SAFETY FIRST

MISSOURI PACIFIC RAILROAD COMPANY

KINGSVILLE DIVISION

TIMETABLE

No. 1

Effective 12:01 a.m., Sunday, August 19, 1956

CENTRAL STANDARD TIME

Superseding Timetable No. 51, Effective December 4,
1955, and all supplements thereto.

FOR THE INFORMATION AND GOVERNMENT OF
EMPLOYEES CONCERNED, WHO MUST ALSO
CARRY COPY OF SPECIAL INSTRUCTIONS
No. 10 EFFECTIVE JANUARY 1, 1955.

The Railroad Company Reserves the Right to Vary Therefrom
as Circumstances May Require.

R. P. HART, Vice President-Operation.
L. A. GREGORY, Assistant Vice President-Operation.
M. L. SMITH, General Superintendent Transportation.
E. C. SHEFFIELD, General Manager.
V. A. GORDON, Assistant General Manager.

SPECIAL INSTRUCTIONS

The following rules are repeated from the Uniform Code of Operating Rules for emphasis:

GENERAL NOTICE (in part): SAFETY is of the FIRST importance in the discharge of duty.

RULE B: Employees must have a proper understanding and working knowledge of and obey all rules and instructions in whatever form issued, applicable to or affecting their duties. If in doubt as to their meaning, employees must apply to the proper officer for an explanation.

When properly authorized, rules may be cancelled, superseded or changed by:

- (1) General Order,
- (2) Special instructions in the timetable or in pamphlet form,
- (3) Paster in the book of rules.

RULE E (in part): Employees must render every assistance in their power in carrying out the rules and instructions. Courteous cooperation between employees is required for proper functioning under the rules and instructions.

RULE 107 (in part): Conductors and engineers must bring about cooperation between all members of the crew.

Both the conductor and engineer are responsible for the safety of the train and the observance of the rules.

Although engineers are under the direction of the conductor regarding the supervision of trains, they will not comply with any instructions which imperil the safety of the train or involve a violation of the rules.

Where safety of trains and observance of rules are involved, brakemen and firemen are responsible to the extent of their ability to prevent accident or violation of rules. They will not comply with any instructions which imperil the safety of the train or involve a violation of the rules.

RULE 108: In case of doubt or uncertainty, the SAFE course MUST be taken.

RULE 101 (in part): Conductors and engineers must inform themselves of conditions, and during and after excessive rains, heavy storms, fogs, or any condition which may restrict visibility or affect condition of track, must restrict speed of their train to insure ABSOLUTE SAFETY, and if in doubt of being able to proceed safely, train must be placed in siding until it is safe to proceed.

When storms, fogs, or other conditions obscure track or signals from points where they are plainly seen under normal conditions, speed must be restricted to insure seeing and complying with indications of any and all signals, REGARDLESS OF LOSS OF TIME.

RULES 2 and 3 of Rules and Instructions for Train Dispatchers:

The train dispatcher is in position to render valuable service in bringing about compliance with the rules; first by habitually conforming to the rules in the daily performance of his own duties; second, by requiring compliance with the rules on the part of operators, trainmen and others with whom his duties bring him in daily contact; and, third, by immediately reporting any rule violation, any negligence of duty or any irregularity relating to the movement of trains and the handling and execution of train orders.

Train dispatcher must bear in mind that his more extended means of communication and consequent knowledge of conditions give him a point of view not available to any other person connected with train, engine or yard movements, and that it is his duty to impart that knowledge to others, when it will promote safety, or without sacrificing safety, will expedite movement of trains.

NOTE WELL AND REMEMBER:

1. No officer or employe has the authority to violate a rule.
2. No officer or employe has the authority to tell anyone to violate a rule.

General Manager

ATTENTION TRAIN AND ENGINE CREWS

Always keep in mind that the revenue passenger is the BUYER, and that it is your job to make every BUYER a satisfied customer. To that end, the following matters deserve your constant attention:

1. If an error or misstatement has been made somewhere along the route, put forth every effort to correct it. Nothing should be considered too trivial.

2. Ever be alert to the safety and comfort of your passengers, and freely give information and advice when requested. The aged, infirm and the young passenger traveling unaccompanied require special attention. Be helpful to them in every way possible, particularly in assisting them on and off trains, and occasionally inquire as to their comfort.

3. Protect both coach and sleeper passengers against undue noise or disturbance, particularly at night. Remember they pay to sleep.

4. The avoidance of arguments or friction with passengers is a test of your diplomacy. A calm and pleasant manner, regardless of the circumstances, is the best assurance of your success.

5. Keep posted on connecting line train service, arbitrary holds they have in effect for our trains, and advise passengers so as to avoid, as far as possible, any uneasiness on their part about missing connections, and when same is unavoidable, tell them what time the next connection is due to depart.

6. Cheerfully offer explanation of unusual delays and pass such information to other members of your crew — Brakeman, Porter, Pullman and Dining Car employes — so they too may advise passengers. Generally speaking, passengers will gladly accept a condition which they understand, but on the contrary are irritated when kept in ignorance.

7. Neatness of appearance and courtesy bespeak pride in your job, and create good-will for the Railroad.

8. Being considerate of others is the key to popularity. This applies to the institution and individual alike. Many of your passengers may be riding a train for their first time. This is especially true of the younger generation. Kind and attentive treatment to make them feel at home creates additional passenger traffic.

9. Remember that people traveling on passes have a right to that privilege, and are entitled to the same courteous treatment as other passengers. A satisfied "free-transportation" passenger is always a booster.

10. On crowded trains, Missouri Pacific Lines employes riding on passes should, and will if properly approached, cheerfully cooperate in seeing that revenue passengers are given every possible consideration.

11. Train Porter should keep coaches clean and in tidy condition at all times. Toilets particularly are the source of adverse comment. Inspect them frequently.

12. AVOID ROUGH HANDLING OF YOUR TRAIN. Missouri Pacific enginemen have an enviable reputation for smooth starting, running and stopping of their trains. Never lose sight of this feature, as passengers are more disposed to avoid the route that does not give them a smooth ride, than they are to exert the effort involved in registering complaints about it.

13. Of equal importance is SMOOTH HANDLING OF FREIGHT TRAINS. Rough handling results in damaged lading and delays due to damaged equipment, which creates dissatisfied customers.

14. On-time delivery of passengers and freight at destination is what the customers pay for and expect. Your best efforts, always within the zone of safety, should be extended to keep your trains on time.

Vice President-Operation

ARBITRARY HOLDS — PASSENGER TRAINS

Station	Train Number	Hold For Train	Hold Until	Hold If On Time	Remarks
Houston	DeQuincy 4	Kingsville 316	9:15 A.M.	10 Minutes	For revenue passengers.
	Kingsville 321	Palestine 121	12:30 P.M.	1 Hour	For connection.
	Palestine 122	Kingsville 322	4:30 P.M.	15 Minutes	For connection.
	Kingsville 315	FW&D 3	10:00 P.M.	20 Minutes	For revenue passengers and mail.

	Kingsville 221	Kingsville 321	Indefinitely		For connection.
Harlingen	Kingsville 322	Bus 7041	7:55 A.M.	10 Minutes	For revenue passengers.

EXPLANATION OF CHARACTERS:

- Ⓟ—Radio Base station.
 - D—Diesel Fuel Oil.
 - T—Turntable.
 - W—Water.
 - Y—Wye.
 - §—Track scales.
 - *—Mail crane.
 - CS—Continuous train order office.
 - LS—Limited train order office. (hours of service specified by general order).
 - P—Telephone communication only.
 - TP—Telegraph or telephone office; not a train order office.
- Register stations are shown in full-faced type.

EXPLANATION OF STOPS:

- s—Regular stop.
 - f—Stop on signal for passengers, mail, baggage and express.
 - a—Stop on signal to receive or discharge revenue passengers.
- Passenger trains will stop at any station to discharge passengers holding revenue tickets from connecting lines or connecting divisions.
- No. 316 will stop at Sweeny on Saturday and Sunday to handle mail.
- No. 316 will stop at Sebastian and Lyford on Friday and Saturday to handle mail.
- No. 315 will stop at Riviera, Armstrong and Sebastian on Saturday to handle mail.
- No. 315 will stop at Riviera and Olmito when necessary to handle fragile mail.
- No. 321 will stop at Lolita on Saturday to handle mail.
- No. 321 will stop at Riviera and Armstrong on Friday and Saturday to handle mail.
- No. 321 will stop at Liverpool, Buckeye, Elmaton, McFaddin, Vidauri, Calallen and Driscoll on Saturday when necessary to handle fragile mail.
- No. 321 and No. 322 will stop at La Salle when necessary to handle fragile mail.
- No. 322 will stop at Liverpool and Laward on Saturday to handle mail.

SPECIAL INSTRUCTIONS

1. Northward regular trains are superior to trains of the same class in the opposite direction, except:

- Brownsville Subdiv: No. 321 is superior to No. 316.
- Brownsville Subdiv: No. 361 is superior to No. 380.
- Kingsville Subdiv: No. 361 is superior to No. 382.
- Corpus Christi Subdiv: No. 267 is superior to No. 290.
- Mission Subdiv: No. 779 is superior to No. 778.
- Victoria Subdiv: No. 767 is superior to No. 766.
- Austwell Subdiv: No. 771 is superior to No. 770.
- Rio Hondo Subdiv: No. 783 is superior to No. 782.
- Port Isabel Subdiv: No. 781 is superior to No. 780.
- Ed Couch Subdiv: No. 775 is superior to No. 774.
- Edinburg Subdiv: No. 773 is superior to No. 772.
- Freeport Subdiv: No. 797 is superior to No. 798.

2. MAXIMUM SPEED:

The highest speed authorized for the operation of trains on main tracks, subject to LOWER speeds specified in Section 3 of these instructions, entitled "SPEED RESTRICTIONS", and lower speeds prescribed by train orders, restrictive signals and operating rules.

2-A. MAXIMUM TRAIN SPEED: (Where Maximum Engine Speed is LOWER, it will Govern).

The consist of a train includes the engine, or engines, and cars in the train. Members of the crew must know the consist of train.

The speed shown below is the highest speed authorized for the operation of trains of the specified consist:

CONSIST "A".... Diesel engines with one or more, or all cars equipped with freight car trucks.

CONSIST "B".... Diesel engines with one or more conventional type standard weight high center of gravity passenger cars in train of all passenger cars.

CONSIST "C".... Diesel engines with streamlined—HIGH center of gravity cars (equipped with electro-pneumatic brakes, tight lock couplers and roller bearing trucks), with or without one or more streamlined—LOW center of gravity cars.

Passenger cars MP 6330, 6331, 6332, 6333, 6334, 6335 and 6336, Sleepers Shrine Tower, Beacon Tower, and Temple Tower, and Diner 10242 are Streamlined—HIGH center of gravity cars.

CONSIST "D".... Diesel engines with streamlined, lightweight—LOW center of gravity cars only.

MoPac passenger cars of the 700 and 800 series, T&P passenger cars of the 100, 200, 300, 400, and 500 series, and sleepers with "Eagle" and "Cascade" prefix or "River" suffix, are streamlined—LOW center of gravity cars.

3-E. TRAINS HANDLING DISABLED ENGINES AND ENGINES IN TOW:

All Diesel Engines and Motor Cars Dead in tow or disabled in Charge of Crew:

With trucks and traction motors in good running condition.....

Maximum Train Speed, or Maximum Engine Speed for particular engine whichever is lower (See Item 2-B)

With trucks or parts of same not in good running condition.....

As Authorized By Superintendent

Diesel engines (road or switch) for movement dead in tow must have cut-out cock in supply line to control air reservoir closed, control air reservoir drained, and drain cocks left open; all switches opened; battery fuses removed; reverser drums and main power contactors blocked. Messenger will be provided at the discretion of Superintendent or Master Mechanic.

With flat spot 2 3/4" or more in length for 36" diameter wheels used on E. M. D. passenger diesels 10

With flat spot 3" or more in length for 40" and 42" diameter wheels used on all road and switch diesels 10

No restriction for flat spots shorter than above specified lengths.

3-F. TRAINS HANDLING WORK EQUIPMENT, DERRICKS, CRANES, ETC.:

Miles Per Hour

Pile Drivers..... 25

Steam Shovels..... 25

Bridge Derrick Cars (non-revolving)..... 30

Bridge derrick cars (non-revolving) must be coupled to flat car and support provided for boom; boom must be chained or cabled to car stake irons with sufficient play to allow for not less than 3 inches or more than 6 inches lateral movement; and uncoupling levers must be disconnected between derrick car and idler car. Derrick cars may be handled in train with boom ahead or trailing as requested by messenger accompanying.

Bridge Derrick-Pile Driver (combination machine)..... 25

Bridge derrick-pile driver (combination machine) may be shipped either as a derrick or as a pile driver. When shipped as a derrick, its movement shall be governed by the regulations applying to wrecking cranes. When shipped as a pile driver, its movement shall be governed by the regulations applying to pile drivers.

American Ditchers (self-propelling)..... 25

American ditchers, self-propelling, must be coupled to flat car and uncoupling levers between machine and flat car must be disconnected. Boom must be supported exclusively by its cables. Bucket must be raised to clear idler car approximately eight inches and shored firmly against boom through 4 inch by 6 inch timber with all slack taken out of hoist cable. Water tank and boiler should be drained and rear of machine must be faced toward front of train. Side rods and cranks must be removed from trucks.

Locomotive Cranes or Clam Shells 25

Locomotive cranes or clam shells must be coupled to flat car and uncoupling levers between machine and flat car must be disconnected. Boom must be disconnected from rotating portion of machine and supported entirely upon flat car. Cables need not be removed from boom, but must be left slack between machine and boom. Water tank and boiler should be drained and coal bunker should be emptied. The rear of machine must face toward front of train, except when machine is accompanied by tender for use on bridge construction work and reversal is necessary from junction point to job to place it in working position upon arrival at destination.

American Ditchers, loaded on flat cars..... 25

Yard (clam shell) and "Burro" Cranes, loaded on flat cars 25

Jordan Spreaders and Spreader-Ditchers..... 25

Jordan spreaders and spreader-ditchers must be headed in working direction, otherwise speed must not exceed 15 miles per hour until machine is headed in working direction at nearest point where turning facilities are available. The plows' wings and braces must be secured in shipping position by the pins, bolts, chains, etc., provided for this purpose.

3-F. TRAINS HANDLING WORK EQUIPMENT, DERRICKS, CRANES, ETC. (Continued): Miles Per Hour

Industrial Brownhoist Locomotive Crane..... 25
 Industrial Brownhoist, Diesel Powered, Full Revolving Locomotive Crane should be moved with boom lowered on the racks on boom car. Boom must be disconnected from rotating portion of machine, and supported entirely upon boom car. Cables need not be removed from boom, but must be left slack between machine and boom.

Wrecking Cranes (non-self-propelling)..... 25

Note—Where maximum train speed is 25 miles per hour or less, speed of trains handling above work equipment must be restricted to five miles per hour less than such maximum freight train speed.

Wrecking Cranes (self-propelling):

The speed of trains handling wrecking cranes (self-propelling) shall be restricted according to maximum permissible speed of freight trains, Consist "A", thus:

Maximum Freight Train Speed	Permissible Speed When Handling Self-Propelled Wrecking Cranes
MPH	MPH
15	10
20	15
25	15
30	20
35	20
40	25
45	30
49	30
50	30

3-F. TRAINS HANDLING WORK EQUIPMENT, DERRICKS, CRANES, ETC. (Concluded):

Chemical Spray Cars, when side spray booms have been removed, or raised and fastened in vertical position..... Maximum Train Speed Consist "A"

Scale Test Cars (Except MPX 5121)..... 30

Scale Test Car MPX 5121..... Maximum Train Speed Consist "A"

Scale test cars must be handled next to cabooses.

3-G. TRAIN ORDER FORM X, REQUIRED WHEN HANDLING RESTRICTED EQUIPMENT:

When there is to be handled any unit of equipment mentioned in Items 3-E and 3-F, above, causing the speed of the train handling to be restricted below the maximum train speed, a Train Order, Form X, must be issued, specifying the speed restriction. Conductors must require such an order before leaving the station from which such restricted equipment is handled.

3-H. STEAM ENGINES - MAXIMUM ENGINE SPEED AND SPEED RESTRICTIONS:

Because of 100% Dieselization of motive power on this division, this timetable does not include maximum engine speed and speed restrictions for steam engines. Manner of handling steam engines, either in service or in tow, will be governed by instructions issued by Superintendent or Trainmaster at the time of handling.
