**Grand Central Terminal**  
AND  
**New York Central**  
AND  
**Hudson River Railroad**

**ELECTRIC DIVISION**

**TIME TABLE No. 9**

FOR EMPLOYEES ONLY

**Taking Effect 12.01 A. M.**

**Sunday, June 21st, 1908**

Superseding Time Table No. 8B, dated April 19th, 1908

STUDY THE SPECIAL INSTRUCTIONS  
AND NOTE ALL CHANGES

Employees will be governed by the Book of Rules of the Operating Department of the New York Central and Hudson River Railroad Company in effect January 19, 1908.

C. L. BARDO,  
Superintendent

A. R. WHALEY,  
Manager Grand Central Terminal  
General Superintendent, Electric Division

# SPECIAL INSTRUCTIONS

## GRAND CENTRAL TERMINAL AND ELECTRIC DIVISION

Employees will be governed by the Book of Rules of the Operating Department of the New York Central and Hudson River Railroad Company in effect January 19th, 1908.

**1. Explanation of letters and signs not covered by the Book of Rules of the Operating Department.**

‡—Stop to discharge passengers only.

†—Stop to receive passengers only.

K—Stop on signal to receive funeral parties for Kensico, Fairlawn and Mount Pleasant Cemeteries.

X—Harlem Division.

Y—N. Y., N. H. & H. R. R.

Z—Hudson Division.

On Four Track System trains having prefix ° are scheduled as follows:

Southbound,  
Track No. 1.  
Northbound,  
Track No. 4.

**2. Standard Clocks are located at**

New York City,  
Station Master's Office,  
Train Dispatcher's Office,  
Conductors' Room.  
Mott Haven Yard,  
Engine House.  
Wakefield,  
Engine House.  
High Bridge,  
Engine House

**3. Bulletin Boards are located at:**

New York City,  
Grand Central Terminal,  
Dispatcher's Office,  
Conductors' Room,  
Yardmaster's Offices,  
Engine House, N. Y., N. H. & H. R. R.  
Lexington Avenue Temporary Terminal,  
Conductors' Room,  
Station Master's Office,  
Motorman's Rest Room,  
Yardmaster's Office.  
Mott Haven Yard,  
Yard Master's Office,  
Engine House.  
High Bridge,  
Engine House,  
Passenger Station.  
Wakefield, Engine House,  
Motormen's Car.

**4. Register Books are located at:**

New York City,  
Grand Central Terminal,  
Train Dispatcher's Office,  
Station Master's Offices.  
Lexington Avenue Temporary Terminal,  
Conductors' Room.  
Melrose Junction Yard,  
Asst. Yardmaster's Office.  
Mt. Vernon

**5. Yard Limits, designated by signs, are located at:**

G. C. T.—South of yard limit signs located between 55th and 56th Streets.

Melrose Jct. Yard.—Tracks not shown in time table as main line tracks are yard tracks.

Within yard limits ALL trains must run at a speed that will admit of stopping within the vision of the engineer or motorman.

**6. Water Stations are located at:**

Grand Central Terminal.  
Mott Haven Junction.  
Wakefield.  
High Bridge.

7.

8.

**9. Use of Main Tracks. (See 470.)**

The use of tracks with the current of traffic is subject to change without notice.

Employees must familiarize themselves with location of tracks which are numbered from West to East, No. 1, No. 2, No. 3, No. 4, between 56th Street and Wakefield and between Walton Avenue (West of Interlocking Station "MJ") and Interlocking and Block Station 7.

They will be used as follows:

Tracks No. 3 and 4 by northbound trains.  
Tracks No. 1 and 2 by southbound trains.

Between Wakefield and Mt. Vernon and between Mott Haven Junction and end of 4 tracks at Walton Avenue double track is in use. Trains will keep to the right.

**Port Morris Branch:**

Double track is in use between "MX" tower and Westchester Avenue Yard. All trains will keep to the right between these points, unless otherwise directed. Single track is in use between Westchester Avenue Yard and Port Morris under the following rules: From 6.30 A.M. to 7 P.M. (except Sunday), Port Morris switch engine is superior to all trains. From 7 P.M. to 6.30 A.M. (including Sunday), Melrose Junction switch engine is superior to all trains. From 6.30 A.M. to 7 P.M. (Sunday only), Melrose Junction switch engine is superior to all trains.

**10. TRAINS NOT SCHEDULED HEREIN will run extra without train order. WORK EXTRAS South of Mott Haven Junction will run as directed by train orders.**

Rules Nos. 72 and 73 of the Book of Rules of the Operating Department will not apply on the Electric Division south of Mott Haven Junction. Regular and Extra trains south of Mott Haven Junction will proceed in accordance with signal indications. Storage Trains will proceed when signals are at proceed without waiting for schedule time.

**11. EXTRA TRAINS may run ahead of second-class trains.**

12.

**Block Signals.**

A train running against the current of traffic, between 56th and 106th Streets, will not pass Block Station 206 at 86th Street without a "proceed" card.

Automatic Block Signals are in use from 106th Street Interlocking Station to Mount Vernon and from Mott Haven Junction to Interlocking Station 7.

Controlled Manual Block Signals are in use from 56th Street to 106th Street Interlocking Station.

**16. Signals at Junctions.**

(See Rules No. 98 and No. 507, Book of Rules of the Operating Department, in effect January 19, 1908.)

Location: Mott Haven Junction.

Melrose.	High Bridge.
Woodlawn.	Interlocking Station "BN"
Wakefield.	Interlocking and Block Station 7.

**17. Signals at Draw Bridges.**

(See Rule No. 98 and No. 507, Book of Rules of the Operating Department, in effect January 19, 1908.)

**18. Signals at Railroad Crossings at Grade, Interlocked.**

(See Rule No. 98 a, Book of Rules of the Operating Department, in effect January 19, 1908.)

LOCATION.	RAILROAD.
Mott Haven Jet.	Electric Division, New York Central.
Melrose—Port Morris Branch.	Electric Division, New York Central.
Woodlawn Junction—N. Y., N. H. & H. R. R.	

**19. Trains running over other divisions or railroads** are subject to the rules of such division or railroad and all concerned must provide themselves with copy of such rules and current time tables.

**GRAND CENTRAL TERMINAL YARD.**

450. Enginemen and motormen must not accept signals 133, 136, 160 or 170 until it is known that the starting signal from the track they are leaving is at proceed.

Switch indicators are placed at the south or facing point of slips leading from Tracks Nos. 16, 17, 18, 19, 20 and 21, which operate in connection with these slips. When no light is shown the right of way is clear to signal 160. If a yellow light is shown the switches are set for one of the side tracks, and enginemen will have their trains under full control until the side track is seen to be clear. The route by way of either of these side tracks is to be used only in case of emergency.

**LEXINGTON AVENUE TEMPORARY TERMINAL.**

Enginemen must not proceed from the station tracks unless the dwarf signal located at the fouling point of the track which such train occupies is in the proceed position.

Special attention is called to the location of the dwarf signal located between the inbound ladder and track No. 2, yard 1.

The dwarf signal (No. 5) located between the inbound and outbound ladders, south of interlocking station "C," controls outbound movements.

**Examinations.**

451. Employes running over the Electric Division will pass examinations on Rules of the Operating Department, also on special instructions and signal rules contained herein, before attempting to discharge any duties requiring such knowledge.

No engineman or motorman will be permitted to operate a train through or in the tunnel in control of said engine until after he has made twenty-five trips over each track through said tunnel, being one hundred trips in all, under the pilotage and instruction of an engineman or motorman who has had experience of at least two years in operating trains through said tunnel, and until he has passed examination on rules, vision, color-sense, hearing and location of signals. No fireman helper or operating inspector will be permitted in service through the tunnel until he has made twenty-five trips through the tunnel on each track, each trip to bear the endorsement of the engineman or motorman, and until he has passed examination on rules, vision, color-sense, hearing and location of signals.

No engineman or motorman will be permitted to operate an electric locomotive or multiple unit controlled train over the Electric Division until he has made at least twenty (20) trips on electric locomotives and twenty (20) trips on multiple unit controlled trains under the pilotage and instruction of a qualified motorman, and such motorman must sign his name on blank prepared for that purpose opposite each trip.

**Protection of Trains.**

452. Rule No. 14-D and E of the Book of Rules of the Operating Department will not apply on the Electric Division. When flagman goes back to protect the rear of his train, as per rule 99, he will remain out until picked up by following train.

The rear trainman must remain on the rear platform of the rear car on north-bound and south-bound trains between Grand Central Terminal and 56th Street, and at the rear of the train north of 56th Street, ready to protect his train in case of emergency.

Unusual precaution must be taken between Grand Central Terminal and 58th Street, especially when the vision is obscured. Enginemen must run with the utmost caution.

Engines in yards or on sidings must stop before fouling other tracks unless switches are set for them to proceed, and cars must always be left with sufficient clearance between tracks, with brakes set on head and rear ends to hold the cars where they are stopped.

Should inspectors release the brakes for inspection or repairs, such inspector must know that brakes are applied before he leaves the cars.

When Motormen test air brakes, before taking out a train, they will also test the Emergency Air Brake Attachment on the master controller, to make certain that this device is in working order.

**Emergency Tunnel Rule.**

452a. In the event of an irregularity or accident occurring to a train in the Park Avenue tunnel, which in any way endangers the comfort and safety of the passengers or train, notice must be given promptly to the Motorman or Engineman, who will proceed with the train, if it is safe to do so, to the nearest block station or to the first platform opening to the street, if it is necessary to discharge passengers.

If the emergency should be of such a nature as to require the power shut off, the Motorman or Engineman will sound the following whistle signals as a notice to Signalmen to have the power cut off:

Track 1,	— — — —
" 2,	— — — —
" 3,	— — — —
" 4,	— — — —

Motormen and Enginemen will be governed by the note shown on page 30 of the book of rules governing the operating department in the sounding of these emergency whistle signals

If a train is on a descending grade, it may be possible to proceed without power to a point at which passengers can be discharged.

Signalmen hearing these whistles will at once communicate with sub-station No. 1 and order the power shut off of the track affected at once and immediately report the conditions to the Train Dispatcher, who will immediately notify the Lead Dispatcher

It will be the duty of the Conductor, or, in his absence, of one of the members of the crew, to make a report of the occurrence to the Superintendent promptly so that necessary relief measures for the safety of the passengers and train can be immediately adopted.

Sectionmen, Patrolmen, Signal Maintainers, or other employes hearing these distress signals, will at once repair to the point and render any assistance within their power. If the pipes carrying the transmission cables are involved, this fact must be reported to the load dispatcher promptly so that the power can be shut off.

Should there be no means of communicating with the Motorman or Engineman, personally, three distinct blasts of the air whistle will be sounded, and, in addition, the Conductors' brake valve used to stop the train if necessary.

## TRAIN CREWS AND ALL CONCERNED.

### Electric Traction.

453 Who ever orders current to be cut off third rail must state what tracks are affected.

454 When two or more electric trains have been stopped on the same track short distances apart, power must be used on but one train at a time when starting, and only then after the preceding train has been under headway thirty (30) seconds.

If more than two electric locomotives are coupled together, power must be used on only two (2). Not more than seven (7) motors must be working on any one multiple unit train.

455 Enginemen leaving their engines at roundhouse or terminals (or temporarily along the road), must leave the reverse lever in the center and the cylinder cocks open and Motormen will check Electric Locomotives.

455-a Wooden chocks have been provided on track O at 54th Street, and track No. 5, Grand Central Terminal, Yard 3, and also on the storage tracks in Lexington Avenue Terminal, where motors are laid up. It will be the duty of motormen and motormen's helpers to place the chocks securely under the forward wheels of these motors before leaving them. All motormen and motormen's helpers who take motors from these tracks will observe that all chocks have been removed on both sides before they undertake to move.

Yard Masters will see that this rule is observed.

456 Where water is reasonably free from salt and acid, as ordinarily found during a freset, an electric locomotive can run through 12 or 15 inches, measured from the base of the rail, providing, the cars are not in the water longer than the time consumed in passing through about 1,000 feet.

457 End doors of Motor and Trailer cars must be left unlocked and the sliding doors on both sides of these cars must be left open and flap doors up when cars are in service; with the exception of front doors and vestibule doors of leading car in the train where Motorman and Inspector are stationed. These doors must be kept closed but not locked, and the curtain drawn on door between Motorman's vestibule and car.

An inspection must be made of each train before leaving terminal to know that the doors are properly adjusted and in good working order, and that everything else about the car is in proper condition.

458 Motormen and Helpers must at all times, when running, remain in their respective places on the locomotive, viz., right and left front end.

459 No person will be allowed in Electric Locomotives or in the front vestibule of Multiple Unit trains except those in charge of operation of same and those who have passes signed by the proper official. All employees whose duties require their presence on this equipment can secure passes upon request to the Superintendent. Motormen in charge must insist on seeing passes on each trip.

There must not at any time be more than six (6) persons in an Electric Locomotive or four (4) persons in vestibule of Multiple Unit train, including motorman, helper and inspector.

460 The overhead trolley on electric locomotives must not be used between 50th Street and 138th Street. The cut out cocks of overhead trolley immediately under the trolley should be kept closed except where necessary to use the overhead shoe, and helpers should in no case open them except when told to do so by the motorman, so there will be no possibility of trolley raising accidentally.

The cut out cocks under the operating valve should always be open, and in every case where cut out cocks are found closed cut out cocks underneath both the operating valves should be opened before either of the cocks are opened underneath the trolley. Failure to follow this latter instruction may possibly result in the raising of a trolley where it is not desired to have it lift and be the cause of tearing it off.

460a When trains are stored at terminals or other points brake valve handles must be removed and air compressor switches cut out.

461 The practice of sanding the tracks in the Grand Central Station train-shed has been discontinued.

Motormen, Enginemen, Conductors, Trainmen and all others concerned, will be governed accordingly.

462 Track No. 12 in the yard at Wakefield will be used for the purpose of testing cars during the hours of the day, and when necessary to be used for other purposes, Conductor and Engineman or motorman must know that track is not being used for testing purposes and that there is proper clearance from cars standing on connecting tracks.

463 Attention of employees is called to the danger existing in resting or walking on the third rail, which MUST be considered as energized within the Electric Zone. Tracks must be kept clear for third rail shoe clearance and employees will advise at once where negligence is observed. Brake shoes, parts of machinery or locomotives, and cars, wire wound hose, etc., must be kept in places provided for that purpose and nothing of any metallic nature whatsoever shall be placed where it is liable to come in contact with the third rail or overhead working conductors.

Care must be constantly exercised to guard against loss of life or property.

The general rule appearing in the Book of Rules of the Operating Department reading as follows: "AVOID STEPPING, SITTING OR WALKING UPON OR BRUSHING AGAINST THE THIRD RAIL. While the energized rail is protected by sheathing, there is always chance of shocks because of the presence of water, brake-shoe dust, derangement or imperfections of the sheathing. Employees should caution passengers and the public in accordance with the above rule," and other instructions are issued solely for the protection of employees as well as patrons and they MUST be observed to the letter.

464 Great care must be exercised in switching movements in the Grand Central Terminal Yard, Lexington Avenue Temporary Terminal, at Mott Haven Junction and in Mott Haven Yard to guard against personal injuries occurring by reason of coming in contact with the uprights supporting overhead structures that have recently been built for the purpose of carrying transmission lines.

465 Overhead supports for the third rail have been placed in the yards at Mott Haven, and bridge warnings have been installed.

Employees will inform themselves respecting the location of the overhead supports and exercise great care to avoid injury to themselves and others.

466 In passing over the Electric Division, care must be exercised to have poker and other tools on the engine kept in their proper places to avoid falling from the engine. Short circuits are liable to occur that might result in injury to employees and damage to property.

467 Motor and trailer cars are equipped with four heater switches distributing equal amounts of heat.

When the temperature of the outside air is above 50 degrees Fahrenheit, the electric heaters will not be used.

When the temperature is between 40 and 50 degrees, the first switch will be closed.

When between 30 and 40 degrees, the first and second switches will be closed.

When between 15 and 30 degrees, the first, second and third switches will be closed.

When the temperature of the air is below 15 degrees, all four of the heater switches will be closed.

467-a The following instructions will be observed in the handling of electric lights, fans and gas lamps in all Multiple-unit equipment on this Division:

During the daylight hours the electric lights will be turned on in the Lexington Avenue Train-shed immediately before the gates on Canceuse are opened, and will be extinguished again as soon as the train passes out of the tunnel.

Electric fans in all Multiple-unit trains must be kept in operation on all parts of the Electric Division whenever the temperature in the cars is such as to require the use of the fans. In passing off the electric circuit, fan switches must be withdrawn and replaced again when the trains are handled by electric power.

In addition, one gas lamp at each end of the car next to the door will be lighted as above and turned down. These will also be extinguished during the daylight hours as soon as the train passes out of the tunnel.

During daylight hours, electric lights and two gas lamps must be turned on in all Multiple-unit trains while passing through the tunnel in both directions.

Motormen will be held responsible for the proper operation of the following switches on the Multiple Unit cars:

Main Switch.

Air Compressor Switch.

Controller Switches on Platform and Switchboard.

Headlight Switches, to include those on both platforms of the car on which the headlight is operated.

Trainmen will be held responsible for the proper operation of the light, heat and fan switches.

**468. For having power cut off third rail for construction and maintenance work:**

1. Any person requiring power cut off a third rail must obtain permission from the Superintendent of the Electric Division, or the Chief Train Dispatcher representing the Superintendent. The Superintendent of the Electric Division or the Chief Train Dispatcher will notify the Superintendent of Power, or the Load Dispatcher representing the Superintendent of Power, giving the details as to the track to be cut off, hour and duration of time required, and name of the person who will be in charge of the work. The Superintendent of Power will be responsible for the handling of jumpers and switches.

2. Immediately before cutting power off the third rail, the Load Dispatcher will advise the Chief Train Dispatcher that rail is to be killed.

3. When the work is completed, or the time has expired, the person who asked to have the power cut off must report the third rail ready for power to the Chief Train Dispatcher. The Chief Train Dispatcher will notify the Load Dispatcher that the third rail is ready to be made alive. The Load Dispatcher will then order current put on and will notify the Chief Train Dispatcher as soon as power has been put on.

4. Portable jumpers must not be used for the purpose of moving trains when any of the contact shoes are in contact with the third rail, except when authorized in writing by the Load Dispatcher or Chief Train Dispatcher. This is not intended to interfere with the use of portable jumpers to move motors or trains over gaps when not in contact with the third rail.

5. The Chief Train Dispatcher can at all times obtain information as to the condition of power on third rails from the Load Dispatcher.

6. The Load Dispatcher's telephone number is 2563 Melrose, and he may also be reached on the Load Dispatcher's Telephone System, and this company's General Service Telephone.

**469. To disconnect third rail in case of emergency.**

In case of emergency, making it necessary to cut off the electric current from the third rail, telephone to the nearest sub-station and immediately notify the Train Dispatcher.

The sub-station locations and telephone numbers are as follows:

50th Street, Sub-station No. 1.....	1462 Plaza
Mott Haven, Sub-Station No. 2.....	2735 Melrose
Kingsbridge, Sub-Station No. 3.....	22 Kingsbridge
Bronx Park, Sub-Station No. 7.....	1679 Tremont
Port Morris Power Station.....	2563 Melrose

469a. After the third rail has been killed on account of emergency, it will not again be made alive until the Load Dispatcher has received word from the Superintendent of Cables, his Foreman or some other responsible party, that it is safe to put current on. If the trouble has been due to a wreck, permission must be received from the Superintendent or Train Dispatcher of the Electric Division, before putting current on.

469b. Telephones on the sub-station party line connecting the sub-stations, Circuit Breaker Houses, Signal Stations and Passenger Stations must not be used for private conversation.

Messages of highest importance to life and property are liable to be interfered with. (See page 39.)

**Unsafe Track.**

(See Rule 107 of Book of Rules of the Operating Department, in effect January 19, 1908.)

**Trains Parting, Etc.**

470. When trains break apart or anything of an unusual nature occurs, the Train Dispatcher must be notified at once giving the exact situation.

Conductors, Enginemen, Motormen and Trainmen will be expected to exercise their very best judgment in conforming to the rules for the safety of passengers, protection of trains, and avoid all unnecessary delays.

**Enginemen.**

471. Come from round house with fire in such condition that a heavy smoke will not be emitted. The barring of fires in and around the station is strictly prohibited.

Bituminous coal must not be used. If, in case of emergency, it becomes necessary to replenish the fire, only coke or anthracite coal will be used.

Engine decks must not be swept or washed off while engine is in the train shed. Care must be used so that refuse, oil and coal will not be thrown on the platforms.

**Drawbridge Tenders.**

473. Report to and receive instructions from the Supervisor of Structures, and will obey orders from the Superintendent concerning the movement of trains.

Be familiar with the statute laws with relation to drawbridges on railroads, and observe the special rules relating to the drawbridge under their charge. Provide themselves with a copy of the current Time-table, and report any unusual delay to any train, with an explanation of the cause. Keep a record of detentions to all vessels, showing name, date, length of delay, and cause.

Know the time when each regular train should pass the point where they are stationed, notice all signals displayed for sections of trains, and keep a vigilant watch for extras. Do not rely upon whistles or bells.

**Tunnel Flagmen.**

474. Be provided with proper signals, and if track is obstructed, or from any cause the safe operation of trains is affected, stop signals must be promptly displayed, and warning given approaching trains. Torpedoes must be used in addition to regular stop signals. This must always be done without reference to block signals.

Protect the rear of any train stopped in the section regardless of the action of the flagman of train or position of block signals.

If a train passes a home signal at stop in the Park Avenue Tunnel, the train must not be allowed to proceed until the flagman knows the signals are clear, or until he knows the engineman has received proceed card.

**Accident Reports.**

475. All accidents must be reported by telegraph as soon as possible, as follows:

North of the Harlem River Drawbridge, to the Train Master at Mott Haven and the Superintendent at Grand Central Terminal; south of the Harlem River Drawbridge, to the Train Master and Superintendent, Grand Central Terminal

Reports will be made as follows: Form 111 by the conductor or, in his absence, by the engineman or motorman, and addressed as above; this Form to be followed by a report, Form TA-1, by train mail, a copy of which must be made out by both the conductor and the engineman or motorman of the train or trains involved.

In the event of personal injury, whether caused by a train accident or by trespassing on the right-of-way, report, Form CCA-1, must be sent by telegraph as above, by the conductor, motorman, foreman, or other employe who is familiar with the facts of the case.

If train crew is involved, report, Form CCA-10, must be made by both the conductor and the engineman or motorman, giving full information. This report must be sent by train mail; all Personal Injury reports, forwarded as above, to the Superintendent only.

In the event of a train accident involving injuries to passengers, conductors will obtain their names and telegraph the information to the Superintendent's office at the Grand Central Terminal, showing the disposition made of the injured. If impossible to forward this information by telegraph, he will arrange to have the message taken to the nearest telephone by carrier if necessary, and transmitted from there to the proper offices, bearing in mind that his first thought must be for the protection of his train, and then for the comfort of the passengers. He must not leave the train under his charge until this has been fully accomplished. The information desired is for the benefit of the relatives of the injured and officials. Conductors will obtain complete information and furnish same to the motorman or engineman for his information.

476. Where contact shoes are broken on electric locomotives or motor cars in regular service, a report must be made by the Motorman to Mr. C. H. Quereau, Superintendent of Electric Equipment, immediately upon arrival at a terminal. The report to state the time the incident occurred, the obstructions encountered and the precise location.

477. Motormen and enginemen must know the indication of all fixed signals before passing them.

On all electrically operated trains, the operating inspector or motorman's helper will call the position of all signals to the motorman.

478. Motormen must observe all rules and special instructions affecting Engineman. Helpers must observe all rules and special instructions affecting Firemen.

481. Conductor of any train or Engineman of a light engine using a facing point switch on main track must know that such facing point switch is closed and set for main track immediately when train is into clear and before signals are cleared.

482. All cars equipped with air brakes must be placed first in the train and air used on all of them.

Whenever freight trains are operated with power or train brakes not less than 75 per centum of the cars in such train shall have their brakes used and operated by the Engineer of the locomotive drawing such train and all power braked cars in every such train which are associated together with the said 75 per centum shall have their brakes so used and operated.

483. Two or more N. Y. C. & H. R. R.R. Electric engines or Electric and Steam engines must not be coupled together for movement over any part of the Electric division except in case of great emergency upon the order of the Superintendent.

484. When cars attached to a locomotive are being placed in either train shed at Grand Central Terminal, they must be brought to a stop not less than ten (10) feet from the bumping block, or from cars that may be standing on that particular track.

After cars have been stopped if it is necessary to place them closer to the bumping block or the other cars, hand or lamp signals must be used in directing the movement, and the Conductor, Engineman (or Motorman) and the crew must have a complete understanding of the distance cars are to be moved.

Cars must not enter train shed under their own momentum, unless Conductor knows that air pressure is sufficient to make stop with use of safety air devices or "back up" air hose, which must in all cases be operated by the Brakeman stationed on the rear platform.

The Conductor must be located on the station platform within close view of the rear of the train, and if stop signal is not given by the rear man in season to admit of the stopping of the train as directed, Conductor must give the stop signal to the head man at once.

When coupling cars in the yard, brakes must be set on the last cars to prevent pushing them by a fouling point, and the same care and understanding exercised as outlined above.

Conductors will be held responsible for any violation of these instructions, and know that every member of the crew understands them.

485. Baggage will not be handled at Claremont Park, 183rd Street and Wakefield.

H. LUCY,  
J. F. MOORE, } Train Masters.

C. L. BARDO,  
Superintendent.  
R. E. SLATER,  
Assistant Superintendent.

G. H. WILSON,  
Chief Train Dispatcher.
