# SPECIAL INSTRUCTIONS

## NORTHERN DIVISION

**No. 1.** All trains must secure clearance before leaving North Cairo and Corinth.  
Southward trains must secure clearance before leaving Winford.  
All trains must secure clearance before leaving Tamms.

**No. 2.** Northward trains are superior to trains of the same class in the opposite direction.

**No. 3.** L&N trains using G. M. & O. tracks at Humboldt will be governed by G. M. & O. rules and regulations.  
S. L. S. F. trains using G. M. & O. tracks at Tupelo will be governed by G. M. & O. rules and regulations.

**No. 4.** All trains between St. Louis Union Station and East St. Louis will be governed by the rules of the Terminal Railroad Association and Union Depot Company.  
Northward trains before proceeding to Relay Depot over Conologue track must call up "Q" tower by telephone and obtain authority.

**No. 5.** Unless otherwise provided, northward trains taking siding at Iselin will head in at the south switch at Iselin, and southward trains taking siding at Iselin will head in through the crossover just south of signal 384-9.  
Northward train leaving Iselin to meet southward train in Jackson Yard will not pass Madison Street until the southward train shows up.

**No. 6. TRAIN REGISTERS:**

Tolson	Iselin
Tamms	Perry
North Cairo	Ruslor Junction
Winford	Okolona

All trains will register at Tolson North Cairo, Winford, Perry and Ruslor Junction, by giving the operator at those points Form 9 properly filled out, and the operator will personally make entry in the register.

**No. 7. YARDS:**

E. St. Louis-Tolson	Rives
Percy	Humboldt
Murphysboro	Jackson-Iselin
Tamms	Ruslor Junction-Corinth
Davis-Cairo	Tupelo
Union City	Okolona

**No. 9. RAILROAD CROSSINGS:**

Interlocked:	Maximum Speed
	Passenger    Freight
A. & S. —Mile 642	35 MPH    25 MPH
M. P. —Bixby	45 MPH    35 MPH
M.-I. —Sparta	45 MPH    25 MPH
M. P. —Percy	35 MPH    25 MPH
I. C. —Mile 555	25 MPH    25 MPH
C. & E. I.—Tamms	35 MPH    20 MPH
M. P. —Between Mile Posts L-1 and L-2.	35 MPH    25 MPH
I. C. —Rives	45 MPH    20 MPH
I. C. —Winford and North Cairo—crossover—end of double track.	20 MPH    20 MPH

**Non-Operative approach signals:**

I. C. —Jackson	20 MPH	20 MPH
Southern —Corinth	20 MPH	20 MPH
St.L.-S.F. —Tupelo	20 MPH	20 MPH

**Not Interlocked:**

Terminal R. R.—E. St. Louis	
I. C. —E. St. Louis	
Wiggins Ferry —E. St. Louis	
Southern —E. St. Louis	
N. Y. C. —Between Mile Posts L-3 and L-4	
L. & N. —Humboldt	

**No. 9. RAILROAD CROSSINGS:—Concluded**  
**Gates:**

L. & N.—Union City

Maximum speeds prescribed must not be exceeded through interlocking limits (that is, between absolute Signals), and do not relieve employes from complying with Rule 93 and special instructions.

**No. 10. WATER STATIONS:**

Venice	Iselin
Tamms	Corinth
	Okolona

**No. 11. FUEL STATIONS:**

Venice	Corinth
Tamms	Okolona
Iselin	

**No. 12. BULLETIN BOARDS:**

Venice, Yard Office	Iselin Yard Office
Venice, Roundhouse	Iselin Round House
Tamms Yard Office	Corinth
	Okolona

**No. 13. STANDARD CLOCKS:**

Venice	Iselin Yard Office
Tolson-Yard Office	Iselin Round House
Murphysboro	Corinth
Tamms Yard Office	Okolona
North Cairo	

**No. 14. MAXIMUM SPEED RESTRICTIONS:**

Between E. St. Louis and Okolona.	{	Passenger..... 55 MPH
		Freight..... 40 MPH

**Exceptions:**

Between Perry and Ruslor Jct.	{	Passenger..... 70 MPH
From MP 368.5 to MP 364.5, Ballard — NORTHWARD Track.		Passenger..... 40 MPH
Through switches MP 368.6 and MP 369.5 SOUTHWARD Movement.		Passenger..... 40 MPH
Between north and south siding switches at Murphysboro.		Trains and Engines..... 20 MPH
Between north switch Davis and North Cairo.		Trains and Engines..... 20 MPH
Between Illinois and Ballard, over Ohio River Bridge.		Trains and Engines..... 20 MPH

Trains having hot boxes must be stopped before moving on Ohio River Bridge and proper attention given to such boxes before proceeding.

Trains using turnouts will not exceed..... 15 MPH

Passenger trains must consume 8 minutes going down Alto Pass Hill.

Freight trains must consume 12 minutes going down Alto Pass Hill.

Trains Handling Loaded Koppel Air Dump Cars.... 25 MPH

Steam Derricks..... 25 MPH

Scale Test Cars..... 35 MPH

**SPECIAL INSTRUCTIONS—Continued**

**No. 14. MAXIMUM SPEED RESTRICTIONS:—Concluded**

Trains handling Jordan Spreader, 25 miles per hour, with wings properly secured and trailing.  
 Steam Shovels, Hoisting Derricks, Pile Drivers, Locomotive Cranes, and Asphalt or similar paving plants, on own trucks.....25 MPH  
 Operating or towing standard switchers.....25 MPH  
 Diesel-electric engines and passenger cars must not be operated, either by towing or using power through water having a greater depth over rail, or at a greater speed, than that shown in the following table:

	Depth of Water	Speed
Electro-Motive Freight Diesel Engines.....	4"	5 MPH
Baldwin Diesel Engines.....	6"	5 MPH
Ingalls Combination Engine.....	6"	5 MPH
Alco Freight & Switching Diesel Engines.....	4"	5 MPH
Passenger Cars with Roller Bearings.....	8"	5 MPH
Passenger Cars, Standard Friction Bearings.....	12"	5 MPH

All trains will observe speed restrictions indicated by Diamond Boards.

**No. 15. WARNING:**

All employees are warned that it is dangerous to ride on tops or sides of cars, or to lean out from engines or cars while passing such as platforms, coal houses, engine houses, freight houses, ice houses, storage houses, warehouses, mail cranes, stock pens, nearby fences and telephone poles, crossing gates, cotton platforms, cottonseed houses, log derricks, piles of lumber, and similar buildings and structures.

**No. 16. EXTRACT FROM LAWS OF MISSISSIPPI:**

"It shall be unlawful to back a train of cars, or part of a train, or an engine into or along a passenger depot at a greater rate of speed than three miles an hour; and every such train, part of a train, or engine backing into or along a passenger depot, and within fifty feet thereof, shall, for at least three hundred feet before it reaches or comes opposite to such depot, be preceded by a servant of the railroad company on foot, not exceeding forty nor under twenty feet in advance, to give warning."

**SIGNALS APPROACHING HIGHWAY CROSSINGS:**

Attention is particularly directed to the laws of Illinois, Kentucky, Tennessee and Mississippi, which require that the crossing signal, by whistle, shall be continuously repeated, or that the bell shall be continuously rung, from whistle board to each highway crossing. In Tennessee, the law also requires that the whistle should be blown or the bell rung for a distance of one mile before reaching the corporate limits of any city or town.

**No. 18. AUTHORIZED DIESEL OPERATION:**

Following diesel units will not be operated between:

St. Louis Union Station and E. St. Louis via Eads Bridge.....807A-810A

Not more than 2 units of other classes of diesels may be operated in multiple between St. Louis Union Station and E. St. Louis via Eads Bridge.

**No. 19. INSTRUCTIONS REGARDING INTERLOCKING AND BLOCK SIGNAL TERRITORY:**

**DEFINITIONS:**

**MEDIUM SPEED.**—A speed not exceeding 30 miles per hour.

**RESTRICTED SPEED.**—Proceed, not exceeding 15 miles per hour, prepared to stop short of train, engine, obstruction, or switch not properly lined and to look out for broken rail.

**WITH CAUTION.**—To run at reduced speed, according to conditions, prepared to stop short of train, engine, obstruction, or before reaching a stop signal.

**OKOLONA DISTRICT—RUSLOR JCT.—ISELIN**

Automatic Block Signal System is in effect between Ruslor Jct. and Iselin Jct.

Normal position train-order signals at Ruslor Jct. and Perry will indicate "STOP" and must be changed within the view of approaching train.

G. M. & O. trains must approach Ruslor Jct. and Perry prepared to stop before reaching fouling point of adjoining tracks and stop unless switches are properly lined and train-order signal indicates "proceed," and will call for signal by one long and one short sound of whistle.

I. C. trains on either G. M. & O. or I. C. tracks must approach Ruslor Jct. and Perry prepared to stop before reaching the fouling point unless switches are lined for the I. C. connecting track and will call for signal by four short sounds of whistle.

I. C. trains approaching Ruslor Jct. and Perry will be handed clearance by operator with check of overdue superior trains. All trains to be registered at Ruslor Jct. and Perry by conductors handing operator register slip who will personally make entry in the register. Operators at Ruslor Jct. and Perry will be required to open and close all switches to be used by trains at their stations, except south siding switch Fox and I. C. siding switch Ruslor Jct.

Interlocking signals govern the movement of trains and engines between Iselin and Iselin Junction, without requiring the use of train orders, and their indications supersede timetable superiority, but do not dispense with the use or observance of other signals whenever and wherever they may be required.

Trains or engines not receiving proper signal indication at either Iselin or Iselin Junction will communicate with the operator at Iselin.

**JACKSON DISTRICT—WINFORD JCT.—NORTH CAIRO**

Between Winford Junction and North Cairo block signal indications supersede Time Table superiority without requiring the use of train orders; they do not dispense with the use or observance of other signals whenever or wherever they may be required.

Trains may pass stop and proceed signals, proceeding from such signal to the next signal indicating proceed, at restricted speed not exceeding fifteen miles per hour.

Clear home signal for northward trains at Winford Junction and for southward trains at North Cairo will authorize trains to proceed.

Trains not receiving proper signal indication at Illinois or Ballard will communicate with Operator at North Cairo.

Telephone located at switch.

Trains not receiving proper signal indication at either end of One Mile Bridge will communicate with Operator at Winford Jct.

Telephone located at switch.

# SPECIAL INSTRUCTIONS—Concluded

## MURPHYSBORO DISTRICT—NORTH CAIRO—TOLSON

Traffic Control System—Rules 525 to 540, inclusive—is in effect between North Cairo and Murphysboro.

Crews of northward trains, taking service at North Cairo, must approach the next signal in advance at restricted speed, and be governed by indication displayed by that signal.

Movement of trains and engines from the northward absolute signal at the north end of the siding at Murphysboro will be governed by the indication of that signal, if there are no train order or timetable restrictions affecting their movement. If the signal displays a red aspect, trains and engines, after being authorized by the control station to pass the signal, must move at restricted speed until entire train has passed "ETC" sign located approximately 14,000 feet north of the signal. Telephone located adjacent to absolute signals at north siding switch may be used to communicate with control station.

All main track switches between the north and the south siding switches at Murphysboro are hand operated and Rule 513 must be observed in their operation and use. All derrails are equipped with switch circuit controllers requiring that the derrails be on the rail in derailing position when not in use. Inside switch of crossover between main track and siding at Walnut Street also will be equipped with switch circuit controller requiring that inside switch of this crossover be normally lined for movement on the siding.

When control station authorizes use of switch equipped with electric lock, the switch must be operated as follows:

1. Unlock and open door of electric lock case.
2. If indicator is in "CLEAR" position, turn crank to the left until it is against stop block, then operate switch in the usual manner.
3. If electric switch lock fails to release, trainman must secure authority to operate emergency release. Instructions for operating emergency release are posted inside of electric lock case.

When a train or engine is occupying main track, the leading truck of engine or car must be less than one car length ahead of switch before the electric lock can be operated.

After movements over the switch have been completed, restore switch to normal position and lock it, turn crank to

the right until it is against stop block, close and lock door of electric lock case and notify control station.

Northward trains to hold main track at Bixby will call for signal by one long and one short sound of the whistle, and will be governed by indication of absolute signal located south of the crossing.

Northward trains to take siding at Bixby will call for signal by four short sounds of the whistle, and will be governed by indication of absolute signal located south of the crossing.

Southward trains holding main track at Bixby will call for signal by one long and one short sound of the whistle, and will be governed by indication of absolute signal located north of crossing.

Southward trains on siding at Bixby will call for signal by four short sounds of whistle, and will be governed by indication of dwarf signal located at south end of siding.

Northward trains approaching Alton & Southern crossing, south of Tolson, destined East St. Louis, using main track, will be governed by upper signal, 800 feet south of crossing. Trains destined to head in Tolson Yard will be governed by lower signal.

Southward trains on main track will be governed by the absolute signal located 800 feet north of crossing.

Southward trains moving out of Tolson Yard will be governed by dwarf signal located 300 feet north of the crossing between siding and main track.

## No. 20. SPRING SWITCHES.

Spring switches are in use at north end yard lead Jackson and at south end of siding Selmer.

A semaphore switch indicator equipped with switch key release box is located at spring switch at south end siding at Selmer.

Before train leaves siding to enter main track, a member of train crew must insert switch key in release box, turning key clockwise to full right, and if semaphore indicator displays "CLEAR", and operating rules are complied with, train may proceed through spring switch.

If the indicator displays "STOP", after waiting three (3) minutes and complying with operating rules, train may proceed through spring switch.

Spring switches must not be thrown by hand while cars are holding switch points open, except in emergency and then extreme care must be used in operating switch stand to avoid injury.

Trains or engines not receiving proper signal indication at either factin or Jettin Junction will communicate with the operator at Jettin.

Jackson District—Winford Jct.—North Cairo  
Between Winford Junction and North Cairo block signal indications supersede Time Table superiority without requiring the use of train orders; they do not dispense with the use or observance of other signals whenever and wherever they may be required.  
Trains may pass stop and proceed signals proceeding from such signals to the next signal indicating proceed at restricted speed not exceeding fifteen miles per hour.  
Clear home signal for northward trains at Winford Junction and for southward trains at North Cairo will authorize trains to proceed.  
Trains not receiving proper signal indication at Illinois or Jettin will communicate with Operator at Winford.  
Telephone located at Jettin.

Attention is particularly directed to the fact that the whistle should be blown on the bell ring for a distance of one mile before reaching the corporate limits of any city or town.

## SPECIAL INSTRUCTIONS Continued

# SAFETY PRECAUTIONS

Bear in mind that **Eternal Vigilance** is the price of **SAFETY** and that **SAFETY** must have first consideration in the operation of this property.

Rules are the result of past experiences. A wise man does not pit his judgment against them. Observe all rules and be safe.

The time to prevent an accident is before it occurs.

Conductors and engineers I be sure you understand your orders. Read them twice, and check Nos. against clearance.

Don't fail to ring bell or blow whistle at dangerous places.

Don't stand on end of a car without having a secure hold.

Don't sit on brake wheels of cars.

Don't stand close to pole when poling cars.

Don't go between cars to make a coupling.

Don't attempt to adjust couplers on moving cars.

Don't kick drawbars or open knuckles with the feet.

Don't walk on frogs, switches, guard rails or interlocking machinery or connections.

Don't cut air in too abruptly; use sufficient time and avoid sticking brakes.

Avoid coupling to or going against standing engine-motor on or around inspection pit tracks, until assured no one is working on or about them.

When using jacks under rails, place outside if possible.

Loose ties and rails should be kept six feet back from the track to give trainmen sufficient clearance.

Remove motor cars from track when they are not in use.

Stand back at a safe distance when cars pass to avoid being struck by protruding objects.

Agents and operators should note condition of trains as they pass their stations. This denotes efficiency.

Handle telephone receivers, during lightning storm, in such a manner as not to cause contact with any metallic substance.

Employees must not ride on the forward footboard of yard engines on long moves or transfers in yard and are forbidden to ride on pilots of locomotives between stations.
