| " | Wabash.....18 | ".....8 & 14 | 12:35 a. m. | 15 Min. | When 1 to 5 passengers reported; 30 minutes, when 5 or more passengers reported. |

EXPLANATION OF STOPS

- s**—Regular stop.
- f**—Stop on signal for passengers, mail, baggage and express.
- a**—Stop to receive revenue passengers destined to points where train is scheduled to stop.
- d**—Stop to receive or discharge revenue passengers.
- k**—Stop to receive or discharge revenue passengers, mail or express.
- m**—Stop to discharge revenue passengers.
- w**—Stop to discharge revenue passengers or to receive five (5) or more revenue passengers destined Texas points or beyond.

EXPLANATION OF CHARACTERS

- W—Water.
 - Y—Wye.
 - T—Turntable.
 - §—Track Scales.
 - *—Mail Crane.
 - CS—Continuous Train Order Office.
 - LS—Limited Train Order Office (Hours of Service specified by Bulletin Order).
 - P—Telephone Communication only.
 - TP—Telegraph or telephone office not a train order office.
- Register stations are shown in full-faced type.

ATTENTION TRAIN AND ENGINE CREWS

Always keep in mind that the revenue passenger is the BUYER, and that it is your job to make every Buyer a satisfied customer. To that end, the following matters deserve your constant attention:

1. If an error or misstatement has been made somewhere along the route, put forth every effort to correct it. Nothing should be considered too trivial.

2. Ever be alert to the safety and comfort of your passengers, and freely give information and advice when requested. The aged, infirm and the young passenger traveling unaccompanied require special attention. Be helpful to them in every way possible, particularly in assisting them on and off trains, and occasionally inquire as to their comfort.

3. Protect both coach and sleeper passengers against undue noise or disturbance, particularly at night. Remember they pay to sleep.

4. The avoidance of arguments or friction with passengers is a test of your diplomacy. A calm and pleasant manner, regardless of the circumstances, is the best assurance of your success.

5. Keep posted on connecting line train service, arbitrary holds they have in effect for our trains, and advise passengers so as to avoid, as far as possible, any uneasiness on their part about missing connections, and when same is unavoidable, tell them what time the next connection is due to depart.

6. Cheerfully offer explanation of unusual delays and pass such information to other members of your crew — Brakeman, Porter, Pullman and Dining Car employes — so they too may advise passengers. Generally speaking, passengers will gladly accept a condition which they understand, but on the contrary are irritated when kept in ignorance.

7. Neatness of appearance and courtesy bespeak pride in your job, and create good-will for the railroad.

8. Being considerate of others is the key to popularity. This applies to the institution and individual alike. Many of your passengers may be riding a train for their first time. This is especially true of the younger generation. Kind and attentive treatment to make them feel at home creates additional passenger traffic.

9. Remember that people traveling on passes have a right to that privilege, and are entitled to the same courteous treatment as other passengers. A satisfied "free-transportation" passenger is always a booster.

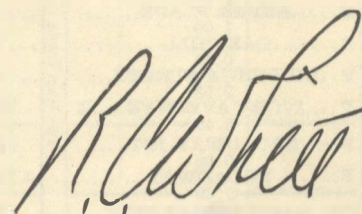

10. On crowded trains, Missouri Pacific employes riding on passes should, and will if properly approached, cheerfully cooperate in seeing that revenue passengers are given every possible consideration.

11. Train Porter should keep coaches clean and in tidy condition at all times. Toilets particularly, are the source of adverse comment. Inspect them frequently.

12. AVOID ROUGH HANDLING OF YOUR TRAIN. Missouri Pacific enginemen have an enviable reputation for smooth starting, running and stopping of their trains. Never lose sight of this feature, as passengers are more disposed to avoid the route that does not give them a smooth ride, than they are to exert the effort involved in registering complaints about it.

13. Of equal importance is SMOOTH HANDLING OF FREIGHT TRAINS. Rough handling results in damaged lading and delays due to damaged equipment, which creates dissatisfied customers.

14. On-time delivery of passengers and freight at destination is what the customers pay for and expect. Your best efforts, always within the zone of safety, should be extended to keep your trains on time or to regain time wherever necessary and possible.

Chief Operating Officer.

SPECIAL INSTRUCTIONS

1. All Eastward and Northward trains are superior to trains of the same class in the opposite direction, except:

**Creve Coeur Subdiv. No. 193 is superior to No. 194.
Carondelet Subdiv. No. 191 is superior to No. 198.**

2. MAXIMUM SPEED:

1.—Passenger trains, the consist of which is composed entirely of light weight, streamlined, low center of gravity cars, when hauled by Diesel engines 7000, 7001, 7002, 7003 or 7100, will be governed by the maximum speed limit as set forth in Paragraphs (A), (B) and (D), Section 2, Time-Table Special Instructions. Cars Classifying as light weight, streamlined, low center of gravity cars are as follows:

| | | | |
|-------------------|--------|-------------------|----------------|
| Storage Mail: | MP 700 | Dining: | MP 740 |
| | MP 701 | | MP 741 |
| | MP 702 | | MP 742 |
| Baggage-Express: | MP 703 | | MP 743 |
| | MP 704 | Parlor: | MP 750 |
| Comb. Mail-Bagg.: | MP 710 | | MP 751 |
| | MP 711 | Comb. Mail-Coach: | MP 760 |
| | MP 712 | Sleepers: | Gunnison River |
| | MP 713 | | Eagle River |
| Coaches: | MP 720 | | Colorado River |
| | MP 721 | | Arkansas River |
| | MP 722 | | R. I. 504 |
| | MP 723 | | R. I. 505 |
| | MP 730 | | R. I. 508 |
| | MP 731 | | R. I. 510 |
| | MP 732 | | R. I. 511 |
| | MP 733 | | R. I. 512 |
| | MP 734 | | |

2. MAXIMUM SPEED: (Continued)

2.—Passenger trains, the consist of which is composed of light weight, streamlined, low center of gravity cars and, in addition thereto, one or more streamlined, high center of gravity cars equipped with electro-pneumatic brakes, when hauled by Diesel engines 7000, 7001, 7002, 7003 or 7100, will be governed by the maximum speed limit as set forth in Paragraphs (A) and (D), Section 2, Time-Table Special Instructions. Streamlined, high center of gravity cars equipped with electro-pneumatic brakes are as follows:

| | | | |
|----------|---------|-----------|--------------|
| Coaches: | MP 6330 | Sleepers: | Shrine Tower |
| | MP 6332 | | Beacon Tower |
| | MP 6333 | | Temple Tower |
| | MP 6334 | | |

3.—Passenger trains, the consist of which contains any conventional type standard weight, high center of gravity cars, when hauled by Diesel engines 7000, 7001, 7002, 7003 or 7100, will be governed by the maximum speed limit as set forth in Paragraphs (C) and (D), Section 2, Time-Table Special Instructions.

| | Miles Per Hour | |
|--|----------------|----------------------------------|
| | Tangent | Curves Not Res- tricted |
| (A) Light-weight Streamlined-Low Center of Gravity passenger cars when hauled by Diesel Engines 7000 to 7003 and 7100. (Conductors and Enginemen must know that the train consist meets this requirement): | | |

Kirkwood Subdiv.:

| | | |
|---|----|----|
| Between Grand Ave. and Tower Grove Jct..... | 45 | 45 |
| Between Tower Grove Jct. and Kirkwood..... | 75 | 60 |

(B) On curves at which SPEED RESTRICTION SIGNS are maintained, Light-weight Streamlined-Low Center of Gravity passenger trains when hauled by Engines 7000 to 7003 and 7100, may exceed by FIVE MILES per hour the SPEED as indicated on the RESTRICTED SPEED SIGN.

(Special Instructions continued on page 9)

SPECIAL INSTRUCTIONS

2. MAXIMUM SPEED: (Continued)

(C) Diesel Engines 7000 to 7003 and 7100 hauling any Standard passenger cars will not exceed the maximum passenger speed shown in time-table on any Subdiv., and will not exceed the speed indicated on any RESTRICTED SPEED SIGN.

(D) Speed of these engines when operating over Joint Track or Foreign Lines with or without cars will be governed by the Maximum Speed and Speed Restrictions of that line.

| | Miles Per Hour | |

SPECIAL INSTRUCTIONS

| | <u>Miles Per Hour</u> | |
|---|-----------------------------|-------------------|
| | Passenger Trains | Freight Trains |
| SPEED RESTRICTIONS: (Continued) | | |
| Passenger trains handling freight cars must not exceed maximum speed of freight trains, except upon authority of Superintendent. | | |
| Motor Cars: | | |
| (a) Gas-electric passenger motor cars | 60 | .. |
| (b) Brill passenger motor cars with mechanical drive | 45 | .. |
| Trains handling: | | |
| Motor Cars dead in tow | 50 | 50 |
| Diesel Engines dead in tow | | |
| 800 Series | .. | 30 |
| 4100, 4101 and 9000-9001 Series | .. | 35 |
| 4102, 4103 and all other Diesel road engines | Maximum Permissible Speed | |
| Pile Drivers | .. | 25 |
| Steam Shovels | .. | 25 |
| Scale Test Cars (handle next to caboose) | Maximum Freight Train Speed | |
| Wrecking Cranes (Self-propelling) | .. | 25 |
| Bridge Derrick Cars (non-revolving) boom connected. .. | .. | 30 |
| Bridge derrick cars may be shipped with boom either connected or disconnected. If boom is connected, derrick car must be coupled to flat car and support provided for boom; boom must be chained or cabled to car stake irons with sufficient play to allow for not less than 3 inches or more than 6 inches lateral movement; uncoupling levers must be disconnected between derrick car and idler car; derrick cars may be handled in train with boom ahead or trailing as requested by messenger accompanying. | | |
| Bridge Derrick Cars (non-revolving), boom disconnected | Maximum Freight Train Speed | |
| Bridge derrick cars shipped with boom disconnected and permitted to move at maximum freight train speed must have boom disconnected at inboard connection on derrick car, boom falls and swing lines must be disconnected from boom and rear end of derrick car must be faced toward front of train. | | |
| Bridge Derrick-Pile Driver (combination machine) .. | .. | 25 |

| | <u>Miles Per Hour</u> | |
|---|-----------------------------|-------------------|
| | Passenger Trains | Freight Trains |
| SPEED RESTRICTIONS: (Continued) | | |
| Bridge derrick-pile driver (combination machine) may be shipped either as a derrick or as a pile driver. When shipped as a derrick, its movement shall be governed by the regulations applying to wrecking cranes. When shipped as a pile driver, its movement shall be governed by the regulations applying to pile drivers. | | |
| American Ditchers, self-propelling | .. | 20 |
| American ditchers, self-propelling, must be coupled to flat car and uncoupling levers between machine and flat car must be disconnected. Boom must be supported exclusively by its cables. Bucket must be raised to clear idler car approximately eight inches and shored firmly against boom through 4 inch by 6 inch timber with all slack taken out of hoist cable. Water tank and boiler should be drained and rear of machine must be faced toward front of train. | | |
| Locomotive Cranes or Clam Shells | .. | 20 |
| Locomotive cranes or clam shells must be coupled to flat car and uncoupling levers between machine and flat car must be disconnected. Boom must be disconnected from rotating portion of machine and supported entirely upon flat car. Cables need not be removed from boom, but must be left slack between machine and boom. Water tank and boiler should be drained and coal bunker should be emptied. The rear of machine must face toward front of train, except when machine is accompanied by tender for use on bridge construction work and reversal is necessary from junction point to job to place it in working position upon arrival at destination. Machines having flexible coupling in drive shaft to provide for long wheel base may be handled in train at speed of 25 miles per hour when this permissible speed is clearly stenciled upon side of cab. | | |
| American Ditchers, loaded on flat cars | .. | 20 |
| Yard (clam shell) and "Burro" Cranes, loaded on flat cars | .. | 20 |
| Jordan Spreaders and Spreader-Ditchers | .. | 25 |
| Jordan spreaders and spreader-ditchers must be headed in working direction; the plows, wings and braces must be secured in shipping position by the pins, bolts, chains, etc., provided for this purpose. | | |
| Rail Unloaders | Maximum Freight Train Speed | |
| Rail unloaders must have boom disconnected and stored on car. | | |
| (Special Instructions continued on page 11) | | |

SPECIAL INSTRUCTIONS

SPEED RESTRICTIONS: (Continued)

Where maximum speed of freight trains is restricted to 25 miles per hour, or less, trains handling wrecking cranes, pile drivers and Jordan ditchers or spreader-ditchers must be restricted to 5 miles per hour less than such maximum speed.

Diesel engines (road or switch) for movement dead in tow must have all switches opened; main fuse removed; reversing drums and main power contactors blocked; and must be in charge of messenger who shall be properly instructed in the correct method of servicing and protecting motor and journal bearings from overheating.

Dead engines with side rods in position, main rods disconnected, 35 miles per hour.

Dead engines moving backward or with part or all side rods down, 15 miles per hour.

Dead engines with all side rods and main rods in position, cylinder heads removed, bottom quarter of front cylinder openings blocked with board and oily waste placed in front end of cylinders, 40 miles per hour.

Dead engines for movement must be inspected and have side rods in position, but may in emergency be handled with a part or all of side rods down on authority of Superintendent.

Dead engines must be placed not less than three cars from engine handling train and from each other, and be headed in direction of movement, except in emergency in which case must be turned at first available point.

Engines running backward with or without cars will not exceed a speed of twenty-five miles per hour on Kirkwood and Lesperance St. Subdivisions, twenty miles per hour on Oak Hill and Carondelet Subdivisions and fifteen miles per hour on Creve Coeur Subdivision.

Engines not equipped with engine trucks, either dead in tow or under steam in road movement must be moved tender forward.

Engines without full set of driving wheels, trucks or trailers may be moved at speed not exceeding six miles per hour to first siding to clear main track. Further movement must be authorized by Superintendent.

Locomotive drivers will be blocked only in extreme emergency. When necessary to block front drivers, speed will be restricted to 20 miles per hour; no restriction when necessary to block other drivers.

SPEED RESTRICTIONS: (Continued)

Trains and engines must not exceed 10 miles per hour through No. 10 turnouts or crossovers, and 30 miles per hour through No. 20 turnouts or crossovers. Where such turnouts or crossovers are equipped with spring switches, the same restriction applies for trains or engines on straight track moving switch points, except that when lead wheels of train have passed over switch points normal speed may be resumed.

PERMANENT SPEED RESTRICTIONS, LOCATION OF TRACK AND PERMISSIBLE SPEED—EACH LOCATION PROTECTED BY PERMANENT SPEED RESTRICTIONS AND RESUME SPEED SIGNS.
