98 (R). The Nebraska State Law governing movement of trains over railroad crossings at grade is as follows:

"All railroad trains (and engines without trains), shall come to a full stop at least 200 feet, and not more than 800 feet, from the crossing of the other railroads, and the engineer shall sound two long blasts of the whistle before starting forward, except where said railroads maintain a semaphore and gate, with torpedo attachments, and when the signals indicate the crossing to be clear, no stop need be made.

When trains (or engines without trains) approach a crossing simultaneously, the one on the older road shall have the right to cross first, and the last train to cross shall not start until the first train has cleared the crossing and signal indicates that track is clear.

Every engineer violating the provisions of the two preceding sections, shall for each offense, forfeit one hundred dollars to be recovered in the name of the State of Nebraska for the benefit of the school fund; and the person, persons, or corporations on which road such offense is committed shall forfeit for each offense so committed, the sum of two hundred dollars to be recovered in like manner."

The following is an extract from the Iowa State Law governing movement of trains over railroad crossings at grade:

"All trains run upon any steam railroad in this state which intersects and crosses any other railroad upon the same level, shall be brought to a full stop at a distance of not less than two hundred nor more than eight hundred feet from the point of intersection or crossing, before such intersection or crossing is passed.

Any engineer or person in charge of an engine, who shall violate the provisions of the preceding section shall be fined for each offense not exceeding one hundred dollars; and the corporation or company on whose road such offense is committed shall be fined not exceeding two hundred dollars for each offense."

509 (E). Relative to Rule 509(B), the flagman must be sent ahead at night, even though the next signal in advance is in plain view and the track can be seen to be clear.

509 (F). When a train is stopped by a block signal at "stop" position, on double track when ready to proceed as per Rule 509(C) and on single track when the flagman is not to be sent ahead as per Rule 509(B), two long sounds of the engine whistle (14b) will be given before the train proceeds.

509 (R). Automatic block signals govern movement of trains in both directions over North Platte Bridge. All trains will approach the bridge prepared to stop and must not exceed a speed of 15 miles an hour over it. When a train is stopped by the home signal at the approach to, or on the bridge, it may proceed when the signal clears or by sending a flagman ahead a sufficient distance to insure full protection. When opposing trains approach at same time eastward trains must stop before passing home signal 700 feet west of bridge, giving westward superior trains preference.

525. If a Home Block Signal fails to indicate "stop" or a Distant Block Signal fails to indicate "caution" when a block is entered, a member of the crew must be left at the signal; the train dispatcher must be notified from the first available point of communication and report must be sent to the Superintendent by wire. The employe left at the signal must stop and notify all trains moving in the direction governed by that signal and must remain there until relieved by an employe of the Signal Department or by instructions from the proper officer.

713 (A). When passing through stations, and on double track when a train on the opposite track is being met or passed, a member of the crew must be stationed on the rear end of the rear car in position to give or receive necessary signals, except that when the train has an observation or special car, he must be on front platform of the rear car or on platform of the car next ahead. On passenger trains, the vestibule door must be open so that hot boxes or other defects may be detected.

720 (R). No. 261 Grand Island to Kearney, Nos. 257, 258, 259, 260, 263, and 264 will carry passengers.

Passengers will not be carried on other freight trains, except persons in charge of special freight, employes with annual passes or employes with trip passes so endorsed, between stations at which the train stops.

802 (A). When one or more cars are being switched or pushed over a public crossing, a man must go ahead of them, or must act as crossing watchman.

When a train has been opened to clear a public crossing a trainman must act as crossing watchman when a train or engine is passing on a siding or main track.

Where a crossing watchman is on duty, trainmen must not give signal for highway traffic to come ahead.

802 (R). The following will govern trains, engines and motors at the public crossings and bridges named below:

Stop at—	After stopping, proceed only as follows:
South Sixth St., Beatrice.	Following flagman.
Court St., Beatrice.	Following flagman.
Norfolk Avenue, Norfolk.	When it is known that the crossing is protected by flagman—between the hours of 6 P. M. and 9 A. M.
Wagon bridge at Scotia.	When it is known that the bridge is clear.
Public crossing about four miles east of Scotia.	When it is known that the crossing is clear.
Wagon bridge near Boelus.	When it is known that the bridge is clear.

802 (S). Eastward and westward trains passing through Grand Island will be governed by signals received from traffic director at Pine Street.

820 (R). Allowance for empty and underloaded cars as indicated below must be reported as required by Instruction 31 on Form 1216 "Conductor's Car and Tonnage Report".

824 (R). In addition to making inspection of train as often as practicable as per Rule 824, every freight train must stop and must be inspected at the following points:

Valley	—Eastward and westward;
North Bend	—Eastward, except stock and green fruit when train is running properly;

826 (R). When employes, passengers, or others are injured, call the nearest Railroad Surgeon. If the persons injured are not employes, they should be sent to their homes or placed in charge of Local Relief Authorities, after immediate necessary attention has been given by the Railroad Surgeon.

When necessary to call Surgeons, other than those regularly employed by the Railroad, it should be with the distinct understanding that their services will not be required after arrival of the Railroad Surgeon.

865 (A). Cars placarded "Explosives" must not be placed next to tank cars, wooden underframe cars, flat or gondola cars, nor next to cars loaded with pipe, lumber, iron, steel, or similar articles liable to break through end of the placarded car, nor next to cars containing lighted heaters, stoves, or lanterns. In through trains they must be placed near the middle of train at least 15 cars from the engine and at least 10 cars from the caboose if the length of the train will permit. In local trains in order to avoid unnecessary switching at stations, they may be placed not less than one car length from engine or caboose, but must not be placed next to cars placarded "Acid" or "Inflammable" in any train.

Tank cars placarded "Inflammable", if possible, must be placed in trains at least five cars from the engine and five cars from the caboose but must not be placed next to gondola or flat cars which are loaded with lumber, rails, pipe, or anything which is liable to shift. When length of train does not permit this, they must be placed as near the middle of train as practicable. Cars placarded "Inflammable" or "Chlorine Gas" must not be placed next to a car placarded "Explosives."

When placards become detached or are lost in transit, employe in charge of train must see that they are replaced upon arrival at next terminal if in a through train, or at the first station stop if in a local train.

Train and engine men, yardmasters, agents, or other employes who in any way handle or care for explosives and other dangerous articles must familiarize themselves with instructions and regulations governing the handling of them. Conductors must notify enginemen of the presence and location of cars containing explosives in the train, before leaving the initial station or station where such cars are picked up.

Empty tank cars must not be moved from any station until all shipping cards and "Inflammable" and dome placards have been removed.

On account of danger of fire from sparks and other causes, cars loaded with commodities shown in list following, must be placed at least 10 cars behind the engine:

Alfalfa Meal	Oil	Sewing Machines	Silk
Pianos	Emigrant Movables	Paint	Wagons
Hay and Straw	Furniture	Wool	Oakum
Vehicles	Hemp, Jute and	Automobiles	Cotton
Varnish	Sisal Fibre	Rubber	Turpentine

865 (B). Cars designated below must be handled in rear of train, and next to caboose in the order named:

- Cars with emergency drawbars;
- Outfit cars;
- Emigrant movables;
- All wooden underframe cars;

Any car tagged with Form 4725 reading, "Handle only at rear end of train." Live stock must be handled in head end of train when practicable, and stock cars loaded with scrap, boards, engine wood, long rods, bolts, or any commodity which might work out of openings in sides or ends of car, must not be moved until these openings are properly slatted.

Cars with drawbars out, not containing perishable freight or live stock, must not be handled in revenue trains, but must be set out at first side track, except when a car has drawbar out of one end and can be handled in rear of train by good drawbar on other end, it may be taken to nearest repair point.

879 (R). On Beatrice and Stromsburg Branches, helper engines must be cut in on head end of train.

887 (R). On passenger trains, air test as required by Air Brake Rules 1051 and 1051 (A) must be made at the following points:

- Summit —Eastward;
- Touhy —Westward;
- Loma —Eastward.

On freight trains, air test as required by Air Brake Rule 1051 must be made at the following points:

- Summit —Eastward;
- Touhy —Westward;
- Loma —Eastward.

888 (A). While passing through cities and towns, there must be no failure to keep sharp lookout ahead on both sides of the engine. Firemen must do this in preference to other duties, except that they must keep the fire in such condition that there will be no loss of efficiency of the engine.

898 (A). Enginemen will give two long and two short sounds of engine or motor whistle when approaching a train which is stopped on opposite track on double track, and when approaching a train which is on a siding on single or double track. On double track special care must be taken to sound warning signals, and particularly when trains or engines are approaching highway crossings from opposite directions at the same time.

Work trains unloading ballast on double track, must stop when a train is passing on the opposite track.
