### SPECIAL RULES MOVEMENT OF TRAINS

1. Superiority of trains by direction is shown at the bottom of schedule pages. (See Rule No. 71.)

#### 2. MOVEMENT OF TRAINS OVER FOREIGN LINES:

Between Chicago (Grand Central Station) and C.G.W. Junction, Forest Park, trains will be governed by B.&O.C.T. R.R. time table and rules.

Between Sycamore and DeKalb trains will be governed by C.&N.W. Ry. time table and rules.

Between Galena Junction and Portage trains will be governed by C.B.&Q. rules. Trains will not require clearance or train orders but movements will be governed by signal indication.

Between Portage and Dubuque Junction trains will be governed by I.C. R.R. rules. Trains will not require clearance. Train movements will be governed by signal indication.

#### At St. Joseph

Between Francis Street and Fifth Street trains will be governed by C.B.&Q. rules.

Between Fifth Street and Monterey Street first class trains will run over the tracks of St. Joseph Union Depot Company, and between Monterey Street and H.&St.J. crossing over the tracks of the St. Joseph Terminal Railroad Company.

Between Fifth Street and H.&St.J. crossing freight trains will run over tracks of St. Joseph Terminal Railroad Company.

Between H.&St.J. crossing and B.C. Junction trains will be governed by A.T.&S.F. rules. Trains will be governed by block signals whose indications supersede superiority of trains for both opposing and following movements on the same track. Signals are controlled by operator at Terminal Yard, St. Joseph. A white light on side of concrete house at B.C. Jct is indication that Terminal Yard wishes to communicate with member of crew of train standing at Junction.

Between Leavenworth and Kansas City:

First class trains between Missouri Pacific Connection, Leavenworth, and K.C.T. Ry. connection (0.37 miles north of Kansas City, Kansas, station) will be operated over tracks of the M.P. R.R., and between connection K.C.T. Ry. and Kansas City Union Station over tracks of the K.C.T. Ry.

Freight trains between Missouri Pacific Connection, Leavenworth, and Kaw Point will operate over tracks of the Missouri Pacific R.R.

For movements over the Missouri Pacific R.R. tracks trains will be governed by M.P. R.R. time table and rules. For movements over Kansas City Terminal tracks trains will be governed by K.C.T. Ry. rules.

#### 3. The automatic block signal system is operated:

Between Forest Park (M.P. 10.3) and Galena Jct. (M.P. 157.6).

Between Eleventh Street, Dubuque (M.P. 172.1) and C.R.I.&P. crossing Oelwein (M.P. 245.2).

Between Marshalltown (M.P. 275.9) and Easton Boulevard, Des Moines (M.P. 222.2).

Between Southwest 30th Street, Des Moines (M.P. 217.1) and Diagonal (M.P. 145.6).

Be governed by Rules 501 to 519, inclusive.

#### 4. Automatic protection signals are operated between Q Junction (M.P. 26.3) and south end Leavenworth Bridge (M.P. 25.3).

All trains and engines will run with caution between Q Junction and Leavenworth Bridge, expecting to find main track occupied and unprotected, or draw span of Leavenworth Bridge open.

C.B.&Q. southward trains or engines before entering on C.G.W. tracks at Q Junction will first make certain there are no C.G.W. trains approaching and then may operate the switch and be governed by indication of signal per Rules 501 and 501-A. If signal does not immediately clear, after waiting five minutes the movement may proceed with caution, following flagman through the block.

- 5. Two main tracks are operative between  
 Forest Park and Elmhurst  
 East Stockton and Golden  
 Aiken and Galena Junction  
 Portage and East Cabin—I.C.R.R. tracks  
 Dubuque Junction and Fair Ground  
 Felton and Oelwein  
 Francis Street and St. Joseph Union Depot—C.B.&Q. and  
 St. Joseph Terminal R.R. tracks  
 Kansas City, Kansas, and Kansas City—K.C.T. tracks

6. At the following train order offices, trains must obtain clearance card, Form 14, as indicated:

C.G.W. Jct., Forest Park—All trains starting from Grand Central Station, Chicago, also obtain train order register check.

St. Joseph Union Depot—Trains using St. Joseph Union Depot tracks.

7. Register Stations:

- Chicago (G.C. Station) . . . All first class trains.
- Chicago Transfer . . . . . All trains except first class.
- C.G.W. Jct., Forest Park. All trains by register ticket, Form 188.
- Sycamore . . . . . All first class trains (for information of yard engines), and trains starting and terminating.
- Portage . . . . . All trains by register ticket, Form 188.
- East Cabin. . . . . All trains by register ticket, Form 188.
- Fair Ground. . . . . All trains by register ticket, Form 188, except when displaying signals for a following section.
- Oelwein . . . . . All trains.
- Waterloo . . . . . All first class trains (for information of yard engines only).
- Marshalltown . . . . . All first class trains (for information of yard engines only).
- Des Moines . . . . . All trains.
- Shops . . . . . All first class trains (may register by ticket, Form 188, when operator is on duty). (For information of yard engines only.)
- St. Joseph Union Depot. (Trains using Union Depot tracks.)
- St. Joseph Terminal Yard. All trains by register ticket, Form 188, for information of A.T.&S.F. Ry.
- Ohio Avenue Yard. . . . . All trains starting or terminating.
- Kansas City Union Station. . . . . All trains starting or terminating.

8. Standard Clocks:

- Chicago—Grand Central Station
- Chicago Transfer—Yard office
- Chicago Transfer—Engine house
- Sycamore—Telegraph office
- Stockton—Telegraph office
- Stockton—Enginemen's wash room.
- Fair Ground—Telegraph office
- Oelwein—Dispatcher's office
- Oelwein—Telegraph office
- Oelwein—Enginemen's locker room
- Marshalltown—Telegraph office
- Des Moines—Telegraph office
- Des Moines—Roundhouse foreman's office
- Conception—Telegraph office
- Shops—Yard office
- Kansas City—Ohio Avenue Yard office
- Kansas City Union Station Telegraph office

9. General Order Boards:

- Chicago—Grand Central Station
- Chicago Transfer—Yard office
- Chicago Transfer—Engine house
- Sycamore—Telegraph office
- Stockton—Telegraph office
- Fair Ground—Telegraph office
- Oelwein—Telegraph office
- Oelwein—Yard office
- Oelwein—Enginemen's locker room
- Waterloo—Telegraph office
- Marshalltown—Telegraph office

- Des Moines—Telegraph office
- Des Moines—Roundhouse locker room
- Conception—Telegraph office
- Shops—Yard office
- Kansas City—Ohio Avenue Yard office
- Kansas City—Enginemen's locker room, Ohio Avenue
- Kansas City—Union Station

10. Stations protected by Yard Limit Boards are as follows:

- |                    |                              |
|--------------------|------------------------------|
| Forest Park        | Powerville                   |
| Maywood            | North Marshalltown           |
| Bellwood           | Marshalltown                 |
| Sycamore           | Reddy                        |
| East Stockton      | Des Moines                   |
| Stockton           | Conception                   |
| Golden             | Shops                        |
| Dubuque            | B.C. Junction                |
| Fair Ground        | Q Junction                   |
| Felton             | Kirmeyer                     |
| Oelwein            | Leavenworth                  |
| Waterloo           | Kansas City Ohio Avenue yard |
| Cedar Falls Branch |                              |

11. Auxiliary Lines:

- |                  |                     |
|------------------|---------------------|
| Oelwein          | Des Moines District |
| Cedar Falls Jct. | Cedar Falls Branch  |
| B.C. Junction    | C.G.W. Ry.          |

(See Rules 14dd and 14ee.)

12. Conditional Flag Stops:

Nos. 5 and 6, and 7 and 8 will stop at any station to receive or discharge pay passengers.

**USE OF TRACK**

13. Between Reddy and Des Moines, all trains and engines before entering on main track must clear their movement with operator, Des Moines.

14. Trains or engines operating between Cedar Falls Junction and Cedar Falls will be governed by Rule 93 and will not require train orders.

15. Unless otherwise instructed, trains taking siding at Conception will meet in South Yard.

16. All first class trains will move with caution within switching district of Oelwein Terminal.

17. All first class trains will move with caution within switching district of Des Moines Terminal.

18. Engines using packing house track, Marshalltown, must flag movements over main track and sidings in addition to making regular crossing stops.

**RESTRICTIONS IN OPERATION OF LOCOMOTIVES**

19. Diesels heavier than D-2 class must not be operated on the Cedar Falls Branch, except for 1,000 feet north of house track switch at Cedar Falls Jct.

Maximum depth of water, over top of rail, through which equipment may be handled is as follows, except where greater depths are authorized by special instructions:

- Diesel engine. . . . . 5 inches
- Passenger cars . . . . . 9 inches
- Freight cars. . . . . 25 inches

When trains are operated through water a maximum speed of five (5) miles per hour must not be exceeded.

20. The following signs placed in column provided on face of schedule pages indicates:

- W—Water
- O—Fuel for Diesel locomotives
- T—Turntable
- S—Track scales
- Y—Wye
- PH—Telephone or telegraphphone
- R—Radio base station
- Ry—Radio yard station

21. When snow plows are operated ahead of or following other trains, absolute block between open stations must be maintained between such trains in territory involved. When necessary, dispatchers must call operators to establish necessary communications. These requirements do not modify Rule 99.

Snow plows, while in road operation, will not exceed a speed of five (5) miles per hour when meeting, passing, or being passed by a passenger train.

22. Precautions to be taken to insure safe train operation during and following severe storms:

**OPERATORS**—Notify Train Dispatcher promptly of nature and extent of storm. Call Section Foreman, if not on duty. If so advised by Section Foreman, hold trains until it is known track is safe.

**TRAIN AND ENGINEMEN**—Bring train under control and proceed through territory affected by storm at a rate of speed that will insure safety; notify Train Dispatcher condition of track. If unable to communicate with Dispatcher or Section Foreman and there is doubt as to safety of movement, take siding and wait until advised track is safe.

**TRAIN DISPATCHERS**—On receipt of report of storm, notify trains likely to be affected; see that Superintendent, Division Engineer and Roadmaster are notified and that Section Foremen are patrolling track and get all information necessary to protect safe movement of trains as quickly as possible. If necessary, have Operator call Section Foreman.

23. Agents and Operators (with card Form 874, ready for use) must take a position on station platform and closely observe all passing trains, signaling trainmen or enginemen to stop if anything is noticed that might imperil the safety of the train or employees. Card Form 874 shall be properly filled out and handed to rear end when a hot box, a flat wheel, a brake beam dragging, etc., is noticed. If nothing irregular is detected, a proceed signal must be given.

All employes at work in yards and between stations must also inspect passing trains.

When trains are entering or leaving sidings and at other places where practicable, at least one member of the train crew must station himself where the entire train will be pulled by him at slow speed and make a similar inspection.

Trainmen will exchange signals with trainmen on other trains from platform of caboose or passenger car when practicable, such signals to indicate whether or not train movement has the appearance of being normal.

Train and engine employes must be on the alert to receive, transmit, and act promptly on these signals.

#### 24. CLOSE CLEARANCES:

CHICAGO	Viaducts and trolley wires over various foreign line tracks in Chicago terminals used by C.G.W. trains, transfers and yard engines will not clear man on top or side of car.
BELLWOOD	IHB railway bridge will not clear man on top or side of car.
GALENA JCT.	Bridge over Galena River will not clear man on top or side of car.
MARSHALLTOWN	Guard against close clearances between main track and siding between First and Second Avenue. Between South track and adjacent tracks serving coal and oil companies.
TALMAGE	C.B.&Q. overhead bridge will not clear man on top or side of car.
CONCEPTION	Wabash overhead bridge will not clear man on top or side of car.
LEAVENWORTH	Bridge over Missouri River will not clear man on top or side of car.

#### 25. OPERATION OF RADIO:

Radio communication systems are under the jurisdiction of the Federal Communications Commission. The Railroad Company and its employes are governed by the Commission's Operating Rules. Violation is a Federal offense for which severe penalties are provided.

Federal Communications Commission Rule 2 reads as follows:

"No employe shall knowingly transmit any false distress communication, any unnecessary, irrelevant or unidentified communication, nor utter any obscene, indecent or profane language via radio."

Communication via the radio must NOT be utilized by any employe in any manner that would have the effect of supplanting or modifying strict compliance with transportation rules and special instructions.

Radio will NOT be used in the transmission of train orders directly to a train or engine, except in extreme emergencies. When so used, every precaution must be taken to prevent any misunderstanding. Transportation rules covering train orders transmitted by telephone will be followed.

Employes are prohibited from advising approaching trains as to the position of train order signal or informing them of the contents of any train orders for their train or for any other train. Train and engine crews are prohibited from requesting such information by radio.

#### 26. LOCATION OF SPRING SWITCHES.

Station	Location	See Note	Normal Position
East Stockton	—End of two main tracks	(1)	For westbound track
Golden	—End of two main tracks	(1)	For eastbound track
North Hanover	—West switch siding	(2)	For main track
Aiken	—End of two main tracks	(3)	For westbound track
Fair Ground	—End of two main tracks	(1)	For eastbound track
Almoral	—West switch siding	(2)	For main track
Felton	—End of two main tracks	(1)	For westbound track
Fairbank	—South switch siding	(4)	For main track
Des Moines	—North entrance to yard	(4)	For main track
Des Moines	—South entrance to yard	(4)	For main track
Cumming	—South switch siding	(2)	For main track
Sheridan	—North switch siding	(4)	For main track
Savannah	—South switch siding	(4)	For main track

Movement over spring switches will be governed by signal indications and the following instructions:

In automatic block signal territory, three-indication color light type signals are in use, located in advance of spring switches for approaching trains in either direction.

In non-automatic block signal territory, two-indication color light type signals are in use in advance of facing point of spring switch. A proceed signal indicates only that switch points are in normal position.

When signals indicate "STOP" trains must stop before reaching switch, and movement must not be made contrary to signal indication except by authority of caution card, Form 11, issued by Train Dispatcher, and not then until some member of crew shall have examined switch points and operated and secured switch by hand for the movement to be made. When switch has been operated by hand, and after the train has completely cleared the switch, the conductor (or engineer if there is no conductor) must see that switch is restored to and locked in normal position.

If any train moving through a spring switch is stopped before entire train has passed through the spring switch, NO REVERSE MOVEMENT SHALL BE MADE NOR SLACK PERMITTED TO RUN BACK UNTIL SWITCH IS LINED OVER BY HAND AND LATCHED IN REVERSE POSITION.

(Note 1.) Trains moving against the current of traffic onto single track will be governed by color light type dwarf signal and must stop clear of signal. Crew member shall proceed to dwarf signal and insert switch key in key clearing slot on side of dwarf signal, turning key clockwise as far as possible and remove key. After a time interval varying from three (3) minutes to six (6) minutes, depending on location, dwarf signal will clear.

Dwarf signal will remain clear for approximately three (3) minutes, or until movement is made past the signal. If movement is not made within three (3) minutes after signal clears, the signal will again display "STOP" indication.

(Note 2.) For movements from siding to main track a color light type dwarf signal will govern.

These signals have a clearing section identified by a (signal clearing point) sign in advance of signal.

Trains on siding waiting to be met or passed by other trains, must stay clear of the signal clearing point sign until trains to be met or passed have cleared; trains or engines on siding may then move into clearing section of signal. As soon as block in advance is clear, dwarf signal will then display indication to proceed.

(Note 3.) At Aiken, no signal for movements from westbound main track to single track is provided. Signal 155-34 will govern.

(Note 4.) A two-indication color light type signal is placed in advance of facing point of spring switch. A proceed signal indicates only that switch points are in normal position. They are not a part of the block signal system.

**27. DRAGGING EQUIPMENT DETECTORS.**

Dragging equipment detectors connected with the automatic block signal system are in operation at various locations between Dyersville and Fair Ground.

Dragging equipment signal indication light is located on the mast of the automatic signal, five feet below the signal head, and will display red indication when the detector arms have been broken by dragging equipment.

Trains finding the dragging equipment signal displaying

**28.....SPEED RESTRICTIONS**

LIMITS	CLASS OF SERVICE	
	Passenger Trains	Freight Trains
Main track except as otherwise restricted by yard limits, specific slow orders, slow boards, slow flags, special rules, or other proper notice.		
Between Forest Park and M.P. 76.0.....	60	45
Except: Junction switches at Forest Park.....	10	10
Maywood, over Street Crossings.....	30	25
Bellwood, over Street Crossings.....	30	25
Over Fox River bridge M.P. 36.5.....	20	20
Between M.P. 76.0 and M.P. 107.0.....	65	50
Except: Over Rock River bridge M.P. 87.2.....	25	25
Between M.P. 107.0 and Galena Jct.....	60	45
Except: M.P. 133.0 to M.P. 135.0.....	50	35
Winston Tunnel M.P. 152.4.....	20	20
Over Junction switches at Galena Jct..	10	10
Between Dubuque and Oelwein.....	60	45
Except: M.P. 171.8 to M.P. 174.5.....	25	20
M.P. 174.5 to M.P. 195.0.....	40	30
Between Oelwein and Marshalltown.....	55	45
Except: Oelwein to M.P. 350.....	20	20
Between Marshalltown and Reddy.....	60	45
Except: M.P. 239.2 to M.P. 235.1 (Santiago Hill).....	35	35
Grand Ave., East Des Moines and Reddy.....	45	30
Between Des Moines and Diagonal.....	60	40
Except: M.P. 204.7 to M.P. 190.3.....	50	35
M.P. 190.3 to M.P. 181.7.....	45	30
M.P. 161.0 to M.P. 160.7.....	40	25
Between Diagonal and Leavenworth.....	55	45
Except: On St. Joseph Terminal R. R.....	10	10
M.P. 32 and M.P. 30.....	50	35
M.P. 28.5.....	20	15
M.P. 26.3.....	20	15
Q. Jct. and Leavenworth Bridge.....	20	15
Over Leavenworth Bridge and Mo. P. connection.....	10	8
<b>MISCELLANEOUS:</b>		
All trains and engines operating through spring switch turnouts will not exceed.....	20	20
All trains and engines operating through cross-over, junction, siding and yard switches, except spring switches, will not exceed.....	15	15
Passenger trains handling box cars equipped for passenger train service.....	60	
<b>TRAINS HANDLING:</b>		
Mixed freight and passenger equipment.....	45	45
Steam derricks, pile driver, or cranes on their own wheels.....		30
Derricks X-200 and X-250 class (Cooper's rating E-72.3) must not be operated over Missouri River bridge at Leavenworth or on the DeKalb and Cedar Falls branch lines.		
Scale test car.....		25

red indication will immediately stop, thoroughly inspect entire train, correcting trouble if possible.

Dispatcher must be notified as to cause. After train is in condition for movement dispatcher will instruct trainmen to operate knife switch located in the small iron box on top of signal case and locked with a switch lock. Placing the knife switch in the down position will cause the red detector light on the signal mast to be extinguished, and will permit automatic signal to clear providing there is no train or other obstruction in the block.

**29. Maximum Speed Over Railroad Crossings as Follows:**

LIMITS	CLASS OF SERVICE	
	Passenger Trains	Freight Trains
30. Through City Limits of the following towns, speed of trains is restricted as follows by city ordinance:		
Dubuque—over streets.....	30	25
Dyersville—Union and Chestnut Streets.....	45	45
Oelwein—Frederick Street.....	10	10
Waterloo—over street crossings.....	20	20
Marshalltown—over street crossings.....	30	25

31. Except where other restrictions require slower speed, all trains will reduce speed to twenty-five (25) miles per hour while meeting or passing another train occupying a siding.

32. At stations where telephones are located, conductors should communicate with dispatcher within 15 minutes after arrival, unless expected train is heard, or seen approaching, but will not be required to handle train orders except in emergency.

At stations where office is closed, conductors must call operator to office when delay has reached 30 minutes in excess of time expected, in case the expected train is not seen, or heard, approaching.

**OPERATING INSTRUCTIONS FOR MARS COMBINATION WHITE AND RED FIGURE "8" HEADLIGHT**

**WHITE LIGHT**

To be used in figure "8" position whenever the standard locomotive headlight is in operation.

**RED LIGHT**

**ON SINGLE TRACK**

When head end protection is required as provided by Rule 99, enginemen will immediately display RED HEADLIGHT. This will not relieve forward trainman or fireman from complying with fourth paragraph of Rule 99.

When occupying main track meeting an opposing train, RED HEADLIGHT will be displayed approaching and while standing on main track waiting arrival of opposing train.

**ON TWO MAIN TRACKS**

When a train is disabled or stopped suddenly by an emergency application of air brakes or when engineman finds it necessary to stop train due to some defect or under circumstances which might cause derailment, resulting in fouling adjacent tracks, or when necessary to provide protection when doing station work, enginemen will immediately display RED HEADLIGHT. Enginemen on approaching trains on adjacent tracks will immediately stop and proceed only after knowing track is clear.

THE OPERATION AND USE OF RED HEADLIGHT WILL NOT RELIEVE ENGINEMEN OR TRAINMEN FROM COMPLYING WITH RULES 99, 102 and D152.

**TABLE OF TRAIN SPEEDS**

Seconds Per Mile	Miles Per Hour	Seconds Per Mile	Miles Per Hour

## SPECIAL SAFETY CODE FOR EMPLOYEES IN TRAIN, ENGINE, AND YARD SERVICE

1. Safety is of first importance in the discharge of duty.
2. Avoid all risks. Watch for unsafe conditions and correct and report them.
3. Look both ways before crossing any track. Avoid crossing track in front of movement after signal is given to move. Do not stand or walk on track when avoidable.
4. Step over rails, frogs, switch guard rails, interlocking machinery or connections and not on them. Do not sit on rails or ties or take refuge under car.
5. Look out for approaching movements and alight outside of rails when getting off engine or car.
6. When alighting from or boarding rear end of freight train, use rear platform of caboose.
7. When boarding or alighting from a locomotive, caboose, or car face in, as on a ladder. Observe footing and clearances before alighting from moving or standing engine or car. Keep firm grip on handhold until foot is firmly placed on ground or other support when engine or car is standing.
8. Keep away from side or end while riding top of car, except for time required to operate brake or perform other duty there.
9. Do not ride on facing end of leading car or trailing end of rear car when possible to avoid it.
10. When riding side or top of car, keep a close watch for unsafe clearances.
11. Before going under or between standing cars or engines, first see or know they will not be moved. Otherwise obtain suitable protection. No signal should be given to move engine or cars when anyone is under or between.
12. One man will be permitted to ride the leading footboard of switch engine on short switch moves. He will board the footboard from a position outside of the rails, remaining in sight of engineer or fireman. He will alight from the footboard before coupling into other equipment. Enginemen will not permit their engine to couple into other equipment while a man is riding the leading footboard.
13. Employees will not attempt to board oncoming footboards when the movement is of such speed to be unsafe, or when engine is moving over frogs, crossovers, turnouts, or where a safe footing on the ground or footboards is in doubt.
14. Firm grip and safe foothold are essential to safety when on sillstep, side ladder, end platform, or in transferring or changing position.
15. When alighting from moving equipment extreme care should be exercised. Avoid getting off in an awkward manner that will result in strains or sprains.
16. When engineman sees or knows that ground man is about to get on or off, he will regulate speed down to point of assured safety. Consider the footing, visibility and other conditions.
17. In setting or releasing brakes, be alert to the hazard of slipping or losing hold, sudden lurch, stop or start of car, brake club breaking or slipping, brake chains kinking or overlapping, also grabbing or kicking of brake. (Study the peculiarities and proper handling of different types of brakes.) Pressure on brake should be exerted toward body of car. Do not hold brake tension by hand—use the dog and ratchet.
18. Leave cars in clear and tied down to avoid possibility of fouling other tracks or man on side of car. Do not leave cars standing on tracks too near street or highway crossing, preferably 60 feet away from the crossing.
19. Be prepared constantly for sudden start or stop and for the shock of brake or slack action.
20. Use cut-lever to uncouple cars. If lever is inoperative, tie the movement down before crossing to opposite side.
21. It is prohibited to use foot or hand to adjust drawbar, knuckle or lock pin while car or locomotive is in motion or when another car is approaching within a car length.
22. Angle cocks will be closed before uncoupling air hose when there is pressure in train line. When setting brakes by turning angle cock, keep firm grip on hose.
23. Do not place hands, feet, or any part of body between inside end of car and lumber, pipe, or other lading likely to shift. Keep clear of unsecured drop end doors. Do not use gate of gondola for handhold.
24. Slack cuts apart half car length before going between couplers to make adjustments of knuckles or for other purposes.
25. Do not attempt to cross track close in front of moving engine or car.
26. Wear safe shoes and other apparel, and use suitable clear (or Calobar) goggles when needful to protect against sand, cinders, or other eye hazards.
27. Keep feet in clear of the path of counterweights on ground throw switch levers. Do not handle switch stand lever when switch is being run through.
28. A habit of too much idle conversation across cab or caboose may contribute to serious accident.
29. Keep the mind on the work and have a clear and mutual understanding of the moves to be made.

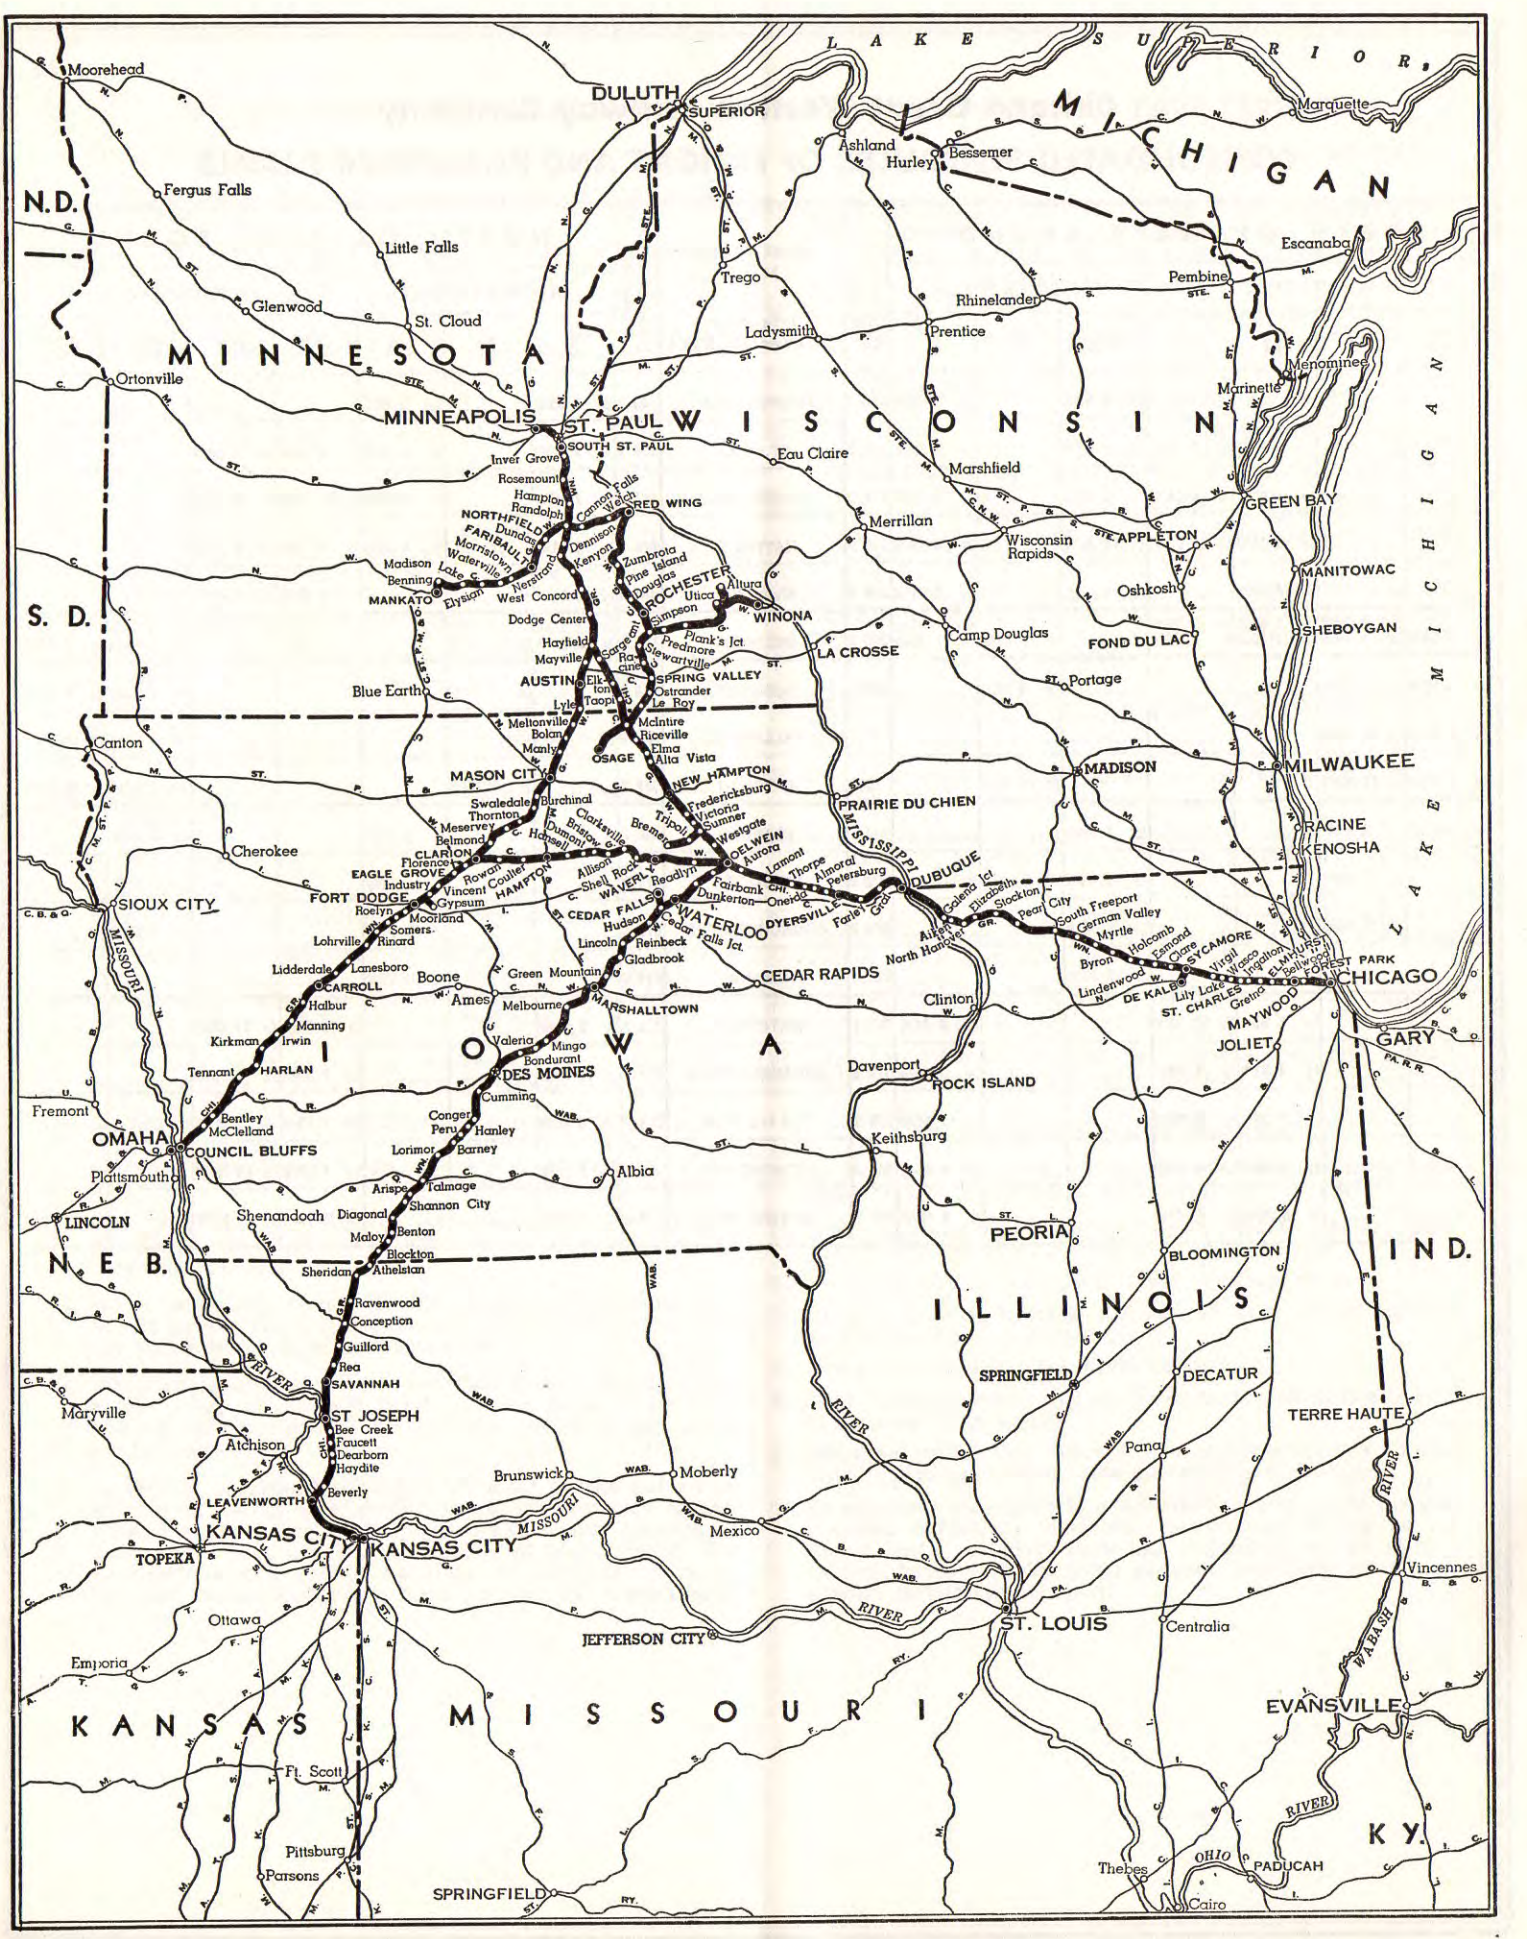

### DIESEL LOCOMOTIVE HAZARDS

30. Enginemen and others will use hard rubber or nonmetallic cased flashlights in and around Diesel locomotives.
31. Never place hands or face near main generator or any high voltage equipment while it is working under load.
32. Do not smoke or have open flame in engine room.
33. Rings and wrist watches will not be worn while working around electrical equipment.
34. Fuses will not be pulled while under load.
35. High voltage cabinet will not be opened while motor is running, other than idling.
36. Stepping out of side doors of moving Diesel units to elevated platform or other side elevation is prohibited.
37. At any time an engine is overheated or shut down for mechanical defect, no handhold cover plates should be removed until sufficient time has elapsed to permit engine to cool down sufficiently to prevent possibility of an explosion (minimum one hour).
