is not apparent.

Automatic Signals Nos. 711 and 712 govern movements between M.P. 71 plus 3549 feet and M.P. 71 plus 5065 feet, within these limits trains will run prepared to stop short of train, obstruction or switch not properly lined.

Between St. Joseph U.S. and M.K. Jct. there is no superiority of trains. Trains and engines within these limits must proceed prepared to stop short of train, obstruction or switch not properly lined, but not exceeding 15 MPH; between these points main track may be used not protecting against regular and extra trains and engines.

Between St. Joseph U.S. and Monterey Street be governed by St. Joseph Union Depot Co. Time Table, Rules and Regulations.

No switch lights on St. Joseph District between Henrietta and B.C. Jct.

Rules Nos. 10(A), 17, 315, 509, 511, D-514, 660, 674, 1000(C) and Definitions of Medium and Restricted Speed of the Rules, Operating Department, Revised 1948, are amended as follows:

Rule 10(A). Second paragraph amended to read: Permanent signs, yellow with numerals, will be located not less than 2500 feet in advance of locations where speed of trains must be reduced. The numerals thereon nearest the track, or those at the top of the sign, indicate the maximum speed for passenger trains, and the other numerals the maximum speed for freight trains, except that where only one numeral is shown it shall govern the speed of both passenger and freight trains. Indicated speeds must not be exceeded until rear of train has passed a permanent green resume speed sign. There may be more than one yellow sign in advance of a green sign, in which case the reduced speed shown on each yellow sign must be observed in succession until rear of train has passed the green sign.

Rule 17. First paragraph is amended to read: The headlight will be displayed to the front of every train by night and in addition, to the front of every Diesel or Gas-Electric powered train by day. It must be extinguished when a train turns out to meet another train and has stopped clear of main track. In case of a headlight failure enroute at night, if repairs cannot be made promptly, a white lantern must be placed on the front or leading end of the train and the train should proceed at not to exceed 20 MPH while head end is passing over street and highway crossings. The whistle must be used frequently and the bell must be rung continuously. The dispatcher should be notified at first opportunity.

Rule 315. Amended to read: A train, other than a passenger train, will not be permitted to follow a train, other than a passenger train, into a block, except when authorized by a train order or permissive signal, and when such movement is authorized the following train must proceed through the block prepared to stop short of a train or obstruction, but not exceeding twenty miles per hour.

Rule 509. Amended to read: When a train is stopped by a "Stop and Proceed" signal it may:

(a) On single track, where block can be seen to be clear of opposing movement, proceed at once at restricted speed. Where block cannot be seen to be clear of opposing movement, wait five minutes and then proceed at restricted speed, except when view of track ahead is not clear for at least 800 feet at any location within the block movement must be stopped and then protected by being preceded by a flagman. Engines so equipped must display red gyrating headlight.

(b) Where facing point switch is located immediately beyond signal and switch is lined for turnout, train may without stopping pass such signal at restricted speed to enter turnout provided main track is clear to fouling point.

(c) On two or more tracks, proceed at once at restricted speed.

Rule 511. Amended to read: A train or engine which has entered a block and is delayed in the block, must make movement beyond point of delay at restricted speed, until next governing signal can be seen to indicate other than "stop" and intervening track is seen to be clear.

Rule D-514 changed to Rule 514. Amended to read: Where separate signal governing train movements from siding or other track to main track indicate stop and train has other authority to enter main track, the main track switch may be opened and after the expiration of five minutes, train may proceed, complying with Rules 99 and 509(a) on single track, and Rules 99 and 509(c) on two or more tracks.

When heading out through a spring switch, the same practice will govern except that after lead wheels have fouled circuit, spring switch must be returned to normal. This rule will also apply where such signals are located at non-continuous interlocking station and are set for automatic operation during hours office is closed.

Rule 660. Amended to read: A train or engine which has entered a block and is delayed in the block, must make movement beyond point of delay at restricted speed, until next governing signal can be seen to indicate other than "stop" and intervening track is seen to be clear.

Rule 674. Amended to read: Should engine equipment fail in train control territory proceed at restricted speed to first office of communication and ask for instructions.

If train control is cut out, obtain train order authority for further movement, proceeding as prescribed by Rule 251. If cab signal is operative, or when manual block is established in advance of train with cab signal inoperative, do not exceed a maximum speed of 79 miles per hour for passenger and 60 miles per hour for freight trains. When operating under manual block, approach interlockings and facing point switches at restricted speed.

Should failure make it impossible to release brakes between offices of communication, conductor will confer with engineman and if considered necessary, seal may be broken and pneumatic feature cut out. Train may then proceed at restricted speed to first office of communication.

When train control is cut out, seal will be delivered to operator.

Rule 1000(C). Amended to include: In the application of Operating Rule 1000(C) the Federal Communication Commission has modified their rules to permit an employee, authorized by the Railway Company to do so, to operate a mobile radio unit without having passed an examination on the rules; but an employee must pass an examination before operating a fixed or base radio station.

Definitions of Medium Speed and Restricted Speed pages 106, 111, 114 and 115. Amended to read:

MEDIUM SPEED—A speed not exceeding 40 miles per hour.

RESTRICTED SPEED—A speed that will permit stopping short of another train or obstruction, but not exceeding 20 miles per hour.

Definitions, Page 104, amended to include: **AUTOMATIC TRAIN STOP SYSTEM (ATS)**. A system so arranged that its operation will automatically result in the application of the brakes until the train has been brought to a stop.

1. Except as otherwise provided, Eastward Trains are superior to Westward Trains of the same class.

5. JOINT TRACK FACILITIES.

W.B. JCT.-C.A. JCT.—A.T.&S.F. and Wabash. The movement of Wabash trains will be governed by rules in Wabash Time Table. Wabash trains use marker lamps with red and green lenses.

ETON-CONGO—A.T.&S.F. and Mo. Pac. The movement of Mo. Pac. trains will be governed by bulletin order issued by Mo. Pac. Mo. Pac. trains use marker lamps with red and green lenses.

CONGO-ROCK CREEK JCT.—A.T.&S.F. trains may use Mo. Pac. tracks.

ROCK CREEK JCT., SHEFFIELD-A.T.&S.F. JCT.—A.T.&S.F. trains use tracks of K.C.T. Ry. Co.

B.C. Jct.—M.K. Jct.—C.G.W. trains use A.T.&S.F. tracks and will be governed by A.T.&S.F. Time Table and Rules in C.G.W. Time Table. C.G.W. trains use marker lamps with red and green lenses.

ST. JOSEPH—Trains will use St. Joseph Union Depot Company tracks between St. Joseph U.S. and Monterey Street, 0.2 mile east of Union Station, and St. Joseph Terminal Ry. Co. tracks between Monterey Street and M.K. Jct.

6. MULTIPLE ARM HOME SIGNALS.

Where two or more arms on a home signal govern movements over an interlocked switch, top arm is assigned to the main track and lower arm to the inferior route, except as follows:

W.B. Jct., eastward, top indication governs movement to Wabash main track, lower indication to Wabash main track or siding, middle indication to A.T.&S.F. track.

C.A. Jct., Track No. 3, westward, top arm governs movement to Wabash track, lower arm to A.T.&S.F. track.

Rock Creek Jct., Eastward, top arm governs movements to Mo. Pac. passenger route, middle arm Mo. Pac. Route to Congo, bottom arm either route.

Westward, top arm to foreign line, middle arm to Kansas City Terminal, bottom arm to either route.

When proper signal cannot be displayed, signalman will give hand signal with yellow flag or light.

B. C. Jct., eastward, top indication governs movement to A.T. & S.F. track, lower indication to C.G.W. track.

7.

8.

9. AUTOMATIC TRAIN STOP.

Rules for the operation of AUTOMATIC TRAIN STOP do not supersede or dispense with the observance of other Rules and Regulations.

Except as otherwise provided, an engine in passenger service in Automatic Train Stop territory, as shown in time table, must be equipped with operative Automatic Train Stop device. The engineman must see that the Automatic Train Stop cut-out cock is cut in and sealed and check cab card, Form 1167 Standard, to assure himself the device has been tested and is operative. Engineman handling the engine where the Automatic Train Stop is not in operation must make same observation and promptly report by wire if cut-out cock is not sealed or cab card fails to indicate proper test has been made.

When an engine passes over an inductor in approach to other than a "clear" signal, an automatic brake application will occur unless prior acknowledgment has been made within 15 seconds. When such application has occurred the brake valve must be lapped immediately, and after sixty seconds an acknowledgment made. Brakes may then be released. If proper acknowledgment has been made approaching other than a "clear" signal, a bell will sound when the receiver of the engine passes over the inductor.

Engineman may also acknowledge before passing over an inductor to avoid an automatic application of the brakes when running backward at signals governing movements in the opposite direction.

Within or without Automatic Train Stop territory, an automatic brake application may occur when the Automatic Train Stop equipment becomes damaged or defective. If brakes cannot be released as prescribed above, Automatic Train Stop equipment must be cut out and promptly reported.

Seal on cut-out cock must not be broken or Automatic Train Stop cut out, unless device fails to operate properly. Automatic Train Stop failures and interruptions and removal of seals must be reported by wire from first available point of communication.

When the Automatic Train Stop device on an engine fails or is cut out enroute in Automatic Train Stop territory, train may proceed according to signal indication, not exceeding 79 miles per hour. If the Automatic Block Signal System is out of service, train may proceed at Restricted Speed, except; if Manual Block is established in advance of the train on which the device is inoperative, train may proceed not exceeding 79 miles per hour. When a train, moving in Automatic Train Stop territory with device inoperative, is stopped by a "Stop and Proceed" signal, it may proceed in accordance with Rule 509.
