**CENTRAL OF GEORGIA
RAILWAY
AND CONNECTIONS**

SECOND CENTURY OF SERVICE—STILL PROGRESSING

The stretch of roadway shown here is typical of Central of Georgia Railway's many miles of modern main-line in Georgia and Alabama—rock ballasted, 112-pound rails, protected with block signals. Commencing operations in the 1830's, with small ribbons of iron rail, dirt ballast and primitive fastenings, it has kept pace with all modern developments in roadway and equipment. It is ready to meet the transportation needs of a growing and developing section, rich in industrial, commercial and agricultural opportunities.

CENTRAL OF GEORGIA RAILWAY COMPANY

ONE OF AMERICA'S RAILROADS ALL UNITED FOR VICTORY

This modern 1800 mile railroad, well equipped, is making history. It is now moving the largest freight tonnage daily since it commenced operation more than one hundred years ago. With lines in Georgia, Alabama and Tennessee connecting with railroads operating into other States, it literally serves the heart of the Southeast. It is also the intermediate service route to and from points in the East, West, North and South. A dependable fast freight route with friendly service. Central of Georgia Railway service satisfies.
