If other than a Company Surgeon is called, he is to be advised that he is called for first attention only, beyond which the Company assumes no responsibility for his bill.

(Others.) When persons, not employees or passengers (for example, persons injured at crossings, trespassers, outsiders at work around depots or industries, etc.), are injured, if they are unable to care for themselves and if no friends or others are at hand to care for them, the nearest Company Surgeon should be called, or if he cannot be reached, the nearest other competent surgeon, which surgeon must be advised that he is called for emergency attention only, and that the Company does not assume responsibility for his bill. If trespassers are not taken charge of by friends or others, they should be turned over to the public authorities as soon as possible, and no expense incurred on behalf of the Company except the emergency attention above noted.

## TIME TABLE RULES — Continued

12a. Railroad crossings at grade are protected by interlocking signals (see General Rules 601 to 676), except as follows:

Sub-Div.	MP Location	Crossing	Remarks	Operated by
39	217.6	A.T.&S.F.		
39	219.3	Mo.Pac.		
39	246.1	St.L.&S.F.	Gate normally across St.L.& S.F. track	Trainmen
39	246.5	Mo.Pac.	Gate normally across Mo.Pac. track	Trainmen
39	236.1	A.T.&S.F.	Gate normally across A.T.&S.F. track	Trainmen
39	277.6	Mo.Pac.		
39	285.5	Mo.Pac.	Gate normally across Mo.Pac. track	Trainmen

All trains approaching these crossings will stop at point designated by Stop Board and not proceed until track is clear, except at crossings shown as equipped with gate, which will be normally set against foreign line track, at which points our trains will approach crossing at speed of not to exceed ten miles per hour and be prepared to stop before reaching the crossing in event it is occupied by foreign line train or gate is set across our track. After engine has passed over the crossing, speed of train may then be increased to maximum speed authorized under time table or other speed restrictions, over interlocked railroad crossings.

13. The following are auxiliary lines (see General Rules 14f and 14g):  
Herington—Sub-division 39      Tucumcari—Subdivision 4

14. Passengers may be carried on the following freight trains:  
Last section of local freight trains except in Texas.

15. When locomotives are temporarily detached from standing cars of a train en route on level track, trainmen will apply their air brakes. When on grades, the air brakes must first be released and hand brakes applied at the lower portion of the grade on which cars stand and in sufficient number to insure their standing.

16. Yard Limits are indicated by "Yard Limit" boards (see General Rule 93) at

16b. All trains and engines passing over Missouri Pacific crossing at Herington will come to full stop and send flagman ahead, and not proceed except on signal from their own flagman.

16c. All trains and engines will move under control between east and west outside switches in Herington yard. Eastward trains will approach El Paso-Amarillo Division junction in Herington yard under control expecting to find switch against them; also expecting cross over from Salina main line at Walnut Street occupied. Incoming eastward trains will be held responsible for any accident that may happen while approaching Herington passenger station.

16d. Connection has been made with A.T.&S.F. at MP 373-21 on the Dodge City Branch. Dodge City yard limit board is located at a point one-half mile east of this connection, which places A.T.&S.F. junction inside of yard limit, and trains moving in this territory will govern their speed accordingly, anticipating movement of trains on our main line between junctions referred to above and Dodge City proper.

16e. All trains will move under control between passenger depot and Amarillo Division junction at Tucumcari.

16f. Eastward first-class trains will run under control between east yard lead switch and passenger station at Sayre, looking out for Pan Handle Division trains entering yard.

39. Precautions to be taken to insure safe train operation during and following severe storms:

### OPERATORS

Notify Train Dispatcher promptly nature and extent of storm. Call Section Foreman, if not on duty. If so advised by Section Foreman, hold trains until it is known track is safe.

### SECTION FOREMEN

Have section patrolled day or night. Call Operator, if none on duty, and ascertain time trains will pass over section; time patrol as near fifteen (15) minutes ahead of train as possible. If necessary to hold train to patrol track, notify Operator to do so. Report promptly to Roadmaster and Train Dispatcher condition of track and speed limit. **DO NOT WAIT TO BE CALLED.**

### TRAINMEN AND ENGINEMEN

Bring train under control and proceed through territory affected by storm at a rate of speed that will insure safety; notify Train Dispatcher condition of track. If unable to communicate with Dispatcher or Section Foreman and there is a doubt as to it being safe to move, take siding and wait for instructions or until advised track is safe.

### TRAIN DISPATCHER

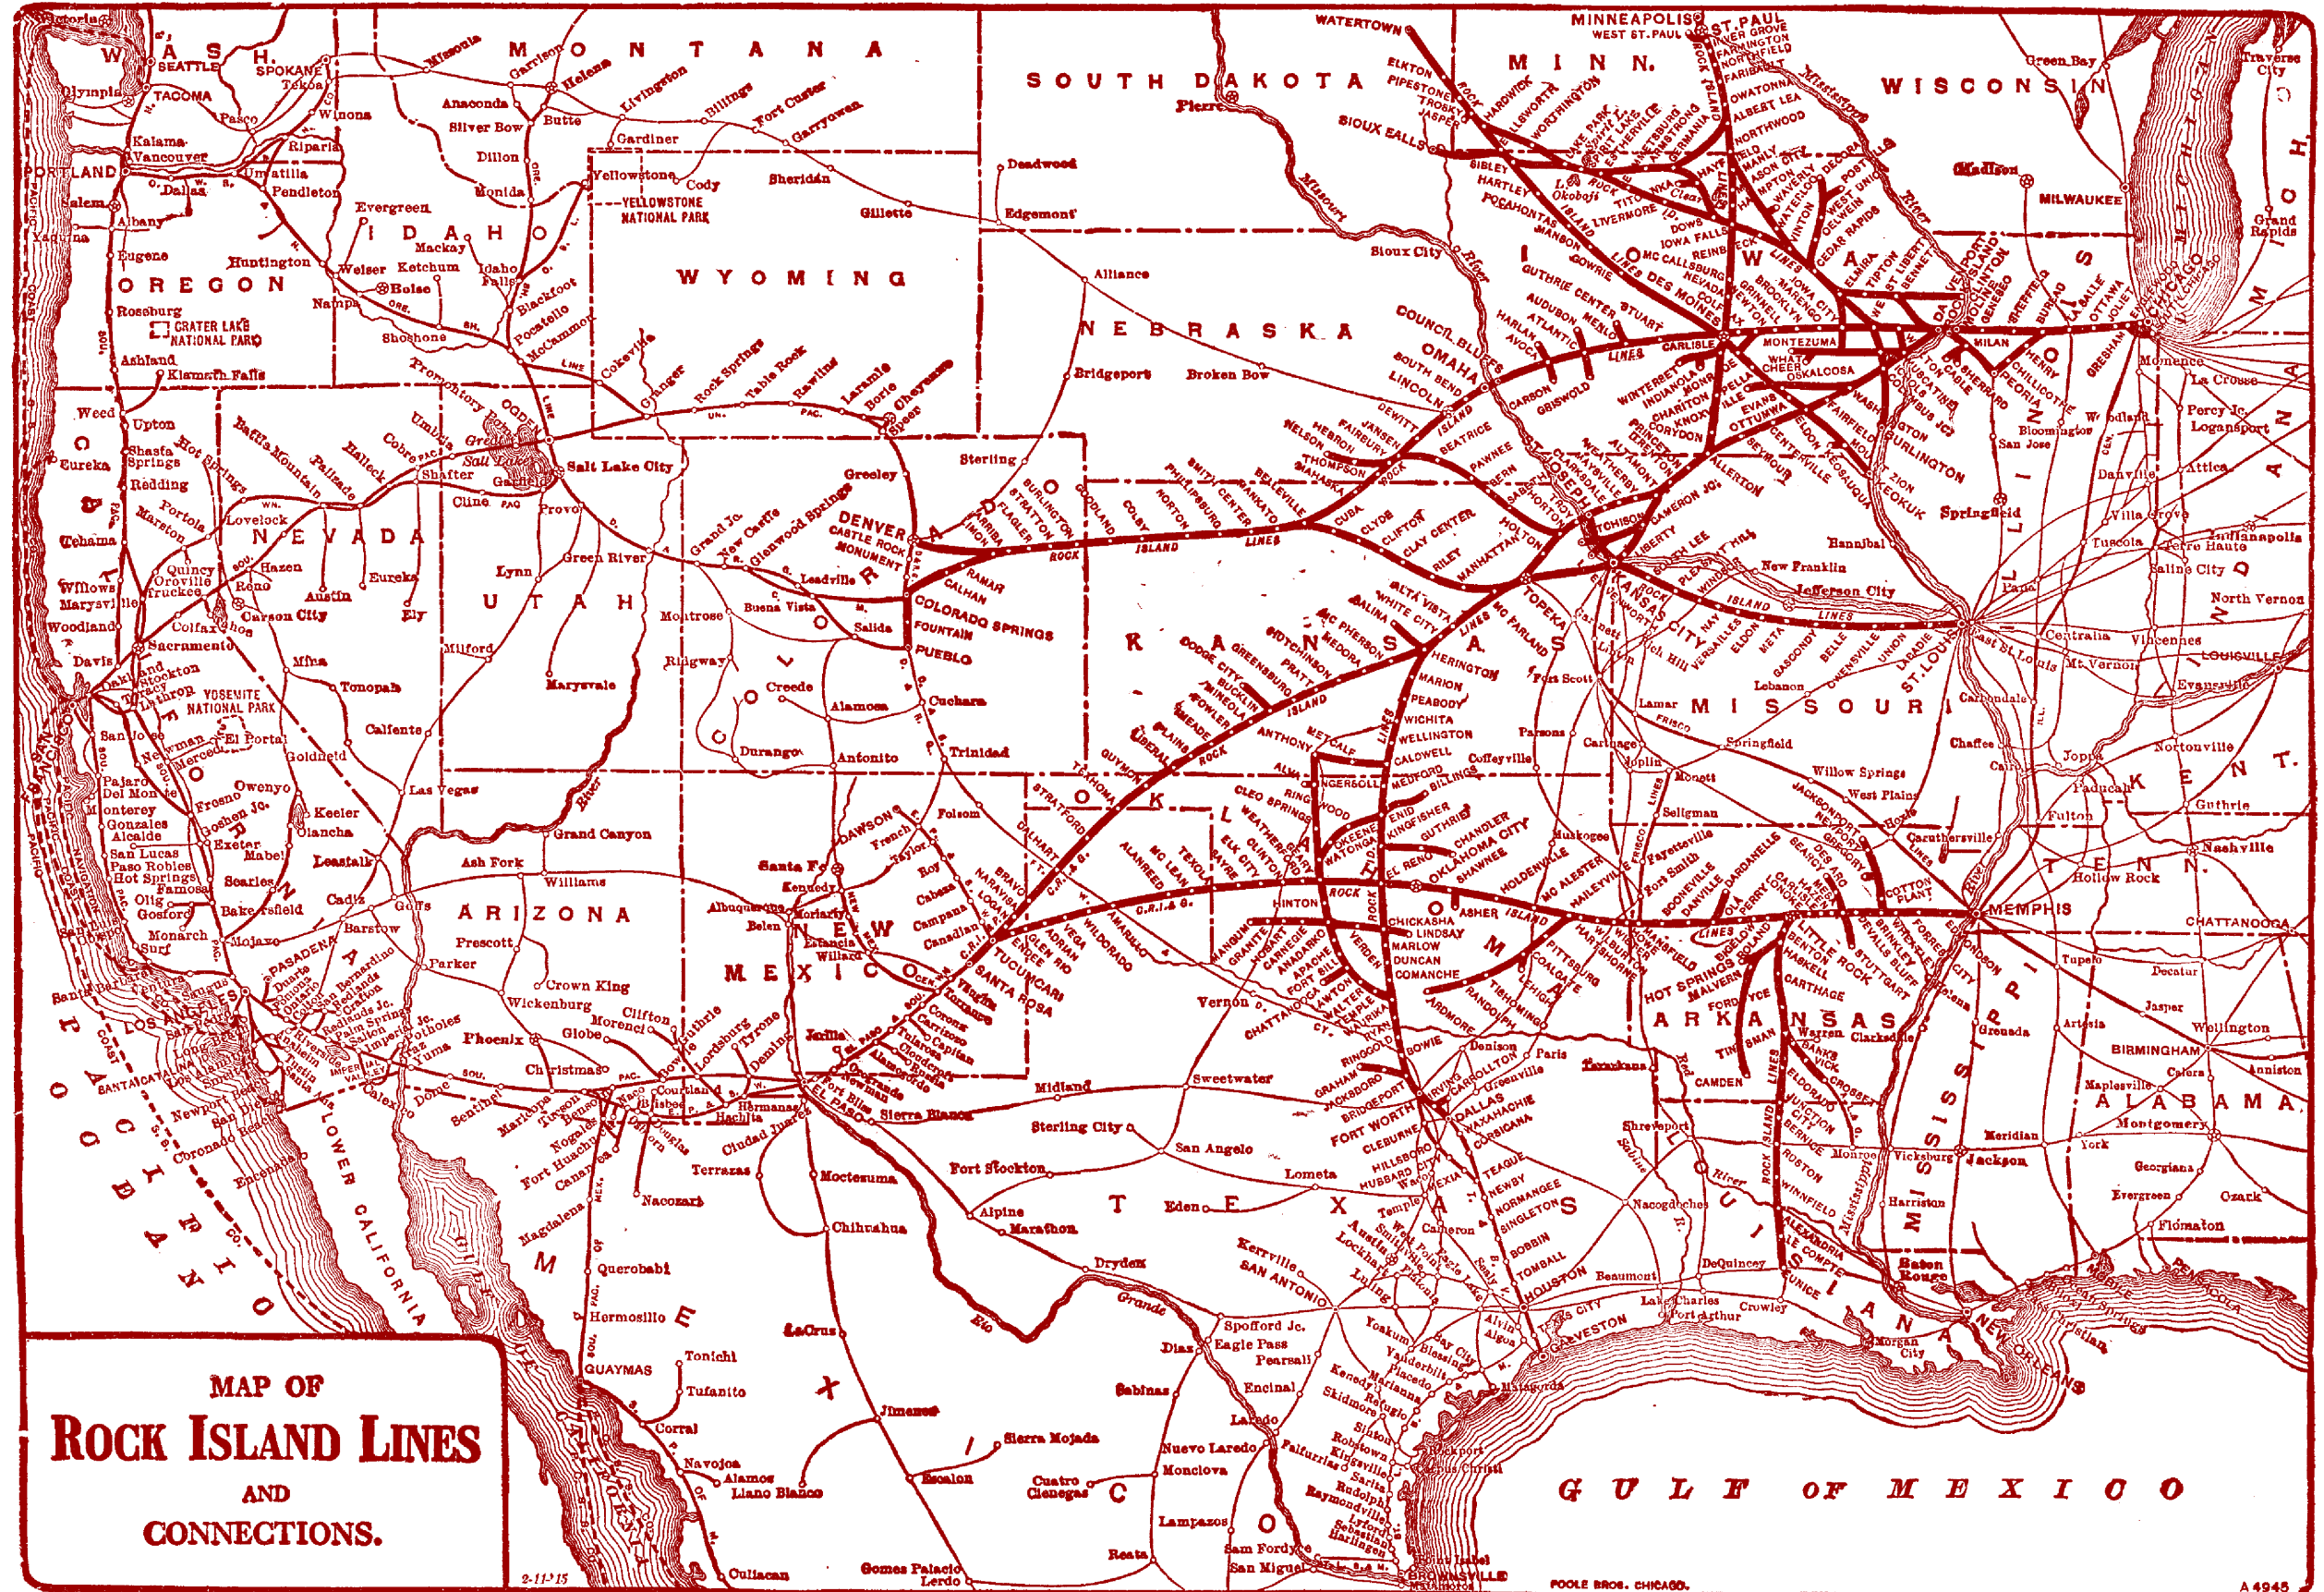

On receipt of report of storm, notify trains liable to be affected; see that Superintendent, Division Engineer, and Roadmaster are properly notified and that Section Foremen are patrolling track, and get all information necessary to protect safe movement of trains quickly as possible. If necessary, have Operator call Section Foreman.
