Freight trains and mixed trains will be notified of following extras by the Train Dispatcher, who will issue train orders to all concerned, as follows:

"C. & E..... after (time) protect against Extra....." Preceding trains receiving this order will, after the specified time while occupying the main track at stations, protect according to Rule 99.

In the absence of this order, freight trains and mixed trains may occupy the main track between STATION SIGNS protecting against schedule trains only, and following extra trains must approach all stations prepared to stop at the STATION SIGN, and thereafter proceed as the way is seen or known to be clear.

15. Schedule time and train order restrictions apply at crossover switch just east of station at Lackland, MP 12-23 Subdiv. 34 for westward trains.

15a. Schedule time and train order restrictions apply at crossover switch just West of Station at Belle MP 105.19, Sub-division 34 for Eastward trains.

15b. Union Pacific R. R. Jct. is located at MP 13.5 (Troy). The Jct. switch will be left lined for CRI&P main track. Telegraphers at Troy during hours on duty are authorized to handle switches for UP trains.

16. All train movements between Lackland and Rock Island Jct. will be under the supervision and authority of TRRA train dispatchers, and be governed by TRRA rules. This authority supercedes time table schedules.

16a. Between Leads Junction and Kansas City Belt Junction Subdiv. 35, trains will be governed by SL-SF—KCT Time Table.

16b. Trains between Air Line Jct. and KCS Jct. will be governed by KCS rules and between KCS Jct. and Kansas City, Mo. Union Station will be governed by Kansas City Terminal Ry. Co. rules.

16e. Trains between CRI&P Jct. and West Abilene, and between East Salina and A. B. Jct. Subdiv. 36B, will be governed by time table and rules of the AT&SF Ry.

16f. AT&SF trains use Subdivision 40-A main track between Dodge City and AT&SF Junction Switch, MP 373.7. All trains and engines approaching Junction or using any part of this Joint Track will move at restricted speed.

17. Subdivision 7 between Sanford and Canadian River has a maximum grade of 3.6% and between Canadian River and Oil City 2.5%. Eastward trains must stop at Sanford and westward trains at Oil City and make standing air brake tests as provided in form MP 141 Rule 29. Trains must not leave Sanford or Oil City to descend to Canadian River unless 85% of all air brakes are operative, retainers turned in accordance with Rule 52 of MP 141, locomotive supplied with sand and sufficient number of hand brakes applied to insure safety. Cars must not be shoved down these descending grades unless a sufficient number of hand brakes have been set to control the movement of every car. After descending maximum grades—stop—turn down retainers—carefully inspect wheels and brake rigging.

Should trains stall in ascending grades to Sanford or Oil City they are prohibited from backing down to make a run for the hill.

Westward trains leave rear portion of train between switches, Antelope, when possible and line west switch for siding while doubling to Sanford but whenever rear of train does not clear east end of Antelope siding, set derail on west end Antelope siding in derailing position—in addition to lining west switch for siding. Normal position of Antelope derail is open and locked when not in use as provided above.

18. Topeka interlocking extends from Topeka Jct. and S. J. Jct. over Kaw River Bridge to west end of plant on two main tracks.

18a. For eastward trains at S. J. Jct, the top light on the home interlocking signal governs route to Kansas City. Lower light governs route to St. Joseph Line.
