Savanna.....	Dr. J. B. SCHREITER.....	Surgeon and Examiner.
Sterling.....	Dr. C. J. MUELLER.....	Surgeon and Examiner.
Streator.....	Dr. D. O. CONLEY.....	Surgeon and Examiner.

Whenever any person other than a trespasser sustains injuries on Company property, requiring immediate medical attention, the nearest Company Surgeon should be summoned by the officer or employe of highest rank present.

In case of emergency when the attendance of the Company Surgeon cannot be had at once, the most available surgical aid should be called to serve until the Company Surgeon arrives. No important surgical operation should be made previous to the arrival of the Company Surgeon, except such as may be required for the immediate safety of the patient.

In case of injury to trespassers, a physician—the Company Surgeon when available—should be summoned only in case the injury renders the patient incapable of seeking medical attention himself. An injured trespasser should not, except in emergency, be removed from the county in which the injury occurs, but arrangements should be made to turn the patient over to the county authorities in case he cannot provide for his own care after emergency service has been rendered.

Dr. O. H. HORRALL,
Chief Surgeon,
Chicago, Illinois

Dr. R. B. KEPNER,
Chief Medical Officer,
Chicago, Illinois

Chicago, Burlington & Quincy Railroad Company

TRAINS WESTWARD ARE SUPERIOR TO TRAINS OF THE SAME CLASS EASTWARD.

MANUAL BLOCK SYSTEM—RULE 318 (B) IN EFFECT.

Rule 907 in effect between Streator and N. Y. C. Jct .

Trains or engines using spur track between L. & S. Jct. and Lowell must move at reduced speed as track is seen or known to be clear.

No train order signal at Streator or Zearing Conductors and enginemen must have Clearance Form A.

Clearance Form A will not be required at Kasbeer.

Office open Saturday: **Streator continuous.**
N.Y.C. Crossing continuous.
Zearing continuous.

Office open Sunday: **Streator continuous.**
N.Y.C. Crossing continuous.
Zearing continuous.
Other offices closed.

Normal position of the junction switch at N. Y. C. Jct. is for the Streator and Kasbeer Subdivision.

C. B. & Q. trains may register by ticket at N. Y. C. Crossing, M.P. 36.84.

Normal position of the junction switch at Streator is for the Aurora and Streator Subdivision.

Trains must stop at crossings of N. Y. C. and G. M. & O. at Streator and be governed by position of gates at G. M. & O. Crossing.

Drawbridge 24.83 over Illinois River at La Salle, not interlocked. See Special Instruction 10.

Trains have no time table superiority between Streator depot and north wye switch on the Montgomery and Streator Subdivision, between Streator depot and west wye switch on the Streator and Kasbeer Subdivision, and on the leg of the wye between the west wye switch and the north wye switch. All trains and engines must move at reduced speed.

O engines must not go on Illinois River Bridge 24.83 at La Salle, or Bridge 25.50 over Illinois-Michigan Canal, east end of La Salle Yard.

Trains taking siding at Spring Valley and Ladd must move expecting to find cars on siding.

Dickinson, La Salle and Peru Yards extend from yard limit sign at M.P. 18 to yard limit sign at M.P. 29.06.

Trains having no time table superiority on both legs of the wye, and on the Streator and Kasbeer Subdivision main track between the wye switches at Zearing. All trains and engines must move at reduced speed.

Way freight extra leaves Streator 7:00 A.M. daily, except Sunday, for Zearing and return.

SPEED RESTRICTIONS

1. Troop trains consisting of passenger cars only (including caboose) will be governed by speed authorized for steam trains handling standard cars, except must not exceed 65 M.P.H.

Troop trains handling freight cars will be governed by speed authorized for freight trains, except must not exceed 50 M.P.H.

Light engines may operate at maximum speed authorized for freight trains, except must not exceed 35 M.P.H.

Steam switch engines not equipped with engine truck moving over the road (outside of switching limits) must run forward when practicable, and must not exceed 20 M.P.H.

Passenger trains handled by single-engine-truck freight engines must not exceed maximum speed authorized for freight trains unless otherwise provided in subdivision speed restrictions or by train order.

Passenger trains handling freight equipment must not exceed maximum speed authorized for freight trains unless otherwise provided.

Gas or diesel-electric motor cars may operate on the various subdivisions at maximum speed authorized for passenger trains, but must not exceed 50 M.P.H. On branch lines when steam is substituted for motor service speed must be reduced 10 M.P.H. below authorized speed for motor trains.

Gas or diesel-electric motor cars running backward must not exceed a speed of 10 M.P.H. above the speed authorized for engines running backward on that subdivision.

Diesel engines running light must not exceed speed authorized for freight trains except must not exceed 35 M.P.H. unless otherwise provided.

To prevent damage to traction motors, when handling electrically operated power units dead in train, the maximum speed must not exceed:

Gas or diesel-electric motor cars 60 M.P.H.

Diesel-electric passenger engines 75 M.P.H.

Diesel-electric freight engines 60 M.P.H.

Diesel-electric switch engines 40 M.P.H.

Where subdivision maximum speeds are less, they will govern.

LOCATION	Passenger Trains M. P. H.	Freight Trains M. P. H.
ALL SUBDIVISIONS		
On sidings.....	Reduced Speed	Reduced Speed
All crossovers and turnouts not otherwise specified....	10	10

Burgess Jct.—Earlville.....	20 MPH	20 MPH	20 MPH
West Eola—West Chicago.....	Must not operate.	10 MPH	20 MPH
Aurora—West Batavia.....	Must not operate.	10 MPH	20 MPH
Oregon—Mt. Morris.....	Must not operate.	Must not operate.	20 MPH
La Salle—Kasbeer.....	Must not operate.	15 MPH	20 MPH
Streator—La Salle.....	Must not operate.	15 MPH	20 MPH
Bridge 2.16, 24.83, 25.39 and 25.50.....	10 MPH	10 MPH	10 MPH
Earlville—Sterling.....	Must not operate.	15 MPH	20 MPH
Bridge 26.03.....	Must not operate.	6 MPH	6 MPH

In addition to the speed restrictions shown above over Bridges 2.16, 24.83, 25.39 and 25.50 between Streator and La Salle and over Bridge 26.03 near Amboy, derrick must be separated from engine by at least one light car when passing over these bridges.

SPEED RESTRICTIONS—Continued.

CHICAGO AND AURORA SUBDIVISION

The following symbols indicate the class of engine or type of equipment the maximum speeds shown in that column govern.

A—Trains 1, 2, 5, 10, 11, 12, 17, 18, 21, 22, 23, 24, 44 and 49 when consisting of all light weight cars handled by Diesel engines. See Class B Notes (1) and (2).

B—Passenger trains handled by Diesel engines, having one or more standard cars, or passenger trains handled by O-5-A, S-4 or S-4-A engines.

Suburban trains handled by Diesel, S-1-A, S-2-A, S-4 or S-4-A engines and consisting of all vestibuled or gallery type cars.

Note (1) Class A trains operated with automatic brake instead of electric straight air.

Note (2) Class A trains handled by S-1-A or S-2-A engines.

C—All other passenger trains.

Solid express trains consisting of equipment authorized for handling in passenger trains.

D—Freight trains.

Freight cars equipped for handling in passenger trains will be considered the same as standard passenger equipment.

Mail and express trains with cars equipped for handling in passenger trains, accompanied by caboose or drovers car, must not exceed 70 M.P.H., except trains having drovers cars 5762, 5764 and 5765 will be operated as Class B trains.

Steam engines running backward must not exceed 20 M.P.H.

DISPATCHERS—Aurora

C. E. Brown	A. J. Boyle	N. K. Colt	F. J. DuSell
H. W. Silverstein	L. A. Howard	F. E. Wood	H. G. Cornwell
B. E. Jones	J. M. Stoneberg	L. T. Guenther	R. A. Mollter

1. Telephones connected direct with nearest interlocking tower for communicating with operator are located adjacent to stop signals.

2. The following instructions will govern back-up movements of passenger trains, in both directions, between 14th Street Passenger Yard and Chicago Union Station. They are supplementary to and do not in any way modify the requirements of Chicago Union Station Company Rules of the Operating Department.

Before leaving 14th Street Passenger Yard, an air brake test must be made as prescribed in Rules 1304 to 1308 inclusive and in Rule 1346.

A pilot or qualified trainman must control back-up movements.

Where movement is to be controlled with a back-up hose, the brake pipe hose must be blown out before coupled onto the back-up hose.

When a train is ready for back-up movement, a qualified employe must first identify himself to the engineman. Before movement is started an air brake test must be made as prescribed in Rule 1346 by applying the brakes in emergency from the back-up hose or valve. It must be known that the brakes are working properly, back-up signal must be given by communicating signal from the rear car, followed by back-up hand or lamp signal, then another back-up signal by communicating signal. In the absence of any of these signals, the engineman must not move without a thorough understanding with the employe who is to handle the back-up movement.

A running test must be made with the back-up hose or valve after starting out of 14th Street Passenger Yard and Chicago Union Station, or any other point from where back-up movement is made. If the running test is not made within 300 feet, the engineman must stop the train and ascertain the cause.

After starting train in back-up movement, the engineman must carry the handle of the automatic brake valve in running position and work steam sufficiently to keep slack of train bunched.

To reduce speed of the train, the back-up valve should be opened gradually until brakes are felt to hold and speed is reduced, then closed. When stopping the train, the valve should be opened gradually until brakes are felt to hold and left open until train is stopped. In case of an emergency, the valve should be moved quickly to the wide open position and left open until the train stops.

3. USE OF TRACK. Rules of the Union Station Company govern operation of trains and engines using the Chicago Union Station Company tracks and tracks under its jurisdiction between 22nd Street on the south and Western Avenue on the north.

Automatic Block System Rules in effect between Roosevelt Road and Galesburg.

Between Roosevelt Road and South River Street, Aurora, and between Wataga and Galesburg, tracks will be designated by number and will be numbered from the north.

Between Roosevelt Road and South River Street, Aurora; between M. P. 80.40 and M. P. 85.20, Mendota; and between Wataga and Galesburg, if stop signal does not clear, trains may proceed on authority of operator, complying with Rule 509-A, except that if the signals designated below do not clear and there are no train orders in effect that would conflict, trains will be governed by Rule 509.

Signal at M. P. 9.11, located on west home bridge, La Vergne, which governs westward trains on track No. 1.

Signal at M. P. 13.3, located on west home bridge, Congress Park, which governs westward trains on track No. 1.

Signal at M. P. 13.0, located on east home bridge, Congress Park, which governs eastward trains on track No. 3.

Between Roosevelt Road and Union Avenue Tower M. P. 1.71 there are two main tracks.

No. 1 is an eastward and westward track.

No. 2 is an eastward and westward track.

On tracks 1 and 2 movement of trains in either direction will be governed by signal indication, regardless of superiority.

All movements on wye tracks connecting with Pennsylvania tracks and located in the vicinity of Canal Street will be made at restricted speed and be governed by signal indications.

Between Union Avenue Tower M. P. 1.71 and Kedzie Tower M. P. 4.83 there are three main tracks.

No. 1 is a westward track.

No. 2 is an eastward and westward track.

No. 3 is an eastward and westward track.

On track 1, Rules D-251, D-252, D-253 and D-254 in effect.

On tracks 2 and 3 movement of trains, in either direction will be governed by signal indications, regardless of superiority.

Between Kedzie Tower M. P. 4.83 and Cicero Tower there are four main tracks.

No. 1 is a westward track.

No. 2 is an eastward and westward track.

No. 3 is an eastward and westward track.

No. 4 is an eastward and westward track.

On track 1, Rules D-251, D-252, D-253 and D-254 in effect.

On tracks 2, 3 and 4 movement of trains in either direction will be governed by signal indications, regardless of superiority.

Between Cicero Tower and Downers Grove there are three main tracks.

No. 1 is a westward track.

No. 2 is an eastward and westward track.

No. 3 is an eastward track.

On tracks 1 and 3, Rules D-251, D-252, D-253 and D-254 in effect.

Manual Block System Rule 318-B in effect for trains moving against the current of traffic.

On track 2 movement of trains in either direction will be governed by signal indications, regardless of superiority.

Between Downers Grove and Eola there are three main tracks.

No. 1 is an eastward and westward track.

No. 2 is an eastward and westward track.

No. 3 is an eastward track.

On track 3 Rules D-251, D-252, D-253 and D-254 in effect.

Manual Block System Rule 318-B in effect for trains moving against the current of traffic.

On tracks 1 and 2 movement of trains in either direction will be governed by signal indications, regardless of superiority.

Quarry track at Naperville not safe for engines larger than O-1-A.

SPECIAL INSTRUCTIONS—Concluded.

Between Eola and South River Street, Aurora, there are three main tracks.

No. 1 is an eastward and westward track.

No. 2 is an eastward and westward track.

No. 3 is an eastward and westward track.

On tracks 1, 2 and 3 movement of trains in either direction will be governed by signal indications, regardless of superiority.

Between South River Street, Aurora, and Wataga, there are two main tracks used as double track. Rules D-251, D-252, D-253, D-254, D-261, D-262, D-263, D-264 and D-265 in effect.

Crossover movements will be governed by signal indications at Aurora, Montgomery, Bristol, Somonauk, Earlville, MS Tower, Mendota, Zearing, Princeton, Buda, Kewanee, Galva, Oneida and Wataga.

When a crossover movement has been authorized, movements from Plano, Sandwich, Leland, Meriden, Arlington, Malden, Wyanet, Neponset and Altona will be authorized by train order. Movements against the current of traffic from these stations will be authorized by Form D-R train order and a copy of the order will be delivered to train completing reverse movement unless movement is controlled by signal indication.

At crossover points where movement is controlled by signal indication between South River Street, Aurora, and Wataga, where Rules D-261, D-262, D-263, D-264 and D-265 are in effect, except between M. P. 80.40 and M. P. 85.20, Mendota, the following instructions will govern movement of trains both with and against current of traffic if stop signal does not clear.

Operator must first make inspection of switches within limits of crossover signals and determine if possible cause of signal failing to clear. After operator has assured himself that switches are in proper position, he will then report to dispatcher who may then instruct operator to advance the train and operator will deliver to the train as required by Rules D-262 and D-263 the following form of train order:

"Proceed on _____ track complying with Rule 509-A."

Before issuing this order dispatcher must know the track upon which train is to be moved has been cleared of opposing trains. This order must be issued at the point where signals are affected. These instructions do not relieve operators of proper operation and use of the check lock system.

Trains have no time table superiority on Mendota and Denrock Subdivision between the IC Tower switch M. P. 0.00 and M. P. 1.00 west of the east switch of the advance siding.

All trains and engines between M. P. 0.00 and M. P. 1.00 on Mendota and Denrock Subdivision will move at reduced speed. Normal position of east switch of advance siding west of Mendota is for Mendota and Denrock Subdivision and trains and engines using this siding must open and close hand-throw switches.

Between Wataga and Bishop there are two main tracks, and between Bishop and Galesburg three main tracks.

No. 1 is an eastward and westward track.

No. 2 is an eastward and westward track.

No. 3 is an eastward track.

On track 3, Rules D-251, D-252, D-253 and D-254 in effect. Manual Block System Rule 318-B in effect for trains moving against the current of traffic.

On tracks 1 and 2 movement of trains in either direction will be governed by signal indications, regardless of superiority.

BETWEEN EOLA AND GALESBURG:

When a train clears the main track, it must not re-enter main track without permission from operator, or by signal indication, where signals are provided for such movements.

Trains stopped or delayed after having passed a signal displaying a clear indication must approach the next signal at restricted speed until indication of governing signal can be determined.

A train entering a block between signals must be protected as required by the rules and proceed at restricted speed to the next governing signal.

A train moving against the current of traffic must proceed through yard limits Mendota, Zearing and Kewanee at reduced speed.

The following will govern movements through Seminary Street Interlocking Galesburg.

When signals protecting switches are in stop position, train, yard or enginemen will promptly communicate with the operator and when so instructed, may pass stop signal, examining switches and derails in route designated, assuring themselves they are in proper position.

One long and three short blasts of interlocking horn is signal for train, yard or enginemen to come to telephone.

Before entering interlocking limits at Waterman (south end Galesburg Yard), trains or engines moving south on yard tracks 4 to 9, inclusive, and moving in either direction through limits of crossover No. 42 between tracks 3 and 4 near south end of Yard R must stop clear of the bonded track section unless it is known that switches are properly lined for their movement.

These clearance points are indicated by yellow paint on each track located at safe clearance short of the ladder.

Switch light indication on tracks 4 to 9, inclusive, is yellow when lined for the ladder, and red when lined for the individual track.

On crossover No. 42 light indication for switches is yellow when lined for the straight track and red when lined for the crossover.

4. Freight and passenger diesel engines may operate on any siding, yard or station track where O-1-A engines operate.

5. TRAIN ORDER SIGNALS. At Eola there are two eastward train order signals located on bracket poles. Outside signal as seen from approaching eastward trains governs trains on track 3. Inside signal governs trains on tracks 1 and 2.

6. Extra trains will not display classification signals between Chicago Union Station and Galesburg; Aurora and Savanna.

7. C. R. I. & P. crossings at Ottawa, west of Peru, and C. & N. W. crossings between Walnut and Deer Grove, between Harmon and Rock Falls and C. G. W. Crossing at Holcomb are protected automatic interlocking signals.

8. In Chicago, no cars or engines must be allowed to block any street longer than 5 minutes. Enginemen must keep cylinder cocks closed and ring the bell when engines [are] in motion. Enginemen must not sound whistle except in case of emergency nor allow engines to blow off steam while passing under viaducts. (City Ordinances.)

9. Eastward trains and engines enroute to the Stock Yards or Western Avenue Yard must approach the wye switch at Rockwell Street at restricted speed, prepared to stop clear of the switch, unless signal to proceed is received from the switchtender located on the ground near Rockwell Street, with yellow flag by day, yellow light by night.

Westward trains and engines enroute from the Stock Yards or out of Western Avenue Yard must approach the junction switch located just east of Rockwell Street at reduced speed, prepared to stop clear of the switch, unless signal to proceed is received from the switchtender located on the ground near Rockwell Street, with yellow flag by day, yellow light by night.

Trains and engines must not exceed 12 M.P.H. over approaches and Bridge 3.99-A, located just east of Rockwell Street (Rockwell Street-West Lumber Connection Bridge).

10. Before proceeding over drawbridge 24.83 over Illinois River at La Salle or drawbridge 81.45 over Illinois River at Ottawa, all trains, engines or motor cars must come to a full stop and then be governed by yellow hand signals from the bridge tender.

Drawbridge at Ottawa will be in open position Monday to Saturday, inclusive, between 11:00 p. m. and 3:00 a. m., 8:00 a. m. and 9:00 a. m., 12:00 noon and 1:00 p. m., 5:00 p. m. and 7:00 p. m. and for the entire 24 hours on Sunday.

Drawbridge at La Salle will be in open position Monday to Saturday, inclusive, between 12 midnight and 8:00 a. m. and for the entire 24 hours on Sunday.

11. On the Empire Builder and [Western Star] the oscillating emergency red rear end light will be controlled manually between Chicago and South River Street, Aurora. Between South River Street, Aurora, and Savanna, the master switch will be placed in automatic control position and the oscillating emergency red rear end light will work automatically. If the automatic feature fails, the flagman must promptly cut out the master switch and operate the rear end light manually with emergency switches. On the Empire Builder and Oriental Limited the automatic feature of the oscillating emergency red rear end light is controlled by train speed.
