EXCEPTION TO RULE 21

Extra trains operating through Automatic Block Signal Systems to or from C.T.C. Limits between Graces and Black Creek, South Oakworth and Decatur Jet. and Brentwood and Nashville will not be required to display signals as provided for by Operating Department Rule No. 21.

EXCEPTION TO RULE 40(b)

A train finding a Conditional Stop Track sign properly displayed when such train does not hold an effective Form W Train Order requiring train to stop at that location as prescribed by Rule 40(b), must immediately stop, and after stopping, must make effort to contact either the train dispatcher or the maintenance foreman, or both, in an effort to determine whether there is or should be a Form W Train Order in effect. If unable to contact either the maintenance foreman or train dispatcher by radio, train may proceed at Restricted Speed to the first available telephone, where the engineer must advise the train dispatcher of the conditions and be governed by his instructions.

EXCEPTIONS TO RULE S-71

Superior Trains	Superior To	Requirements
No. 332	No. 357	Siglo to Franklin
No. 332	No. 337	Siglo to Columbia Wye
No. 354	No. 359	Siglo to Columbia Wye

Northward Nashville (via Columbia) Sub-division secondclass and inferior trains will call operator at "RA" office from automatic telephone located on outside of car checkers building south end of receiving yard, Radnor, and furnish operator register of their train, giving same information shown on register card, Form 230.

CLEARANCE OF TRAINS

Trains	Stations	Requirements
All southward trains	Vine Hill	Clearance Form A
Northward First class trains	S&N Yard	Clearance Form A
All trains	Mt. Pleasant	Clearance Form A during hours train- order office is open
All trains	. Storage Yard	Clearance Form A
All trains	Blue Creek Jet	Clearance Form A during hours train- order office is open

Conductors on first-class trains departing Nashville will receive two sets of orders at Vine Hill and departing Montgomery will receive two sets of orders at S&N Yard and before departing Birmingham will deliver one set of orders to outbound engineer.

Seaboard Coast Line northward trains using L&N tracks between South Parkwood and Boyles are required to obtain

L&N Train Orders and/or Clearance Form A before departure from Manchester, Ga.

Seaboard Coast Line train No. 509 must secure SCL Train Orders and/or SCL Clearance Form A at Train Order Office, Boyles, governing movement over SCL trackage south of Elyton yards. Movements of SCL trains Nos. 508 and 509 between Elyton yards and Boyles will be made on authority of L&N Yardmaster or his representative.

Northward first-class trains originating at Montgomery may leave without Clearance Form A, but must receive Clearance Form A at S&N Yard.

No. 347 departing Boyles to Gantt's Jct. via SCL trackage at Parkwood is required to obtain SCL train orders and/or SCL Clearance Form A at Train Order Office, Boyles, governing movement over SCL trackage, and on arrival at Talladega will proceed as No. 347 without Clearance Form A.

Trains before departing Storage Yard to Junta, Ga. (Cartersville), via SCL at Wellington, Ala. must obtain SCL Clearance Form A and/or train orders governing movement over SCL trackage.

Trains before departing Junta, Ga. must obtain SCL Clearance Form A and/or train orders governing movement over SCL trackage westward and, in addition, must obtain L&N Clearance Form A and/or train orders for movement over L&N trackage from Wellington.

No. 348 departing Gantt's Jct. to Boyles via SCL trackage at Talladega is required to obtain SCL Train orders and/or SCL Clearance Form A at Train Order Office, Sylacauga governing movement over SCL trackage, and on arrival at Parkwood will proceed as No. 348 without Clearance Form A.

USP&F northward trains must obtain L&N Clearance Form A and L&N train orders at Boyles before occupying L&N tracks and all USP&F southward trains will notify the Operator at Boyles by telephone time cleared Humoro and loads, empties and tonnage handled.

Trains filling schedules shown below will proceed on schedule indicated without Clearance Form A, except when trainorder office open.

Schedule Arriving	Af Station	Proceed As
No. 350	Siglo	No. 353
No. 333	Siglo	No. 332
No. 359	Siglo	No. 358
No. 357		
No. 346	. Vulcan	No. 349
No. 360	. Guntersville	No. 369
No. 339	Albertville	
	. Birmingham	
	Wellington	

No. 339 will depart Guntersville and proceed on schedule without Clearance Form A.

Trains originating Tuscaloosa may leave without Clearance Form A but must receive Clearance Form A at Holt Junction.

DRAWBRIDGES

Location	Mile	Protection
‡Tennessee River (Decatur)	306	Interlocking signals Attendant
‡Tennessee River (Florence)	A313	Interlocking signals Attendant
Alabama River (Jackson's Lake)	484	(Emergency) Unattended
Coosa River (Gadsden)		(Emergency) Unattended

‡Southern Ry. Property.

Engines heavier than 198,000 lbs. are not permitted on, and no engines may be double headed over any portion of Tennessee River bridge, Florence.

There is no drawtender at Alabama River Bridge, Jackson's Lake or at Coosa River Bridge, Gadsden. When it is necessary to turn the draw it will be handled by employees of the Maintenance of Way Department, and before opening the draw they will display restricted signals at the proper distance and STOP signals at each end of the bridge, and will not remove these signals until the drawbridge is locked in position for trains to pass.

Absolute block signals are located 6943 feet north and 4749 feet south of the Alabama River Bridge, A train, finding these signals in STOP position, must ascertain if the draw is in proper position before attempting to pass over same.

SPECIAL INSTRUCTIONS — Continued RAILROAD CROSSINGS AT GRADE — Continued

If signal displays Stop for through movement, Rule 672 applies. Use middle control —6-minute time release. For return movement (when part of train has been left on opposite approach) use top control which should cause signal to display an indication Proceed at Restricted Speed. For a reverse movement (when former approach has not been left occupied) the bottom control box should be opened. This will expose two slots to facilitate an L&N switch key. If the train is to move north, the key should be inserted in the "N" slot and turned. For south movement use "S" slot. This will cause the signal to display a Proceed indication.

The normal position of the crossing gate is against movement on L & N track. Gate is equipped with electric lock. Gate must not be moved until L & N crew has followed following operating procedure.

1. When green light is illuminated in box, L&N crew may remove the padlock, gate should unlock, and gate then be moved to obstruct CofGa. track. After gate is positioned and locked against CofGa. track L&N movement may proceed across railroad crossing.

2. If the red light is illuminated on the indicator box, or if the indication lights are not burning, the following steps must be taken by L&N crew.

(1) Contact CofGa, operator to obtain permission to operate time release and authority for movement across the crossing.

(2) After permission is granted crew will remove padlock and press the push button. This will set stop signals against CofGa. trains.

(3) After time runs out, lock will indicate unlock and crew may then position gate against CofGa. Restore padlock to lock gate in reverse position.

(4) Following L&N movement, L&N crew must return gate to its normal position and lock gate in this position.

When signal is in Stop position the time release case marked L&N will be opened. If light is illuminated it indicates that a conflicting signal on Southern track is at Stop and L&N push button should be operated, after time interval of six (6) minutes, L&N signal should clear.

If light is not illuminated, it indicates that a conflicting signal on the Southern is clear, and after waiting three (3) minutes and no movement on Southern track is evident, the I &N push button should be operated and after time interval of six (6) minutes, L&N signal should clear.

If after time interval of six (6) minutes, L&N signal does not clear Rules 552, 552(a) and 672 will apply.

EXCEPTION TO RULE 99

Unless otherwise directed by train order the following trains will not protect against following extra trains between points shown:

Nos. 363 and 342 between Gadsden and Wellington Nos. 348 and 347 between Talladega and Gantt's Jct. Nos. 331 and 330 between Columbia and Athens Jct. Nos. 369 and 360 between Guntersville and Moragne Nos. 339 and 338 between Guntersville and Albertville

Under these instructions, extra trains must not follow regular trains named between points specified, except under protection, until they are informed by train order that the regular train is protecting against their movement, or that such regular train is outside of the restricted territory.

EXCEPTION TO RULE 104 (a)

The switches at the South Leg of Wye, Guntersville; L&N main track to Chinneby Spur, Talladega; Blue Creek Jct.; Swan Creek Jct., Mt. Pleasant; south switch No. 1 track and north and south switches of Long Siding, Florence; McIntyre switch at north end of Monsanto main track, Century Branch, will be left as last used.

RULE 104 (b) IS CHANGED TO READ AS FOLLOWS:

A train must not foul a main track until switches connected with the movement are properly set, or in the case of Spring or Automatic Switches, the normal route is seen to be clear.

A train must not foul other tracks until the normal route is seen to be clear.

Switches used must not be restored to normal position until movement is completed or clear of the main track involved.

When waiting to cross from one track to another and during the approach and passage of a train on the track or tracks involved, all switches connected with the movement must be in normal position.

EXCEPTION TO RULE 104 (d). DERAILS ON INDUSTRIAL SPURS AND BRANCHES

Train orders will not be required for operation on the following branches and industrial spurs:

Location	Name of Branch or Spur
Elmore	Wetumpka Branch
Holt Jet	Holt Branch
Palmers	Self Creek Branch
Mattawana	Graystone Branch
Gantt's Jct	Gantt's Jct. and Mile AM-444.9
Shelby	Columbiana Branch
Calera	
Chetopa	Banner Branch
Trafford	Temple Branch
Monmouth	Warrior Branch
Vulcan	
Chinn	Black Diamond
Armour Jet	
Boyles	Gate City Branch
Lewisburg	

The following exceptions to the requirements of Rule 104(d) are made:

Derails located at main line junction points of branches, listed above, will be kept set in normal position at all times, except when the branches are occupied by trains. When derails

are in normal position (set to derail) it will indicate that no train is on the branch and that movements may be made to the branch.

When the derail is set and locked off of the track, it will indicate that a train is occupying such branch and no other train movement may be made unless protected in accordance with Rule No. 99.

Movements over other Branches not shown on Time Table or Special Instructions may be made, but must be protected by leaving Flagman at Junction Point.

SPRING SWITCHES

HOT BOX DETECTOR SYSTEM

Between Brentwood and S&N Yard, via Lewisburg;

Hot Box Indicators	Approach Indicators	Direction
Chapel Hill (Mile BA 229.2) South Lewisburg Signal 3402 South Hanceville Speigener (Mile 472.4) Strasburg (Mile 442.1) Longview (Mile 418.5) Bangor (Mile 357.7)	Signal 2422 Signal 3432 North Hanceville	Bi-directional Northward Northward Southward Bi-directional Bi-directional Bi-directional

A rotating beacon light, located on mast extended above bungalow at hot box detector, Wesoda, Alabama, located 950 feet south of Mile Post 346, will be illuminated when overheated journal is detected on passing train.

When illuminated, crews must carefully inspect train during travel between this location and Hot Box Indicator and, if hot journal observed, train must stop immediately for further inspection.

If the beacon light is illuminated as train passes, and Approach Indicator (flashing white light) or Hot Box "(Hot Box)" Indicator are not functioning, train must stop at Hot Box Indicator for inspection of entire train, before proceeding.

Normal speed for piggyback trains operating between Nashville and Montgomery when train consists of piggyback and auto cars only is sixty (60) miles per hour. If other equipment is in consist normal speed for freight trains must be observed. On track where speed is reduced to less than normal speed due to curves or other conditions, the speed applicable to freight trains must be observed by the piggyback trains.

Trains picking up cars on line of road that have previously been set out account hot box and repaired will not exceed five (5) miles per hour for a distance of five (5) miles from the point where car is picked up. Cars picked up must be placed in train either near the engine or caboose where it can be readily seen by members of the crews, and a close watch must be maintained so that appropriate action can be taken in the event the journal again becomes overheated.

Trains handling units of welded rail must not exceed forty (40) miles per hour, and must be handled near the head end of the train, in no case more than ten cars from the pulling locomotives.

Solid trains of loaded open top hopper cars, or other trains having 25 or more loaded open top hopper cars in consist, must not exceed forty (40) miles per hour. In territory where maximum speed of freight trains is less than forty (40) miles per hour, the lower speed must be observed. These instructions do not apply to loaded chip wood cars in Series 31000 and 32054.

It will be the responsibility of the conductor to notify the engineer of train when consist of train makes these instructions applicable.

Trains must not exceed five (5) miles per hour on side track at Gaird, Ala.

Trains must not exceed thirty (30) miles per hour approaching the northward distant signal at Brentwood, Tennessee on the N&D.

Trains must not exceed ten (10) miles per hour over the north leg of the wye at Siglo, Tennessee.

Trains must not exceed five (5) miles per hour from Pump track switch to middle crossover, Monsanto main track.

AUTOMATIC BLOCK SIGNAL SYSTEM LIMITS

Automatic Block Signal System rules (Rules 505 through 515, inclusive) are effective between:

Nashville and Brentwood, except interlocking. Decatur and South Oakworth, except interlocking. Black Creek and South Alice, except interlocking.

Graces to South Alice on Northward Main Track, except interlocking.

Moragne and Attalla, except interlocking.

Rules D-251, D-252, D-253 and D-254 are effective between:

Nashville and Brentwood, except interlocking.

Decatur and South Oakworth, except interlocking.

AX Tower and South Alice on Southward Main Track, except interlocking.

Graces and AX Tower Northward Main Track, except interlocking.

S&N Yard and Montgomery, except interlocking.

CENTRALIZED TRAFFIC CONTROL SYSTEM LIMITS

Centralized Traffic Control System rules (Rules 550 through 575, inclusive) are effective between:

Brentwood and Decatur Jct., via Lewisburg, except interlocking.

South Oakworth and Black Creek, except interlocking.

Graces and S&N Yard, except interlocking.

South Alice to Graces on Southward Main Track, except interlocking.

A train entering main track through switch equipped with electric lock on "unlocked" indication, as prescribed by Rule 558 of Rules of the Operating Department, must proceed at Restricted Speed to the next block signal displaying an indication permitting the train to proceed at a speed more favorable than Restricted Speed.

Where Normal Speed is more than twenty (20) miles per hour, trains must not clear main track at hand operated switches to meet or be passed by another train, except where such hand operated switch is equipped with electric lock. Trains using hand operated switch not equipped with electric lock must leave main track occupied by engine or cars, or main track switch

INTERLOCKING

Interlocking Rules are effective:

- (E) BIRMINGHAM DIVISION: Calera to Avery, Anniston to Talladega, Gantt's Junction to Talladega Springs and Shelby to Columbiana. Cars of 210,000 pounds gross weight may be handled if preceded by 1 car and followed by 1 car, each not exceeding 100,000 pounds gross weight.
- (F) BIRMINGHAM DIVISION: Florence to Sheffield. Cars of 170,000 pounds gross weight may be handled if preceded by 1

car and followed by 1 car, each not exceeding 100,000 pounds gross weight or cars of 200,000 pounds gross weight having truck centers not less than 25'3" if preceded by 1 car and followed by 1 car, each not exceeding 46,000 pounds gross weight.

All weights given above are for 4 AXLE FREIGHT CARS. two or more coupled together. Gross weight is the maximum gross weight of car and lading.

Weights of 177,000 pounds and under apply to cars 32 feet long in train.

Weights in excess of 177,000 pounds up to and including 224,000 pounds, apply to cars 42 feet long in train.

Weights over 224,000 pounds apply to cars 47'6" long in train. These cars shall have a minimum length over strikers of 45 feet with minimum distance of 5 feet no inches from truck center to striker and minimum axle spacing in trucks of 5 feet 8 inches.

Cars shorter than 47 feet 6 inches, 42 feet or 32 feet reduce the respective allowed gross weights in proportion to the length. When it is necessary to run heavier cars than shown above over a portion of this division, authority must be obtained from the Chief Dispatcher.

EXCEPTIONS

MCPX 23000 thru 23036 6-axle tank cars having a loaded gross weight of 394,500 pounds between Monsanto, Siglo, Tennessee, Branch and connections at Louisville, Cincinnati, and St. Louis. Between these points each six-axle tank car must be placed between two light cars with gross weight of not more than 70,000 pounds each. Speed restrictions: 20 miles per hour Monsanto to Columbia Wye, and 30 miles per hour Columbia Wye to Brentwood.

CITY ORDINANCES, AND REGULATIONS. OTHER THAN MAXIMUM SPEED OF TRAINS

Name of City	Requirements		
Birmingham	Whistle must not be blown within corporate limits, except as a necessary signal of danger.		
Anniston	Prohibits blowing of whistle or ringing of bell more than six times in any one day, except when necessary to give proper signals.		

Attention is called to Tennessee State Law, Section 2628 of the Code, reading in part as follows:

"Subsection 3. On approaching a city or town, the bell or whistle shall be sounded when the train is at a distance of one mile, and at short intervals till it reaches its depot or station; and on leaving a town or city, the bell or whistle shall be sounded when the train starts, and at intervals till it has left the corporate limits.

"Subsection 4. Every railroad company shall keep the engineer, fireman, or some other person upon the locomotive, always upon the lookout ahead; and when any person, animal or other obstruction appears upon the road the alarm whistle shall be sounded, the brakes put down, and every possible means employed to stop the train and prevent an accident."

Subsection 3 above is applicable at the following incor-

porated towns: Nashville Columbia Chapel Hill Lawrenceburg Franklin Lynnville Lewisburg Loretto St. Joseph Spring Hill Pulaski Cornersville Mt. Pleasant Iron City

Title 48, Sections 170-171 of the Code of Alabama reads in part as follows:

"Enginemen on locomotives must blow the whistle or ring the bell at least one quarter of mile before reaching any public road crossing or any regular station or stopping place on such railroad and continue to blow the whistle or ring the bell at short intervals until it has passed such crossing or reached such station or stopping place. He must also blow the whistle or ring the bell immediately before and at the time of leaving such station or stopping place, and also immediately before entering any curve crossed by a public road crossing where he cannot see one quarter of a mile ahead. He must also blow whistle or ring the bell at short intervals on entering into or while moving within or passing through any village, town, or city."

Trains and engines must protect movements over street and highway crossings as follows:

Carters Creek Pike (Battlefield Branch). Jackson Highway (Battlefield Branch).

Huntsville Road, Florence.

Atlanta and Montgomery Avenues, Sheffield.

Belt Line, Decatur-Oakworth.

Bee Line Highway, West Cullman. Vanderbilt Road, Tallapoosa Street (Gate City Branch).

1st Avenue, North, Woodlawn (Gate City Branch).
1st Avenue, South, Wodlawn (Gate City Branch).

Madrid Ave., Gate City Branch. 24th and 27th Streets, North Birmingham.

5th Avenue, Bessemer.

Highway 150, Reader's Gap Branch, Mile LP 405.

Greensboro Avenue, Tuscaloosa.

Montgomery Highway, Longview No. 2; Freight House

Lead, Calera; Hill Track and Fruit Growers Spur, Thorsby; and Rocket Spur, Lomax.

Broadway Street, Main Street, Norton Ave., and Third Street, Sylacauga.

Broad Street, Gadsden.

Birmingham Highway (Self Creek and Graystone Branches).

Pole Cat Road crossing, Guntersville. Highways 50, and 31-A and by-pass and industrial road, Lewisburg-Belfast spur.

Southward trains on the Cain Creek Branch must approach road crossing at grade at Stouts Road under control, and in the event this crossing is occupied by vehicular traffic, must be prepared to stop short of such obstruction.

CITY ORDINANCES, MAXIMUM SPEED OF TRAINS

Name of City	Requirements
Athens Franklin Columbia Lynnville	25 miles per hour. 10 miles per hour passing passenger station. 6 miles per hour over Galloway Street. (25 miles per hour northward (4:00 a.m. to
Pulaski Lawrenceburg Sheffield Florence	15 miles per hour southward 9:00 p.m. 15 miles per hour. 10 miles per hour. 25 miles per hour. 20 miles per hour Rickwood Road crossing.

CITY ORDINANCES MAXIMUM SPEED OF TRAINS — Continued

Name of City	Requirements
Hartselle	40 miles per hour, street crossings north and south of passenger station.
Cullman	20 miles per hour over 9th Street. 30 miles per hour, all other crossings.
Birmingham	15 miles per hour, Vanderbilt Road.
Helena	50 miles per hour, street or road crossings.
Calera	40 miles per hour, street or road crossings
Columbiana	15 miles per hour.
Thorsby	30 miles per hour, Franklin, Concordia,
-	Jones and Dakota Streets.
Clanton	20 miles per hour over Second Street.
Bessemer	6 miles per hour, Third, Fifth, and Eighth Avenues.
Acipco	10 miles per hour, street crossings.
Tarrant	10 miles per hour, street or road crossings.
Oneonta	8 miles per hour, street or road crossings.
Talladega	15 miles per hour, street or road crossings.
Sylacauga	10 miles per hour, street or road crossings.
Boaz	10 miles per hour, Main and Mann Streets.

MISCELLANEOUS SPECIAL INSTRUCTIONS

Trains between Parkwood and Talladega, between Wellington and Cartersville will be governed by rules, time-table and instructions of the Seaboard Coastline Railroad.

Trains between Decatur and Decatur Jct., between Furnace Jct. and Sheffield Jct., will be governed by the rules and instructions of the Southern Railway System.

Maintenance of Way boarding cars and work equipment must be restricted to movement in local freight service only, next to caboose, unless otherwise instructed.

Northward freight trains moving between Longview and Hardy (via Alabaster) will stop short of the main road crossing in Alabaster, unless instructed to the contrary by radio or otherwise, and call the dispatcher at Birmingham for instructions before blocking crossings at Alabaster.

COLUMBIA YARD

The main track switch at Columbia Wye to the NF&S Branch will be left normal for movement to the NF&S Branch. Trains operating on the main track must stop and line this switch for through movements on the main track, and restore switch to normal position after use.

Trains to and from the north, enroute to and from the NF&S Branch will use the North leg of Wye as NF&S main track.

Northward trains must handle cars in excess of 65 feet in length on rear of train around NF&S Branch to N&D leg of Wye, Columbia Wye and must not exceed 8,100 tons per train.

OAKWORTH-DECATUR

Main tracks will not be used by yard engines between Decatur and South Oakworth except on authority of Train Dispatcher, Birmingham. When such authority is granted for use of main track, Rule 513 will not apply.

Northward trains with consist of 65 or more cars must not pass Automatic Block Signal No. 3082, located at Second Street, Decatur, except when signal displays a "Clear" indication. If this block signal does not display "Clear" indication, call op-

erator at Decatur or Oakworth for instructions.

All trains will move at Restricted Speed between Decatur Jct. and Decatur.

When southward first-class trains are standing at passenger station Decatur, Alabama, northward freight trains must stop clear of street crossing just south of passenger depot until the first-class trains depart.

Account short approach circuits of grade crossing protection at Decatur-Oakworth, trains running against current of traffic between Oakworth and Decatur must not exceed a speed of fifteen (15) miles per hour.

STORAGE YARD MORAGNE

All tracks between L&N Jct. and Southern crossing south end of Storage Yard are designated as yard tracks. Trains clearing or meeting between these points will use tracks designated by the Yardmaster or his representative.

Trains between Moragne and L&N Junction will be governed by the following rules and instructions:

- 1. Within the limits of this Automatic Block Signal System, trains will be governed by block signals whose indications supersede the superiority of trains.
- 2. Northward trains will not foul end of Double Track at L&N Jct., unless "Approach" indication is displayed by Attalla Interlocking Signal.
- 3. If signal at Attalla or Moragne indicates "Stop" for more than ten (10) minutes, train may proceed through the block at Restricted Speed, preceded by proper flag protection.
- 4. While within this block main track must be occupied continuously or the main track switch left open.

Account inoperative distant signal located 397 feet north of Mile Post 117 between Attalla and Storage Yard for the Attalla Interlocking Plant, and distant signal located 537 feet south of Mile Post 114 on the Guntersville Branch for the Absolute Block Signal at Moragne, trains must not exceed a speed of twenty (20) miles per hour between these points. Where such speed restriction is further reduced by track speed signs or other causes, such additional speed restrictions must be observed.

TALLADEGA

L&N trains moving from L&N to SCL Railroad at Talladega en route Boyles will cut engines off from train after stopping train short of road crossings on Chinneby Spur, and run engines to telephone near switch to north leg of wye in order to contact SCL train dispatcher. Permission should be obtained from the SCL dispatcher to open SCL main track switch, and leave open while engines return for train. This procedure should be followed to avoid blocking street crossings and stopping train on heavy grade.

LOCOMOTIVE RESTRICTIONS

Locomotives will not clear loading tipples at Bradford, Monaco, Wilco, Dallas, Battlefield, Kleeco, Bufford, Darks Mill, Wye at Mt. Pleasant, loading chute at Verlie Lime Plant, TVA tipple and tipple at Monsanto Plant on Battlefield Branch, tracks inside Monsanto Company plant north of old Granulated Slag Plant or south of No. 2 Washer Plant, loading ramps at Talladega Cotton Factory's Wehadkee and North Street plants, Talladega, Ala.

Engines in series 1200, 1400, 1500 and 1700 must not be used on industrial tracks or branch lines unless such movement is authorized by the Chief Dispatcher's office.

Locomotives 301 thru 304 are U-33 GE locomotives, rated 3600 H.P. These units cannot make trailing movements through

MISCELLANEOUS SPECIAL INSTRUCTIONS — Continued

spring switches or automatic switches without first having these switches aligned by hand for these trailing movements.

TUNNEL RESTRICTIONS

Laney Tunnel (Mile LE-529) will clear cars and lading not exceeding the following dimensions:

Extreme Height Above Top of Rail	Extreme Width at this Height
16′ 0″ 15′ 9″	7′ 4″ 8′ 0″
15′ 6″	8′ 8″
15′ 3″ 15′ 0″	9′ 4″ 10′ 0″
14′ 8″ 14′ 6″	10′ 2″ 10′ 7″
14' 0"	11' 0"

In addition, 12 ft. 6 in. high van type trailers not exceeding 8 ft. wide loaded on flat cars with car floor heights not exceeding 3 ft. 6 in. ATR creating the following loaded dimensions 16 ft. 0 in. ATR 8 ft. 0 in. wide uniform to car floor are approved for movement through Laney Tunnel.

Conductors before handling equipment through this tunnel must see that the above dimensions are not exceeded unless authorized by the Chief Dispatcher.

Lester Tunnel (Mile 275) N&D Sub-division, will clear cars and lading not exceeding the following dimensions:

Extreme Height Above Top of Rail	Extreme Width at this Height	
16′ 3″	6′ 0″	
16′ 0″	6′ 6″	
15′ 9″	7′ 1″	
15′ 6″	7′ 9″	
15′ 3″	8′ 4″	
15′ 0″	9' 0"	
14' 6"	10′ 4″	
14' 0"	10′ 8″	
13' 6"	10′ 8″	
13'	10′ 8″	
12' 6"	10′ 8″	
12'	10′ 8″	
11′ 6″	10′ 8″	
11,	10′ 8″	
10′ 6″	10′ 8″	
10'	11'	
5'	11′	
4' 6"	11,	
4'	11′	
3′ 6″		
3 D	11'	
3′	11′	
2′ 6″	11'	
2'	11'	

These dimensions are based on cars 54 feet or shorter in length.

In addition, the following cannot be handled:

1. Cars longer than 54 feet.

2. Cars stencilled "Plate C".
3. Cars stencilled "Exceeding Plate C".

4. Cars weighing more than 251,000 lbs.

Conductors before handling equipment through this tunnel must see that the above dimensions are not exceeded unless authorized by the Chief Dispatcher.

Engines and cars must not exceed 10 miles per hour on Front Street lead and other tracks in Front Street District.

Engines and cars must not exceed 10 miles per hour on tracks in Departure (C) Yard, Radnor.

SPECIAL MOVEMENTS

1. When signals governing movements on Cumberland River bridge (Radnor Cut-off) are found indicating STOP, operator, RA Office, will be called promptly from block telephone located near signal, who will arrange for signal main-

tainer to go to that point to correct trouble and move trains across the bridge.

2. The movement of trains against the current of traffic between interlocking listed below will be made only on written instructions from the Superintendent of the Nashville Terminal or his representative:

Maplewood and CR Drawbridge, except movements from the south end of East Nashville yard to CR Drawbridge on the northward main track may be made with permission from the operator at CR Drawbridge, who will protect such movements.

Maplewood and Radnor (Radnor cut-off)

3. The movement of trains against the current of traffic between CR Drawbridge, and Church Street, South End and Oak Street, will be made on signal indication and such movements protected by Interlocking Operators.

4. Movements from Louisville end Eighth Avenue Wye to absolute Signal at north end of double track, Cumberland River Drawbridge, will be made on verbal authority of Operator, Cumberland River Drawbridge.

5. All movements against the current of traffic and diverted movements from the normal route on main tracks within Nashville Terminal operating limits will be made at restricted speed except between Oak Street and Brentwood.

6. Movements from the Maplewood Wye to the southward main on the Radnor Cut-off will not be made until permission is obtained from the operator at Amqui. Before using the hand-throw crossover located just south of Maplewood Wye and between the north- and southward mains on Radnor Cut-off, permission will be obtained from the operator at Amqui.

Movements from the Maplewood Wye to the northward passenger main will not be made until permission is obtained from

the operator at Cumberland River Drawbridge.

Before using the hand-throw crossover located just south of Maplewood Wye, and between the north- and southward passenger mains, permission will be obtained from the operator at Amqui, in addition to the operator at Cumberland River Drawbridge.

- 7. In the event means of communication fail, Rule 99 to be complied with.
- 8. All switches of pocket tracks in Receiving Yard, Radnor, must be restored to normal position immediately after movements over them are completed.
- 9. Trains move on left-hand main track between Cumberland River Bridge (Radnor Cut-Off) and Radnor.
- 10. Dwarf colorlight information signals located on West Nashville lead, alongside "New Yard" or Location 517 track No. 1 at north and south end of this track are information indicators only, their purpose to let crews know there are no conflicting movements between these lights.

The use of the above information light does not in any way

affect the application of Rule No. 93 through this area.

11. The following procedure will govern transfer cuts moving over A-2 Line from Radnor to Nashville when setting off in South Nashville Yard:

Cars not to be set-off in South Nashville will be left south of the Lebanon Branch turnout from Atlanta Division northward main track. After completing set-off in South Nashville the return movement to rear portion of cut may be made on Atlanta Division northward main track on permission of Operator, South End Tower, to pass dwarf signal, located just east of Continental Grain Company, while displaying a stop indication, as this signal cannot be cleared for this southward movement on northward main track while cars are standing on northward main track south of the Lebanon Branch turnout.

MISCELLANEOUS SPECIAL INSTRUCTIONS — Continued

BIRMINGHAM-BOYLES TERMINALS

Circuits operating crossing gates at Vanderbilt Road Crossing must not be fouled unnecessarily.

All trains moving against the current of traffic and out of the yard Mary Lee over Vanderbilt Road will allow the gates to come down before proceeding over the crossing.

SCL trains must receive proper instructions from Yard-master or his representative before departing Boyles.

All trains must approach crossovers at north and south ends of Birmingham passenger station at Yard Speed and stop before fouling crossover, unless the switches are in proper position and the crossover not in use. Rule 513 does not apply at these points.

When it is necessary for hand-throw switches in the vicinity of Birmingham passenger station to be operated and lined for passenger train movements into the station, these line ups must not be made until an approaching southward train has entered the 24th Street interlocking limits and/or an approaching northward train is north of 13th Street interlocking.

Southward trains will not pass passenger station Birmingham when there are southward passenger trains standing in the passenger station except when authorized by the Yardmaster or his representative.

Trains to enter single track at Black Creek or AX Tower will be governed by Rule 506, and, in addition, the indications of interlocking signals governing southward movements at Black Creek and of interlocking signals governing northward movements at AX Tower will supersede the superiority of trains for both opposing and following movements, but do not dispense with the use or the observance of other signals and of train orders whenever and wherever they may be required.

Interlockings at Black Creek, AX Tower and FY Tower are controlled by Operator at Boyles. Trains must not occupy the main track at hand operated switches between Black Creek and FY Tower without permission of this Operator who will protect the movement, or, if means of communication fail, when protected as prescribed by Rule 99.

Rule 513 does not apply between Black Creek and FY Tower.

ENGINE WHISTLE SIGNALS CALLING FOR ROUTES: 13th STREET INTERLOCKING PLANT, BIRMINGHAM—

Southward:

To No. 1 Alice Track To No. 2 Alice Track	1 short sound.
To South Alice set-out track To S.C.L. and B.S. connections To Main Track	sound 2 short sounds. 3 short sounds.
n+To	

Northward:

rthward:	
To 18th St. Yard	2 short sounds.
To Passenger lead	3 short sounds.
To Main Track	4 short sounds.
In reverse movement from one main track	
to the other main track in either direction	5 short sounds.

On movements to the Joint Terminal at East Thomas, Alabama, the following street crossings have been designated by Birmingham City Code (Sec. 34-193) as through streets and must be flagged from a ground position using a red flag by day and a red light by night because these crossings do not have Automatic Warning Devices.

All crossings along Ninth Avenue North from 15th to 28th Streets inclusive.

24th, 25th, and 26th Streets North on 23rd Avenue North, outbound main track from the Joint Terminal.

24th, 25th, and 26th Streets North on 24th Avenue North, inbound main track to the Joint Terminal, East Thomas, Alabama.

27th Avenue Crossing just south of Vinita on movements to and from Frisco.

MONTGOMERY TERMINAL

Between S&N Yard and ICG Interlocking, all trains must move at "Yard Speed" regardless of an "Approach" or "Proceed" indication of a block signal. Rule 513 does not apply within this territory.

Crews of passenger trains moving into or out of Union Station will be responsible for handling all switches connected with their movement. Inbound passenger trains will contact the yardmaster as to station track to be used.

First Class trains will not exceed a speed of 40 miles per hour on the main tracks between the Yard Board north end of the Montgomery Yard and Montgomery Union Station.

SPEED TABLE

This table is for information in determining speed per mile and in no way affects rules or instructions governing speed of trains.
