**INTERNATIONAL - GREAT NORTHERN
RAILROAD COMPANY**
**SAN ANTONIO, UVALDE & GULF
RAILROAD COMPANY**
SAN ANTONIO SOUTHERN RAILWAY
ASHERTON & GULF RAILWAY CO.
ASPHALT BELT RAILWAY COMPANY

SAN ANTONIO DIVISION

**TIME-TABLE
No. 68**

Effective 12:01 A. M.

MONDAY, MAY 1, 1950

CENTRAL STANDARD TIME

Superseding Time-Table No. 67, dated October 30,
1949, and all Supplements thereto.

**FOR THE INFORMATION AND GOVERNMENT OF
EMPLOYES CONCERNED, WHO MUST ALSO
CARRY A COPY OF SPECIAL INSTRUCTIONS
NO. 6 DATED MAY 1, 1950.**

The Railroad Company reserves the right to vary therefrom
as circumstances may require.

F. E. BATES, Senior Executive Assistant

A. B. KELLY, General Manager

R. JOHNSON, Acting Assistant General Manager

L. A. GREGORY, Gen'l Superintendent Transportation

E. W. HARGRAVE, Ass't Gen'l Sup't Transportation

SPECIAL INSTRUCTIONS

The following rules are repeated from the Uniform Code of Operating Rules for emphasis:

GENERAL NOTICE (in part) : SAFETY is of the FIRST importance in the discharge of duty.

RULE B: Employees must have a proper understanding and working knowledge of and obey all rules and instructions in whatever form issued, applicable to or affecting their duties. If in doubt as to their meaning, employees must apply to the proper officer for an explanation.

When properly authorized, rules may be cancelled, superseded or changed by:

- (1) General Order,
- (2) Special instructions in the timetable or in pamphlet form,
- (3) Paste in the book of rules.

RULE E (in part) : Employees must render every assistance in their power in carrying out the rules and instructions. Courteous cooperation between employees is required for proper functioning under the rules and instructions.

RULE 107 (in part) : Conductors and engineers must bring about cooperation between all members of the crew.

Both the conductor and engineer are responsible for the safety of the train and the observance of the rules.

Although engineers are under the direction of the conductor regarding the supervision of trains, they will not comply with any instructions which imperil the safety of the train or involve a violation of the rules.

Where safety of trains and observance of rules are involved, brakemen and firemen are responsible to the extent of their ability to prevent accident or violation of rules. They will not comply with any instructions which imperil the safety of the train or involve a violation of the rules.

RULE 108: In case of doubt or uncertainty, the SAFE course MUST be taken.

RULE 101 (in part) : Conductors and engineers must inform themselves of conditions, and during and after excessive rains, heavy storms, fogs, or any condition which may restrict visibility or affect condition of track, must restrict speed of their train to insure ABSOLUTE SAFETY, and if in doubt of being able to proceed safely, train must be placed in siding until it is safe to proceed.

When storms, fogs, or other conditions obscure track or signals from points where they are plainly seen under normal conditions, speed must be restricted to insure seeing and complying with indications or any and all signals, REGARDLESS OF LOSS OF TIME.

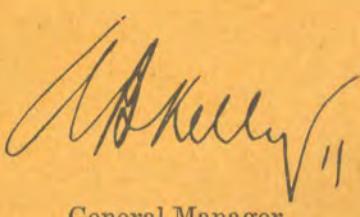

RULES 2 and 3 of Rules and Instructions for Train Dispatchers:

The train dispatcher is in position to render valuable service in bringing about compliance with the rules; first by habitually conforming to the rules in the daily performance of his own duties; second by requiring compliance with the rules on the part of operators, trainmen and others with whom his duties bring him in daily contact; and third, by immediately reporting any rule violation, any negligence of duty or any irregularity relating to the movement of trains and the handling and execution of train orders.

Train dispatchers must bear in mind that his more extended means of communication and consequent knowledge of conditions, gives him a point of view not available to any other person connected with train, engine or yard movements, and that his duty to impart that knowledge to others, when it will promote safety, or without sacrificing safety, will expedite movement of trains.

NOTE WELL AND REMEMBER:

1. No officer or employee has the authority to violate a rule.
2. No officer or employee has the authority to tell anyone to violate a rule.

J. P. Kelly
General Manager

**ATTENTION
TRAIN AND ENGINE CREWS**

Always keep in mind that the revenue passenger is the BUYER, and that it is your job to make every Buyer a satisfied customer. To that end, the following matters deserve your constant attention:

1. If an error or misstatement has been made somewhere along the route, put forth every effort to correct it. Nothing should be considered too trivial.

2. Ever be alert to the safety and comfort of your passengers, and freely give information and advice when requested. The aged, infirm and the young passenger traveling unaccompanied require special attention. Be helpful to them in every way possible, particularly in assisting them on and off trains, and occasionally inquire as to their comfort.

3. Protect both coach and sleeper passengers against undue noise or disturbance, particularly at night. Remember they pay to sleep.

4. The avoidance of arguments or friction with passengers is a test of your diplomacy. A calm and pleasant manner, regardless of the circumstances, is the best assurance of your success.

5. Keep posted on connecting line train service, arbitrary holds they have in effect for our trains, and advise passengers so as to avoid, as far as possible, any uneasiness on their part about missing connections, and when same is unavoidable, tell them what time the next connection is due to depart.

6. Cheerfully offer explanation of unusual delays and pass such information to other members of your crew—Brakeman, Porter, Pullman and Dining Car employees—so they too may advise passengers. Generally speaking, passengers will gladly accept a condition which they understand, but on the contrary are irritated when kept in ignorance.

7. Neatness of appearance and courtesy bespeak pride in your job, and create good-will for the Railroad.

8. Being considerate of others is the key to popularity. This applies to the institution and individual alike. Many of your passengers may be riding a train for their

first time. This is especially true of the younger generation. Kind and attentive treatment to make them feel at home creates additional passenger traffic.

9. Remember that people traveling on passes have a right to that privilege, and are entitled to the same courteous treatment as other passengers. A satisfied "free-transportation" passenger is always a booster.

10. On crowded trains, Missouri Pacific Lines employees riding on passes should, and will if properly approached, cheerfully cooperate in seeing that revenue passengers are given every possible consideration.

11. Train Porter should keep coaches clean and in tidy condition at all times. Toilets particularly are the source of adverse comment. Inspect them frequently.

12. **AVOID ROUGH HANDLING OF YOUR TRAIN.** Missouri Pacific Lines enginemen have an enviable reputation for smooth starting, running and stopping of their trains. Never lose sight of this feature, as passengers are more disposed to avoid the route that does not give them a smooth ride, than they are to exert the effort involved in registering complaints about it.

13. Of equal importance is **SMOOTH HANDLING OF FREIGHT TRAINS.** Rough handling results in damaged lading and delays due to damaged equipment, which creates dissatisfied customers.

14. On-time delivery of passengers and freight at destination is what the customers pay for and expect. Your best efforts, always within the zone of safety, should be extended to keep your trains on time.

General Manager.

DIESEL ENGINES DEAD IN TOW:

With trucks and traction motors in good running condition	
---	--

Nos. 501 to 618	50
-----------------	----

Nos. 800 to 815	30
-----------------	----

Nos. 4100, 4101, 9000, 9100 and 9200 series	35
---	----

Nos. 4102 to 4111	50
-------------------	----

Nos. 7000 to 7017	50
-------------------	----

No. 7100	50
----------	----

Diesel locomotive (road or switch) for movement dead in tow must have all switches opened; main fuse removed; reversing drums and main power contactors blocked. Messenger service will be provided for these units only when in the opinion of the Superintendent or Master Mechanic it is necessary to protect the units against freezing or when the unit is in such condition that it would require a messenger to prevent further damage en route.

All bearings, including motor support bearings, must be inspected and known to be properly lubricated for movement.

On Diesel locomotives, in cold weather where there is a possibility of damage by freezing, steam heat, when available, should be turned into the engine cooling system and steam heating coils; also open low level overflow valve on each engine.

When steam heat is not available, the entire engine cooling system and piping, including steam generator and main water reservoir, must be drained to prevent damage by freezing.

The foregoing is to apply whether the locomotive is standing or in tow. With trucks or parts of same in good running condition, to be moved at speed established on authority of Superintendent.

STEAM ENGINES DEAD IN TOW OR DISABLED UNDER STEAM:

With side rods in position, main rods disconnected.....	35
---	----

Moving backward in tow (side rods in position).....	25
---	----

With part or all of side rods down.....	15
---	----

With all side rods and main rods in position, cylinder heads removed, bottom quarter of front cylinder openings blocked with board and oily waste placed in front end of cylinder.....	40
--	----

Dead engines must be in charge of a messenger, and must be placed not less than three cars from engine handling train and from each other, and be headed in direction of movement, except in emergency, in which case they must be turned at first available point, except that engines not equipped with engine trucks dead in tow must be moved tender forward.	20
---	----

With front drivers blocked.....	20
---------------------------------	----

Engine drivers will be blocked in extreme emergency only. With other than front drivers blocked, there is no restriction on that account.	6
---	---

Locomotive blocked account disabled engine truck or trailing truck, or without full set of driving wheels, movement to first siding to clear main tracks.....	15
---	----

Further movement must be authorized by Superintendent.	20
--	----

Engines with all main rods, side rods, and pistons in position, valves blocked to cover ports, port plugs and cylinder cocks removed on disabled side.....	20
--	----

With flat spots 3" or more on driving tires, MAINTAIN SPEED.....	20
--	----

WORK EQUIPMENT, DERRICKS, CRANES, ETC.:

Wrecking Cranes (self-propelled) see table below:

Maximum freight train speed	Permissible speed of trains handling self-propelled wrecking cranes
15 MPH	10 MPH
20 "	15 "
25 "	15 "
30 "	20 "
35 "	20 "
40 "	25 "
45 "	30 "
50 "	30 "

Pile Drivers.....	25
-------------------	----

Steam Shovels.....	25
--------------------	----

Bridge Derrick Cars (non-revolving) Boom connected.....	30
---	----

Bridge derrick cars may be shipped with boom either connected or disconnected. If boom is connected, derrick car must be coupled to flat car and support provided for boom; boom must be chained or cabled to ear stake irons with sufficient play to allow for not less than 3 inches nor more than 6 inches lateral movement; uncoupling levers must be disconnected between derrick car and idler car; derrick cars may be handled in train with boom ahead or trailing as requested by messenger accompanying.

Bridge Derrick Cars (non-revolving), boom disconnected may be handled at maximum speed.

Bridge derrick cars shipped with boom disconnected must have boom disconnected at inboard connection on derrick car, boom falls and swing lines must be disconnected from boom and rear end of derrick car must be faced toward front of train.

Bridge derrick-pile driver (combination machine).....

Bridge derrick-pile driver (combination machine) may be shipped either as a derrick or as a pile driver. When shipped as a derrick, its movement shall be governed by the regulations applying to wrecking cranes. When shipped as a pile driver, its movement shall be governed by the regulations applying to pile drivers.

American Ditchers, self-propelled.....

American ditchers, self-propelling, must be coupled to flat car and uncoupling levers between machine and flat car must be disconnected. Boom must be supported exclusively by its cables. Bucket must be raised to clear idler car approximately eight inches and shored firmly against boom through 4 inch by 6 inch timber with all slack taken out of hoist cable. Water tank and boiler should be drained and rear of machine must be faced toward front of train.

SPECIAL INSTRUCTIONS

3. SPEED RESTRICTIONS (Cont'd)		Miles Per Hour	Miles Per Hour
Locomotive Cranes or Clam Shells.....		25	Jordan Spreaders and Spreader-Ditchers.....
Locomotive cranes or clam shell must be coupled to flat car and uncoupling levers between machine and flat car must be disconnected. Boom must be disconnected from rotating portion of machine and supported entirely upon flat car. Cables need not be removed from boom, but must be left slack between machine and boom. Water tank and boiler should be drained and coal bunker should be emptied. The rear of machine must face toward front of train, except when machine is accompanied by tender for use on bridge construction work and reversal is necessary from junction point to job to place it in working position upon arrival at destination. Machines having flexible coupling in drive shaft to provide for long wheel base may be handled in train at speed of 25 miles per hour when this permissible speed is clearly stenciled upon side of cab.		25	
American Ditchers, loaded on flat cars.....		25	Jordan spreaders and spreader-ditchers must be headed in working direction; the plows, wings and braces must be secured in shipping position by the pins, bolts, chains, etc., provided for this purpose.
Yard (clam shell) and "Burro" Cranes, loaded on flat cars.....		25	Scale test cars must be handled next to caboose and may be handled at maximum speed.
			Rail unloaders must have boom disconnected and stored on car, and may be handled at maximum speed.
			Where maximum train speed is 25 miles per hour or less, speed of trains handling Pile Drivers and Jordan Ditchers or Spreader-Ditchers must be restricted to five miles per hour less than such maximum train speed.

EXPLANATION OF STOPS

s—Regular stop.

a—Stop to receive or discharge revenue passengers.

f—Stop on signal for passengers, mail, baggage and express.

m—Stop to discharge revenue passengers originating South of San Antonio and to receive revenue passengers.

Passenger trains will stop at non-stop stations to discharge passengers holding tickets from connecting lines, except trains 21 and 22, Austin and Taylor Sub-Divisions.

When passengers or employees are injured, and require treatment, the nearest company surgeon will be called. When absolutely necessary outside surgeons may be called, but as far as practicable only to give first aid. They must be so informed at the time.

If the injured person is a trespasser upon the right of way of this company, such person must be turned over to the county authorities of the county in which the injury occurs.

Hospital ambulance will meet patients who are on cots, sick or injured, at Palestine depot. Do not call or wire for ambulance where patients can be carried to hospital in car. Conductors when wiring chief surgeon or dispatcher, will state whether ambulance or car will be needed.

Missouri Pacific Lines Employees Clinic located at 1503 West Houston Street, corner of Houston and Comal, San Antonio, Texas, is now open for service to the members of this association. Hours from 8:00 A. M. to 5:00 P. M. daily except Sundays. Telephone Fannin 1037.
