## SPECIAL INSTRUCTIONS: ALL POINTS

Current timetable and special instructions of the Kansas City, Shreveport and Gulf Terminal Co. will govern the movement of trains and engines between Franklin St.-Commerce St. Jcts. and North Wye Switch and between Franklin St.-Commerce St. Jcts. and South Wye Switch.

Between L&A Jct., Red Jct., and Silver Lake Jct., trains and engines will be governed by StLSW Ry. timetable, rules and special instructions.

Between Texas Jct., and South Wye Sw. (Shreveport), trains and engines will be governed by K.C.S. lines rules, timetable and special instructions.

Between Mansura Jct. and Lobdell Jct., trains and engines will be governed by T&P-L&A Rys. joint time table, rules and instructions.

Between KCS Jct. and New Orleans Passenger Station and while on N.O.U.P.T. Ry. tracks, trains and engines will be governed by N.O.U.P.T. Ry. rules and instructions.

When occupying MKT Ry. tracks at Hunt and Greenville, trains and engines will be governed by MKT Ry. time table, rules and special instructions.

Between Farmersville and Dallas, trains will be governed by GC&SF Ry. time table and rules.

**NORTHWARD TRAINS ARE SUPERIOR TO SOUTHWARD TRAINS OF THE SAME CLASS, except:**

No. 1 is SUPERIOR to No. 10.

No. 65 and No. 35 are SUPERIOR to No. 36

No. 23 is SUPERIOR to No. 68

Inferior class trains, extra trains and engines will clear No. 1, No. 2, No. 201 and No. 202 at least 10 minutes. Rules 86 and S-89 addition.

Except where other restrictions require a slower speed, Passenger trains will not exceed 50 MPH, and Freight trains 35 MPH while meeting or passing another train occupying a siding.

All trains will not exceed 40 MPH passing train order signal where train orders are to be delivered.

Trains authorized to register by register ticket will stop and conductor will register his train on train register when carrying signals for a following section as per Rule 20.

When making out register check form 227, conductors will also furnish copy to rear trainman. Rules 83-A and 83-B, addition to.

The engine whistle shall be sounded as prescribed by Rule 14-L and the engine bell shall be rung at the whistling post 1320 feet or one quarter of a mile from road crossing or street and shall be kept ringing until the engine or lead car shall have crossed such road crossing or street or until the train or cars have stopped.

If stop is made within one quarter of a mile of road crossing or street, when the engine is again started engine whistle shall be sounded as prescribed by Rule 14-L and engine bell shall be rung continuously until engine or lead car shall have crossed such road crossing or street.

Rule "L"—Trainmen and enginemen are cautioned that there are structures alongside of tracks at stations and elsewhere which do not provide clearance for a man to ride on top or side of cars or engines and they must inform themselves with locations of such structures.

Where car capacity of sidings or other tracks is shown, it is figured on the basis of 48 feet per car. On sidings, allowance is made for 4 unit diesel engine and caboose, but not on other tracks.

Rail test cars and MofWay Ballast discing machines cannot be relied on to actuate block and interlocking signals, and are defined as uninsulated equipment. Rule 99(j) is not applicable to such machines, nor can such machines occupy main track within territory where Rules 400 to 406, inclusive, are in effect on authority of block signal indications, alone.

Engines in yard or road service, with or without cars, will not follow a preceding movement over a public crossing closer than five (5) minutes unless such crossing is protected by flagman or crossing gates.

These instructions do not relieve crews of any train or engine from exercising due precaution to avoid accidents, per Rule 101.

All yard engines with or without cars and all dodger and road engines while engaged in switch movements must approach all road crossings, including those protected by automatic signals and/or flagman, at restricted speed and make sure they have the right-of-way before moving over crossing.

When only one brakeman on Trains 9 and 10 between Shreveport and New Orleans, and conditions permit, it will be permissible for the brakeman to leave the rear end of the train as required by Rule 99-D to assist with the handling of passengers in making regular stops.

### HIGH WATER:

Maximum depth of water, over top of rail, through which equipment may be handled is as follows, except where greater depths are authorized by proper authority:

Diesel engines .....	4 inches
Passenger cars .....	9 inches
Freight cars .....	25 inches

When trains are operated through water, a maximum speed of five (5) mph must not be exceeded. A greater depth than four (4) inches should not be authorized for Diesel engines. If authority is given to operate air-conditioned passenger cars through a greater depth than nine (9) inches, proper inspection should be made to ascertain if the apparatus required to be cleaned and dried.

### TRAINS HANDLING

Passenger trains handling box cars equipped for passenger train service, except KCS 400 class and L&A 36017 and L&A 36148, will not exceed 60 mph. KCS 400 class, L&A 36017 and L&A 36148 are good for maximum speed.

Trains handling mixed freight and passenger equipment will not exceed speed authorized for freight trains.

Trains handling passenger equipment, exclusive of caboose, will not exceed speed authorized for passenger trains.

Foreign line steam wreckers, pile drivers, derrick cars and other heavy machinery on its own wheels, will not exceed 20 mph.

**SCALE TEST CARS, not to exceed 35 mph.**

KCS or L&A wreckers, boom down (except KCS wreckers No. 05 and No. 06), not to exceed 25 mph.

Wreckers, pile drivers and other machinery on its own wheels, equipped with boom, must be handled in train with boom in trailing position except as otherwise authorized by Superintendent, except KCS Pile Driver-Clamshell No. 096 may be handled with boom in lead position for short distances, when necessary, to a point where machine can be turned.

KCS air dump cars will be handled in the rear of train at a speed not to exceed 25 mph and will be handled in locals in the territory where that service is available.

Trains handling cars loaded with ore moving from Mobile, Ala., to Lone Star, Tex., must not exceed 35 mph.

### KCS WRECKERS NO. 05 AND NO. 06

Except as otherwise restricted by AUTHORIZED TRAIN SPEEDS, yard limits, train orders, slow boards, slow flags, general orders, special instructions or other proper notices, KCS wreckers No. 05 and No. 06 to be handled as follows:

Between Shreveport and Farmersville, not to exceed 35 MPH except:

Not to exceed 10 MPH over Bridge T-49, (Cypress Creek).

Not to exceed 15 MPH over Bridge T-86.8  
Bridge T-86.9

Not to exceed 20 MPH from MP T-62 to MP T-76.

Between Shreveport and Minden, not to exceed 35 MPH

Between Hope and Minden, not to exceed 25 MPH except:

Not to exceed 15 MPH over Bridge 17.1  
Bridge 71.7

Between Minden and Winnfield, not to exceed 25 MPH

Between Winnfield and Alexandria, not to exceed 35 MPH except:

Not to exceed 10 MPH over Red River Bridge 681.8, Alexandria.

**KCS WRECKERS NO. 05 AND NO. 06—Continued**

Between Shreveport and Alexandria (Shreveport Subdivision), not to exceed 25 MPH, except:  
 Not to exceed 15 MPH over Bridge 649.5  
 Bridge 650.0  
 Not to exceed 10 MPH over Red River Bridge 681.8, Alexandria.  
 Between Alexandria and Baton Rouge, not to exceed 25 MPH except:  
 Not to exceed 10 MPH over Atchafalaya River Bridge 729.2, Simmesport.  
 Between Baton Rouge and New Orleans, not to exceed 45 MPH.

**KCS PILE DRIVER-CLAMSHELL NO. 096**

Except as otherwise restricted by AUTHORIZED TRAIN SPEEDS, yard limits, train orders, slow flags, general orders, special instructions or other proper notices, KCS Pile Driver Clamshell No. 096 to be handled as follows:  
 Not to exceed 40 MPH (30 MPH with boom in lead position) except:

Not to exceed 35 MPH (25 MPH with boom in lead position) between Shreveport and Minden  
 between Shreveport and Farmersville  
 between Winnfield and Alexandria.  
 Not to exceed 25 MPH (20 MPH with boom in lead position) between Hope and Winnfield  
 between Shreveport and Alexandria (Shreveport Subdivision).  
 between Alexandria and Baton Rouge.

Not to exceed 15 MPH (10 MPH with boom in lead position) over Bridges:  
 17.1 Minden-Hope Subdivision  
 71.7 Minden-Hope Subdivision  
 T-86.8 Texas Subdivision  
 T-86.9 Texas Subdivision  
 649.5 Shreveport Subdivision  
 650.0 Shreveport Subdivision

Not to exceed 10 MPH over Bridges:  
 681.8 Red River, Alexandria  
 729.2 Atchafalaya River, Simmesport

Not to exceed 20 MPH (15 MPH with boom in lead position) from MP T-62 to MP T-76 Texas Subdivision.

**ENGINES**

Road service freight engines, when backing or when controlled from rear unit, not to exceed 30 mph.

Light engines moving forward will not exceed freight train speed or the maximum speed authorized (whichever is lower) for the class engine on the subdivision movement is being made, except on special instructions of the Superintendent.

Road service freight engines or freight units, when used with higher speed units, not to exceed 65 mph.

Road service freight engines, when used in passenger service, not to exceed 65 mph.

Switch engines, except General Purpose engines, will not exceed 45 mph in either forward or backward movements.

General Purpose engines, series 40, 100, 150 and 160, will not exceed 65 mph in either forward or backward movements.

All diesel engines (road or switch) for movement in tow must have all switches open, main fuse removed, reversing drums and main power contactors blocked.

**REGISTER STATIONS**

Shreveport Union Depot	North Baton Rouge
Hope	West Yard
Minden	Hunt

**AUTOMATIC BLOCK SYSTEM**

Rule 350 and other Rules Applicable will govern.

Sub-division	From (Station)	Mile Post	To (Station)	Mile Post
New Orls.	Just south of Baton Rouge	789.9	Shrewsbury	862.6

**AUTOMATIC BLOCK SYSTEM**

Operation by signal indication opposing and following movements.

Rules 400 to 406 inclusive and other rules applicable will govern.

Sub-division	Between (Station)	Mile Post	And (Station)	Mile Post
Baton Rouge	Lobdell Jct.	780.7	Bridge Jct.	785.2

**SPECIAL INSTRUCTIONS**

Nos. 202 and No. 9 are authorized to leave Shreveport Union Depot (Initial Station) without a clearance.

All trains will secure clearance before leaving Minden, Winnfield and Hunt.

Nos. 1, 2, 9 and 10 will register at West Yard, North Baton Rouge and Alexandria by register ticket except when No. 9 departs Alexandria after 4:00 p.m. and the telegraph operator is not on duty, No. 9 must stop at the yard office and conductor will personally register the train on train register in telegraph office.

No. 202-1 and No. 2-201, will register at Minden by register ticket.

Second class and extra trains will register at Winnfield by register ticket.

Between the hours of 3:00 p.m. and 6:00 a.m. all regular trains will receive initial clearance card, provided for in Operating Rule 83-a, last paragraph, at Bridge Tower Telegraph Office at East Junction. A Banner type train order signal installed at Bridge Tower telegraph office. All trains will be governed by aspects of this train order signal as per Operating Rule 232.

When southward regular trains are registered at Deramus Yard, such trains will have arrived at Texas Jct.

**SHREVEPORT:** First class trains, both directions, will move at restricted speed between Harriet St. (station sign MP-556.3), and Dalzell Street (just south of South Wye Switch) expecting to find other trains or engines occupying main track without flag protection.

Freight trains, yard engines and light engines will keep informed of passenger train movements and will immediately clear main track on the approach, or, if practical, before the approach of passenger trains, avoiding all delay possible.

**TWO MAIN TRACKS** between South yard lead switch Deramus Yard and Cedar Grove Tower (which includes South Wye Switch).

All movements, opposing and following, between Harriet St. (station sign), and Blanchard (Texas Jct.), will be made by signal indications. Rules 400 to 406 incl., and other rules applicable will govern.

Between Harriet St., and Cedar Grove Tower, the current of traffic is on right-hand track in direction of movement. Movements will not be made against current of traffic unless protected by flag or authorized by Yardmaster.

All trains and engines will run at restricted speed not to exceed 20 MPH on east main track between Harriet St. (station sign) and Deramus Yard (south lead switch).

All trains and engines will not exceed 15 mph entire north leg of wye Shreveport.

All trains and engines must approach Jordan Street crossing, Shreveport, KCS-G.T. tracks prepared to stop if crossing is not clear of traffic and crossing gates down.

First class trains run at restricted speed between Silver Lake Jct., Red Jct. and Franklin Street Jct.

**TWO MAIN TRACKS** between Franklin St. Jct. and Red Jct., Silver Lake Jct., the current of traffic is on right-hand track in direction of movement.

**SPRING SWITCH:** North Wye is equipped with spring switch. Normal position for north leg of wye. Northward movements may run through points in accordance with Rules 104-A and 104-F.

**BLOCK SIGNAL** indications will govern the following movements in vicinity of North Wye Switch, Shreveport:

Signal No. 6, located between northward main track and north leg of wye, will govern movements to be made from main track onto north leg of wye and from No. 1 yard track onto north leg of wye. When RED aspect on signal is shown, it indicates north leg of wye is occupied.

Signal No. 8, located on pier of T&P-T&NO passenger lead overhead bridge on east side of KCS northward main track to govern all northward movements on northward track.

Signal No. 9, located east of northward main track just south of crossover switch to north leg of wye. This is a repeater of Signal No. 6. Signals 9 and 6 govern southward movements through north leg of wye.

Where stop indication is displayed and does not change to "Proceed at Low Speed" indication within five (5) minutes, movements may proceed under flag protection, but must allow time for flagman to get through block before movement is started.

Ten (10) mph permanent speed restriction signs have been placed on each side of grade crossing, Barksdale Field, MP-564.0, approximately 600 feet from the crossing.

All movements must not exceed 10 mph from the permanent speed restriction sign until the crossing is covered. This means the speed must be down to not exceeding 10 mph when the engine, or leading car, passes the 10 mph sign.

Cars or engines must not be left standing between these signs and the crossing.

**MINDEN:** First class trains run at restricted speed between West wye switch and Minden passenger station.

Second and inferior class and extra trains and engines will keep informed of Minden and Hope subdivision passenger trains moving between West wye switch and Minden passenger station and avoid delay to such trains.

All trains and engines will not exceed 10 MPH, entire train, over South Wye Switch Minden when this switch is lined in normal position.

**WINNFIELD:** First class trains run at restricted speed between overpass MP-146.9 and I.C. crossing, Winnfield.

**PINEVILLE JCT.-ALEXANDRIA JCT.:** First class trains run at restricted speed between Pineville Junction MP-681.4 and Alexandria Junction MP-683.1.

**PINEVILLE-PINEVILLE JCT.:** Trains will not exceed 25 mph between College Drive MP-680.4 Pineville and Pineville Jct., on Shreveport Subdivision and between Melrose Street Extension MP-192.7 and Pineville Jct., on Minden subdivision. (The above does not relieve crews from complying with Rules 93 and 103.)

**NORTH BATON ROUGE—BATON ROUGE:** First class trains run at restricted speed between Bridge Jct. and MP-790.1, Baton Rouge, which is 1,000 feet south of south switch.

**WEST YARD:** First class trains run at restricted speed between Shrewsbury and KCS Jct.

**PACKTON:** Trains or engines moving through south leg of wye track will not exceed eight (8) mph.

**HUNT-GREENVILLE:** Trains and engines run at restricted speed through Greenville and Hunt Yard, expecting to find main track occupied. The moving train or engine will be held responsible. Trains or engines standing or moving under obscure conditions unprotected by flagman, ample distance for safety, when superior trains are overdue will be held equally responsible. Trains and engines may proceed ahead of or against overdue superior trains between south end of L&A siding, Greenville, and north switch Hunt Yard, when automatic block signals or indicators display "proceed" or "yellow" indications, being governed by Rule 343 when signals display "stop" indications.

These instructions do not relieve crews of any train or engine from exercising due precaution to avoid accidents, per Rule 101.

All trains move at restricted speed between Mile Post T-174 and Yard Limit Board at north end of Hunt Yard.

### USE OF TRACKS—TIME APPLIES (Rule 5)

#### MINDEN SUBDIVISION:

**WINNFIELD**—Ruling switch for southward first class trains will be at CRI&P Ry. connection switch.

**PACKTON**—Ruling switches are the north and south switches to Wye.

#### BATON ROUGE SUBDIVISION-BATON ROUGE:

Baton Rouge siding is designated as the track parallel to main track between crossover switch MP-789.3 just south of Government Street and south of North Boulevard Street just north of passenger depot platform.

### SWITCHES—NORMAL POSITION OF (Rule 104)

**MINDEN:** Shreveport Jct. is for Hope Subdivision main track. West Wye Switch is for Hope Subdivision and is a spring switch. South Wye Switch, Minden, is into south leg of Wye, Minden.

**PINEVILLE Jct.**, is for Shreveport subdivision main track, and is a spring switch.

**FARMERSVILLE, GCSF Jct.**, is for L.&A. connection. Movements will be made between L.&A. main track Mile Post T-112 and the Tidewater Refinery under Operating Rule 93. Maximum speed over this track is 15 miles per hour.

## MOVEMENTS OVER MISSISSIPPI RIVER BRIDGE

Train and engine movements between Lobdell Junction and Bridge Junction will be governed by signal indications for both opposing and following movements. A.B.S. Territory, Rule 400 and other rules applicable will govern.

All signals and power-operated switches are controlled by Control Operator at Bridge Tower. Telephones located Lobdell Jct. switch, West Jct., and Bridge Junction.

When trains or yard engines with cars are stalled on the bridge or approaches thereto, members of crew will be governed by Rule 99(j).

Lighted fuseses will not be thrown off moving trains on bridge or steel structure, but when required to use fuseses for protection must be placed by hand in such a manner so there will be no danger of fire on the structure.

When helper engine is coupled to a train on the head end, the air must be tested before leaving Lobdell Jct., or North Baton Rouge. Air brakes will be handled by the lead engine.

Audible Signal (addition to Rule 14), one short (o) and one long (—) blast of the engine whistle when the train is moving, is a signal for engineman on second engine of double header to cut in air and handle the brakes.

Conductors of passenger trains will see that all toilets of the train are locked while train is passing over steel structure of the bridge. Trainmen will unlock toilets immediately after train has passed over the structure.

When a train is stopped at Lobdell to be assisted over the bridge by helper engine, the engineer on road engine must make a 25 pound reduction of brake pipe pressure and cut out brake valve without releasing. This will insure of brakes by helper engine and maintenance of brake pipe pressure by helper engines.

Under no circumstances will train attempt to double over the bridge and leave any part of train on the steel structure in either direction.

Engineers will not use sanders on engines while operating over expansion joints on bridge.

## MOVEMENTS APPROACHING AND OVER ATCHAFALAYA RIVER BRIDGE M.P. 729.2

Approximately 500 feet from each end of this bridge is a mast equipped with two lights about three feet apart in horizontal position with only one light burning at a time.

The red light will be lighted when the control switch is open or the rails to the draw span unlocked. (See Rule 10-A—Stop.)

If the bridge and control switches are in normal position for train movements the other light will display a Lunar indication. (See Rule 10-B—Proceed at low speed.)

If neither a lunar light nor a red light is lighted or a white light is displayed where the red or the lunar light should be, stop must be made before any part of engine or train passes the signal mast.

If movement is stopped by a red light or by the absence of light or improperly displayed light, a member of the crew must personally contact the bridge tender to obtain permission to proceed, examine the rails to see same in order and explain the situation to the engineer before moving onto the bridge.

A Caution Sign reading, "Drawbridge one mile" equipped with yellow light is located approximately one mile from each end of bridge. Between this Caution Sign and the lights at bridge, all movements must be made at restricted speed in accordance with Rule 98. See definition of Restricted Speed.

There are two gates on south side and one gate on north side of this bridge to control highway traffic over the bridge.

Trains must not move onto the bridge or foul the highway at either end of bridge until flasher lights governing highway traffic (on the end they are approaching from) are known to be working and highway traffic gate or gates are down.

## SPEED RESTRICTIONS

LIMITS	CLASS OF SERVICE	
	Passenger Trains	Freight Trains
Main track except as otherwise restricted by yard limits, slow orders, slow boards, slow flags, general orders, special instructions or other proper notices:

Speed restriction over SSW Railway crossing MP T-170 is 10 MPH for engine and 20 MPH for balance of train.

**SPEED THROUGH CITY LIMITS**

Speed of trains restricted as follows by City Ordinance:

Shreveport** .....	20 mph	Hope .....	8 mph
Bossier City .....	15 mph	Third Street .....	5 mph
Coushatta, Pagr. ....	25 mph	Minden .....	8 mph
Coushatta, Frt. ....	15 mph	Winnfield .....	8 mph
Campti .....	25 mph	Sulphur Springs .....	12 mph
Alexandria .....	15 mph	Winnsboro .....	20 mph
Baton Rouge .....	8 mph	Pittsburg, Texas .....	20 mph
Kenner .....	25 mph	Hughes Springs .....	10 mph
		Jefferson .....	18 mph

\*\*Shreveport, also, not to exceed 10 MPH for a distance of not less than 300 feet before reaching St. Vincent Avenue, and Hollywood Street crossings until engine or lead car has passed over crossings.

Use of engine whistle may be made (where anti-whistling ordinances are in effect) when there is imminent danger of accident. In any case of impending danger, where it is felt an accident might be avoided by an additional warning, the whistle must be used.

Tonnage rating for 1100, 1200 and 1300 class engines (except engines 1120 and 1150) will be the same as shown in 1500 H.P. column.

1100, 1200 and 1300 class engines will not be operated in unison with 1500, 1750 or 2250 H.P. engines except on authority of Supt. of Machinery.

1000 H.P. Engines: 1100-1102, 1110-1112, 1121-1123, 1125, 1126, 1200-1226.

1200 H.P. Engines: 1160-1163, 1300-1315.

1500 H.P. Engines: 30, 50, 70, 80, and 90 class, 150-154, 156-161.

1750 H.P. Engines: 155, 162-165, 60 A, B & C, 61 A, B & C, 62B, 41.

2250 H.P. Engines: 100-119.

# 57

**PRACTICE  
SAFETY  
CONSTANTLY.**

**STOP  
Damage to Freight  
By Coupling Cars  
NOT OVER 4 MPH**

**SPECIAL SAFETY RULES FOR EMPLOYES IN TRAIN ENGINE  
AND YARD SERVICE IN ADDITION TO RULE 510**

1. Safety is of first importance in the discharge of duty.
2. Avoid all risks. Watch for unsafe conditions and correct and report them.
3. Look both ways before crossing any track. Avoid crossing track in front of movement after signal is given to move. Do not stand or walk on track when avoidable.
4. Step over rails, frogs, switch guard rails, interlocking machinery or connections and not on them. Do not sit on rails or ties or take refuge under car.
5. Look out for approaching movements and alight outside of rails when getting off engine or car.
6. When alighting from or boarding rear end of freight train, use rear platform of caboose.
7. When boarding or alighting from a locomotive, caboose, or car face in, as on a ladder. Observe footing and clearances before alighting from moving or standing engine or car. Keep firm grip on handhold until foot is firmly placed on ground or other support when engine or car is standing.
8. Keep away from side or end while riding top of car, except for time required to operate brake or perform other duty there.
9. Do not ride on facing end of leading car or trailing end of rear car when possible to avoid it.
10. When riding side or top of car, keep a close watch for unsafe clearances.
11. Before going under or between standing cars or engines, first see or know they will not be moved. Otherwise obtain suitable protection. No signal should be given to move engine or cars when anyone is under or between.
12. Do not ride on footboard on forward end in direction engine is moving.
13. Do not ride on buffer plates, drawbars, brake beams, brake wheels, end ladders, and on end of car containing load that may shift.
14. Firm grip and safe foothold are essential to safety when on sillstep, side ladder, end platform, or in transferring or changing position.
15. When alighting from moving equipment extreme care should be exercised. Avoid getting off in an awkward manner that will result in strains or sprains.
16. When engineman sees or knows that ground man is about to get on or off, he will regulate speed down to point of assured safety. Consider the footing, visibility and other conditions.
17. In setting or releasing brakes, be alert to the hazard of slipping or losing hold, sudden lurch, stop or start of car, brake club breaking or slipping, brake chains kinking or overlapping, also grabbing or kicking of brake. (Study the peculiarities and proper handling of different types of brakes.) Pressure on brake should be exerted toward body of car. Do not hold brake tension by hand—use the dog and ratchet.
18. Leave cars in clear and tied down to avoid possibility of fouling other tracks or man on side of car. Do not leave cars standing on tracks too near street or highway crossing, preferably 75 feet away from the crossing.
19. Be prepared constantly for sudden start or stop and for the shock of brake or slack action.
20. Use cut-lever to uncouple cars. If lever is inoperative, tie the movement down before crossing to opposite side.
21. It is prohibited to use foot or hand to adjust drawbar, knuckle or lock pin while car or locomotive is in motion or when another car is approaching within a car length.
22. Angle cocks will be closed before uncoupling air hose when there is pressure in train line. When setting brakes by turning angle cock, keep firm grip on hose.
23. Do not place hands, feet, or any part of body between inside end of car and lumber, pipe, or other lading likely to shift. Keep clear of unsecured drop end doors. Do not use gate of a gondola for handhold.
24. Slack cuts apart half car length before going between couplers to make adjustments of knuckles or for other purposes.
25. Do not attempt to cross track close in front of moving engine or car.
26. Wear safe shoes and other apparel, and use suitable clear (or Calobar) goggles when needful to protect against sand, cinders, or other eye hazards.
27. Keep feet in clear of the path of counterweights on ground throw switch levers. Do not handle switch stand lever when switch is being run through.
28. A habit of too much idle conversation across cab or caboose may contribute to serious accident.
29. Keep the mind on the work and have a clear and mutual understanding of the moves to be made.

**DIESEL LOCOMOTIVE HAZARDS**

30. Enginemen and others will use hard rubber or non-metallic cased flashlights in and around Diesel locomotives.
31. Never place hands or face near main generator or any high voltage equipment while it is working under load.
32. Do not smoke or have open flame in engine room.
33. Rings and wrist watches will not be worn while working around electrical equipment.
34. Fuses will not be pulled while under load.
35. High voltage cabinet will not be opened while Diesel Engine is running, other than idling.
36. Stepping out of side doors of moving Diesel units to platform or other side elevation is prohibited.
37. At any time an engine is overheated or shut down for mechanical defect, no handhold cover plate should be removed until sufficient time has elapsed to permit engine to cool down sufficiently to prevent possibility of an explosion (minimum one hour).
38. Passage will not be made through nose door of units when locomotive is in motion, EXCEPT when equipped with safety chains and such chains are in place. Extreme caution must be exercised when making this passage.

**THE FOLLOWING IS ALSO PROHIBITED:**

- (a) Giving signal to move an engine of cars and then crossing track in front of movement.
- (b) Giving signal to move an engine or cars without first placing switch in proper position.
- (c) Throwing or attempting to throw switch too short a distance ahead of an approaching train or engines.
- (d) Engineman drifting down too close to switches that are to be thrown.
- (e) To stand on top of a box car, covered hopper, caboose or any other similar car while such car is moving under an overhead structure.
- (f) Permitting any car with a defective or missing handhold to be moved or set out without first notifying all employees on the train and making wire report to the Superintendent. Throwing any object from a train or engine without first ascertaining whether any person is nearby who might be struck and injured.

**THE PROPER INTERPRETATION OF EACH AND EVERY RULE AND TRAIN ORDER IS THE ONE THAT WILL INSURE THE GREATEST DEGREE OF SAFETY TO EACH EMPLOYEE AND HIS FELLOW MAN.**

AS OF JANUARY 1, 1964, A MULTILEVEL OR GRADUATED SCALE OF PER DIEM IS ESTABLISHED.  
 RATES ARE BASED ON CAR VALUES, IN SIX GROUPS, AS FOLLOWS:

GROUP	CAR VALUE	RATE PER CAR PER DAY
1	\$ 1,000 and less	\$2.16
2	\$ 1,001 to \$ 5,000	\$2.79
3	\$ 5,001 to \$10,000	\$3.58
4	\$10,001 to \$15,000	\$4.50
5	\$15,001 to \$20,000	\$6.15
6	Over \$20,000	\$7.74

PER DIEM GROUPS OF KCS AND L&A EQUIPMENT ARE LISTED BELOW:
