POINTS OF INTEREST

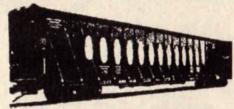

- 1 MP 462.7 Burbank Jct: Before DTC, the Burbank operator dispatched trains going to the San Joaquin Valley or the coast route by train orders. These Train orders where hung with string on poles and retrieved by engineers and conductors while the train was moving.
- 2 MP 455.5 Gemco Yard: Services General Motors beer, lumber, paper and other accounts.
- 3 MP 444.7 to MP 440.8 Santa Susanna Mountains:
 Our dramatic passage through Santa Susanna Pass
 takes us through a series of three tunnels, the
 longest of which is 7369 feet. These rugged
 mountains are reminiscent of the wild west and
 many Hollywood productions have been shot in
 these hills.
- 4 MP 407.8 Oxnard: The Ventura county railroad ties into our railroad just north of the Oxnard Station.
- 5 MP 370.7 Santa Barbara: The Moreton Bay Fig Tree, seen at the Amtrak Station, is said to be the largest fig tree in the nation. It was planted in 1877 and today its branches spread 160 feet. It is said that, at noon, more than 10,000 people can stand in its shade.
- 6 MP 358.9 Ellwood Oil Field: On February 25, 1942, Captain Kozo Nishino surfaced the Japanese submarine I-17 in the Santa Barbara Channel and fired 17 rounds from his 140mm deck gun toward the oil field, inflicting little damage. It was probably the only direct enemy attack on the continental United States in the past century.
- 7 MP 325.3 Point Concepcion: The light house was built in 1855 and is still in use.
- 8 MP 312 Point Arguello: One of the most famous shipwrecks occurred here on September 8, 1923. The U.S Navy's Destroyer Squadron 11 was steaming south at 20 knots when they encountered thick fog. Believing they had passed Point Arguello, the squadron commander ordered the turn into Santa Barbara Channel. Instead, seven of the destroyers were wrecked and 23 sailors died when they struck the rocks. It was one of the greatest peacetime Naval disasters.
- MP 301 Vandenberg Air Force Base: Launch site for military missiles and satellites. We see the first of several launch pads, called Satellite Launch Centers (SLC).
- 10 MP 299 Space Shuttle Launch Pad: The launch pad, SIC6, and the huge white, support building on the right was built to be the home of the military's Space Shuttle program. The large concrete air strip was constructed to handle the return of the Space Shuttle.
- MP 297.2 Tangair Siding: We will turn our train using the Tangair Y for our return trip to Los Angeles.

Map From 1961 Southern Pacific Company Coast Daylight Travel Brochure.

Power... San Francisco, October 26, 1988
Southern Pacific announced today that it will acquire 50 new diesel locomotives in 1989. These new units, costing over \$50 million, is part of a continuing program to upgrade its fleet with fuel efficient engines. The new equipment, along with the 110 units purchased since the Spring of 1987, represent the latest in microprocessor technology.

Cars... San Francisco, November 29, 1988
Southern Pacific announced it is acquiring 150 second generation centerbeam flatcars, costing over \$7.2 million, to transport lumber from the Pacific Northwest. Most of these 73', 100 ton capacity cars should be delivered by the end of the year. These cars, in addition to the 300 60' centerbeams acquired in 1986, reaffirm SP's commitment to the lumber industry.

Yards...San Francisco, November 8, 1988
Southern Pacific announced today a \$2.6 million expansion of its Armoudale Yard in Kansas City. This expenditure includes \$1.1 million to improve the combined SP & DRGW freight car operation and a \$1.5 million expansion of the intermodal terminal. The expansion will add 2 miles of track, 28 switches, additional parking for 575 trailers, and unloading equipment for either 89' conventional flats or double stacks.

SPLiberator is SP's customer EDI program or (Electronic Data Interchange). It is a series of software programs designed to provide you, our customer with a significantly faster and simpler approach to communicating with us and includes every aspect of your shipping transactions. SP Liberator is SP's commitment to make it easier and more economical for you to do business with us.

SP Liberator allows you to do the following:

- Generate or initiate shipping instructions electronically either via the personal computer or via the mainframe computer.
- Locate and trace shipments in real time.
- Access intermodal rates electronically.
- Speed up the processing of contract or tariff rates through our E-Mail program.

ADOPT-A-BRANCH

Adopt-A-Branch began as an employee involvement program in Los Angeles in 1985. It was started by conductors who were concerned about the future of branch lines and box car business. This program focuses on customer needs, opens lines of communication, and makes the conductor directly responsible for his customers transportation requirements.

This is accomplished by having the conductors take a day and meet with customers on their branch lines to see what can be done to better serve their local industries. After making customer contacts, conductors assemble that afternoon for a station meeting with the trainmaster, chief clerk, and a representative from the sales department. In a team atmosphere, operational and service problems are discussed and solved.

The success of the Adopt-A-Branch program comes from employees taking control and assuming personal responsibility to better serve customers. With this renewed commitment, their expertise is a valuable resource which benefits customers and makes Southern Pacific more competitive in the transportation marketplace.

Because of listening to our customers, Southern Pacific has won Modern Railroad's prestigious Golden Freight Car Award for the Adopt-A-Branch program. With our recent merger with Denver & Rio Grande Western, and a renewed personal commitment from all of our employees, the customer can only benefit.

We're "Off and Running" with service levels unmatched.
