Phones—Office 1015-W; Res. 1015-R.
- TOLEDO:** E. C. Unckrich, 416 Colton Bldg.
Phone—Office Main 2505.

SPECIAL INSTRUCTIONS

Special instructions prefixed by letter or number modify Rules for the Government of the Operating Department with corresponding letter or number, unless otherwise specified.

A1. OTHER RAILROADS.

Tracks are used as follows and M. C. time-table and rules govern unless otherwise specified:

M. C. trains use N. Y. C. tracks between Alexis and Toledo. N. Y. C. time-table and rules govern.

M. C. trains use I. C. tracks between Kensington and Chicago. I. C. time-table and rules govern.

N. Y. C. trains use M. C. tracks between Porter and Calumet Park.

M. C. trains use I. H. B. tracks between Ivanhoe and West End of Gibson Yard, and between Calumet Park and U. S. Yards. I. H. B. time-table and rules govern.

M. C. trains use N. Y. C. tracks between HF and Oliver Yard, South Bend. N. Y. C. time-table and rules govern.

M. C. trains use N. Y. C. main track between Manchester and Manchester Jct. N. Y. C. time-table and rules govern.

Ypsilanti Branch ends at cross-over leading to N. Y. C. at Hillsdale and track west of this cross-over will be operated under N. Y. C. yard rules and will be known as the Ypsilanti Spur. The normal position of the Ypsilanti Spur switch will be for that track. N. Y. C. time-table and rules govern.

P. M. trains use M. C. tracks between Mershon and Paines, and between North Lansing and MA Tower.

M. C. trains use P. M. tracks in Lansing between Grand River Ave. and Turner Ave.

M. C. trains use G. T. W. tracks in Battle Creek between Elm St. and Main St.

N. Y. C. and C. C. C. & St. L. trains use M. C. tracks at Jackson.

P. R. R. passenger trains use M. C. tracks and passenger station at Kalamazoo and Mackinaw City.

G. T. W. trains use M. C. tracks between MX Tower and Mershon.

D. & M. trains use North Water St. Belt Line between D. & M. Saginaw River Bridge and Bay City E. S., and M. C. tracks and passenger station at Cheboygan. Trains must approach Cheboygan passenger station with caution, expecting to find D. & M. trains occupying the main track.

I. H. B. and N. Y. C. trains use M. C. tracks 3 and 4 between Columbia Ave., Hammond, and Calumet Park.

B3. LAWS AND REGULATIONS.

When a train or engine crew has been on duty 14 hours, the conductor must notify the Superintendent by wire.

DEFINITIONS.

Passenger Train—any train carrying passengers.
Passenger Extra—for passenger train extra.

1. STANDARD TIME.

Eastern Standard Time is in use between Detroit and East End and on all branches of Detroit and Michigan Divisions.

Central Standard Time is in use between East End and Chicago and on all branches of West Division.

2a. WATCH INSPECTION.

The watch of each employe subject to inspection must be presented to a designated inspector between the 15th and 25th of each calendar month, that its performance may be noted and record made on Watch Inspection Certificate and on Watch Comparison Registration Form by the inspector.

3. STANDARD CLOCKS.

3b. COMPARING TIME.

When enginemen of passenger trains are relieved at Jackson, Kalamazoo or Botsford, the outgoing engineman will compare watches with the incoming engineman, instead of with the conductor.

4. TIME-TABLES.

Detroit-Windsor Yard Time-Table governs the movements of trains and engines within limits defined therein.

6. LETTERS AND SIGNS.

"★"—See foot notes.

Detroit to Chicago

- B—Reduce speed to 10 miles per hour to insure safe delivery of U. S. Mail and Newspapers.
- C—Stops on signal to discharge passengers from points east of Detroit, and on signal to receive passengers for Chicago.
- D—Stops on signal to discharge passengers from points east of Detroit.
- E—Stops on signal to discharge passengers from Buffalo and beyond and receive passengers for Chicago.
- G—Stops on signal to discharge passengers from Detroit and beyond.
- H—Stops on signal to receive passengers for Hammond and Chicago.
- J—Stops on signal to discharge passengers from Buffalo and east thereof.
- K—Stops on signal to discharge passengers from points beyond Kalamazoo.
- M—Stops on signal to discharge passengers from Kalamazoo and beyond and receive passengers for Chicago.
- N—Stops on signal to discharge passengers from New York.
- P—Stops on signal to discharge passengers.
- Q—Stops on signal to discharge passengers from Detroit and Saginaw Branch.
- U—Stops on signal to discharge passengers from Detroit and beyond and receive passengers for Chicago.

Chicago to Detroit

- B—Stops on signal to discharge passengers from Chicago and receive passengers for New York.
- D—Stops on signal to receive passengers for Detroit and beyond.
- H—Stops on signal to discharge passengers from Chicago.
- N—Stops on signal to receive passengers for beyond Kalamazoo.
- P—Stops on signal to discharge passengers from Chicago and receive passengers for Detroit and beyond.

- Q—Stops on signal to receive passengers for Kalamazoo and beyond.
- R—Stops on signal to discharge passengers from Chicago and receive passengers for Kalamazoo and beyond.
- U—Stops on signal to receive passengers for Albany and beyond.

Detroit to Toledo

- B—Stops daily except Sundays and holidays to handle express.

Jackson to Grand Rapids

- B—Stops daily except Sundays to receive and discharge passengers and handle U. S. Mail.

Grand Rapids to Jackson

- C—Stops on signal week days to discharge passengers from Grand Rapids and receive passengers for Jackson and beyond and regular stop on Sunday.
- E—Stops daily except Monday to receive and discharge passengers and handle U. S. Mail.
- H—Stops on signal to receive passengers for Detroit.

Detroit to Mackinaw City

- B—Stops on signal to discharge passengers from Bay City and beyond.
- C—Stops week days to receive and discharge passengers and handle baggage, mail and express; on signal Sunday to receive and discharge passengers.
- E—Stops week days to receive and discharge passengers and handle baggage, mail and express.
- H—Stops on signal to discharge passengers from Detroit.

Mackinaw City to Detroit

- B—Stops on signal to discharge passengers from Saginaw and beyond and receive passengers for Detroit.
- C—Stops on signal to discharge passengers and receive passengers for Bay City and beyond.
- D—Stops on signal to receive passengers for Bay City and beyond.
- E—Stops on signal daily except Sunday to receive parcel post when any for dispatch.
- G—Stops daily except Sunday.

9. SIGNALS.

Lights on fixed signals, except signals of the color-light type, are not in use between Haires and A. L. Jct.

11. FUSEES.

A lighted fusee displayed from the side of an engine cab, by day or by night, indicates "Stop" to trains on the other main track, or tracks.

14. ENGINE WHISTLE SIGNALS.

Sound	Indication
(bb) Succession of short sounds	Relief engine required. To be sounded passing first two open stations after defect develops and operator or signalman must immediately inform the train dispatcher.
(cc) Eight long blasts	"Distress" and call for assistance. Sectionmen and other employes must go at once to the train making the call.

17. HEADLIGHTS.

When a train enters a siding to clear the main track for an opposing train and finds the siding occupied by another train or by cars which will obscure the headlight, a flagman must be sent ahead a sufficient distance to stop the opposing train until the main track is seen or known to be clear.

19. MARKERS.

Markers showing red to the rear and green (or yellow) to the front and side will be displayed to indicate rear of the train by night, except:

A red flag by day and a red light by night will be displayed to indicate the rear of the train on following branches:

South Haven	Kalamazoo	Ypsilanti
Lansing	Air Line	Midland

Caro, between Wenona and Bach.

Gladwin, between Wenona and Gladwin

Mackinaw, Trains 209 and 210, and extra freight trains.

By night, before a train fouls the main track when moving from a siding, the marker lights must show red to the rear. A following train must move prepared to stop unless the main track is seen or known to be clear.

D-20a. OMISSION OF GREEN SIGNALS.

The display of green signals will be omitted on two or more tracks.

21a. OMISSION OF WHITE SIGNALS.

The display of white signals will be omitted by extra trains. G. T. W. extra trains will display white signals between MX Tower and Mershon.

25. TRAIN AIR SIGNALS.

The conductor must promptly report to the Superintendent by wire all train air signal failures.

35. FLAGMEN'S SIGNALS.

The use of white light on engine is not required.

83. TRAIN REGISTERS.

Joliet.....	Telegraph office.

Conductor or engineman will register trains originating or terminating at register stations.

Operator will register trains not required to stop.

P. M. and G. T. W. trains will register at Mershon.

Operator at Paines will register M. C. and P. M. trains.

83d. CLEARING OF TRAINS.

Trains may leave the following stations without Clearance Form "A," when cleared as specified:

Main Line

Town Line: Westward trains on main track by train order signal, normal indication "Stop." Trains approaching on yard tracks must, in addition to the indication of the train order signal, receive a "Proceed" hand signal from the operator before fouling main track. Rule 221(A) governs.

East Yard: Eastward trains on main track by train order signal, normal indication "Stop." Trains approaching on yard tracks must, in addition to the indication of the train order signal, receive a "Proceed" hand signal from the operator before fouling main track. Rule 221(A) governs.

Jackson: Westward trains by train order signal and interlocking signal at Pearl St.

East End: Eastward trains on main track by train order signal, normal indication "Stop." Trains approaching on yard tracks must, in addition to the indication of the train order signal, receive a "Proceed" hand signal from the operator before fouling main track. Rule 221(A) governs.

East End: Westward passenger trains by train order signal.

Lake St.: Westward freight trains by train order signal and, in addition, a "Proceed" hand signal from the operator, before fouling main track; except when authorized by operator, Lake St., to use cross-over at west end of Westbound Classification Yard.

Porter: Westward trains coming off the N. Y. C., by interlocking signal.

Ivanhoe: Eastward freight trains coming off Gary Branch of the I. H. B. by interlocking signal.

Hammond, Columbia Ave.: Westward trains on tracks 3 and 4, by hand signal from switchtender.

Calumet Park: Eastward trains from Central Station, Chicago, or Chicago Yard, by interlocking signal.

Eastward trains coming off the I. H. B. by interlocking signal.

Westward trains using track 3 enroute to Kensington or Chicago by interlocking signal.

Toledo Branch

YD: Southward trains by home interlocking signal.

River Rouge Yard: Southward freight trains starting from River Rouge Yard, and southward freight trains cleared by interlocking signal at YD that have work at River Rouge Yard, must report by telephone to signalman at YD and obtain permission to proceed. Signalman at YD must obtain such permission from the train dispatcher.

Alexis: Northward trains by home interlocking signal. Northward yard engines and yard runs moving from Alexis to yard at Vienna Jct. must report to signalman at Alexis and obtain permission to proceed. Signalman at Alexis must obtain such permission from the train dispatcher. Conductors must report to train dispatcher when clear of main track.

Vienna Jct.: Trains leaving yard at Vienna Jct. via long or short lead in either direction, by verbal permission or "Proceed" hand signal from operator, who will obtain such permission from the train dispatcher. Train crews will obtain this permission direct from the train dispatcher during hours this signal station is closed.

Southward trains entering yard during hours this signal station is closed must use long lead. They must report to yardmaster before entering this track and to train dispatcher when clear of both main tracks.

Grand Rapids Branch

Jackson: All trains by train order signal and interlocking signal at Pearl St.

Rives Jct.: Eastward trains by train order signal.

Trains will not leave the following stations without Clearance Form "A":

Bay City Branch

North YardNorthward trains.
VassarAll trains.
SaginawAll trains.
Bay City E. S.Passenger trains.

G. T. W. and P. M. trains between Saginaw and Mershon will be cleared as follows:

SaginawNorthward regular and P. M. extra trains by Clearance Form "A;" G. T. W. extra trains by train order and Clearance Form "A."

MershonSouthward regular trains by Clearance Form "A;" extra trains by train order and Clearance Form "A."

G. T. W. trains between MX Tower and Saginaw will be cleared as follows:

MX TowerNorthward trains by home interlocking signal.

SaginawSouthward trains by Clearance Form "A."

Operators at MX Tower, Saginaw and Mershon will obtain permission from train dispatcher before clearing trains between those stations.

Caro Branch

VassarAll trains.

DRAW-BRIDGES.

Location	Stream	Signals
Calumet Drawbridge	Little Calumet River	Interlocking.
Signal indicating "Stop" may be passed after conductor or engineman has inspected track over bridge, and bridge locks and derrails at each end, and found all in proper condition.		
Michigan City	Trail Creek	Interlocking.
Saginaw	Saginaw River	Signals.
Bay City	Saginaw River	Signals and Smash Boards.

During periods when navigation is open trains and engines must stop before crossing Saginaw River Bridges.

St. Joseph	St. Joseph River	Signals.
St. Joseph	Morrison Channel	Signals.

Trains and engines must stop before crossing either bridge, then proceed on hand signals from bridge tender. Bridges will be locked open after last regular trains for the day until 5:30 A. M.

Instructions

When signal at a crossing is electrically locked, unlock the lock box and be governed by instructions therein.

*Hand signals from trainman at crossing will govern.

**Home interlocking signal indicating "Stop" may be passed on proper hand signal from trainman at crossing after conductor or engineman has received permission from signalman.

101. UNSAFE TRACK CONDITIONS.

On branches where a section gang may consist of less than a foreman and three (3) men, impassable or obstructed track will be protected as follows by Maintenance of Way employees:

By day a red flag drawn out between two staffs will be displayed at right angles with the track and five feet above rail level, and, in addition by night a red light, 3000 feet (30 telegraph poles) in each direction from the obstructed or impassable track; and 300 feet in advance of such signals two torpedoes will be placed on the rail two rail lengths apart. These signals will be placed on the engineman's side of the track, with the red signal clearly in his view for 1500 feet (15 telegraph poles). The obstructed or impassable track will be further protected by day by a red flag, and, in addition, by night a red light, 300 feet in advance of and adjoining the affected track.

Trains stopped by red signal must replace the torpedoes and proceed at Restricted Speed to the next stop signal and there be governed by signal or instructions from foreman in charge.

102a. PROTECTION OF TRAINS ON ADJACENT TRACKS.

When a train is stopped suddenly, engineman must at once display a lighted fusee from the side of the engine cab and see that a flagman goes forward at once. The fireman must perform this duty when necessary.

103. PUBLIC CROSSINGS AT GRADE.

Trainmen must flag trains or engines over following crossings:

- Wyandotte.....Vine St., Extension Track, light engines and switching movements.
- Monroe.....First St., northward main track, light engines and switching movements.
- Monroe (Monroe Br.).. First and Monroe Sts., trains and engines must stop and be preceded over crossing by a member of crew, who will flag trains across street in accordance with indication of traffic lights.
- Ypsilanti
Ypsilanti Branch... M-17, 2 miles west.
- Hillsdale.....Union St. over Ypsilanti Spur.
- Three Rivers
Air Line Branch.... All crossings where flashing light signals are in service, when signals do not operate.
- Kalamazoo Branch.. Mill and Fourth Sts., switching movements.
- Lansing
Old Lansing Branch.Saginaw and Turner Sts.; East Grand River Ave.; and alley north of Michigan Ave. viaduct.
- Albion
Lansing Branch.... North Huron, Superior, Eaton and Clinton Sts.
- Grand Rapids
Kalamazoo Branch.. Fulton, Watson, Butterworth, Emperor, Straight and Indiana Sts.—all movements on side tracks.
- Plainwell.....Bridge St., all northward movements except when northward interlocking signal indicates "Proceed."
- Constantine.....Centerville highway crossing south of station, all movements on side track.
- South Gary.....Georgia St., on Board of Education track, and on main track after coming off Board of Education track.
- Hartsdale.....Kennedy Ave., light engines and switching movements.
- Niles (So. Bend Br.)...Front St., trains and engines must stop and be flagged over crossing by member of crew.
- South Bend.....Western Ave. over M. C. Connection during hours crossing watchman is off duty. At night lighted fusee must be used.

Trains and engines must stop before moving over following crossings:

- Jackson.....Liberty St., on single track between East Ave. switches and OD Tower.
- Battle Creek.....D. T. & M. yard tracks, South Jefferson St. and Fountain St. (U. S. 12).
- Comstock.....U. S. 12, Spur to Consumers Power Co. 1 mile east. Trainmen will manually operate signals before moving onto crossing.
- Kalamazoo (S. H. Br.)..Willard St.; North St.; Westnedge St., also proceed with caution through station grounds.
- Jones.....Main St.
- Benton Harbor.....East Main St.
- South Bend.....Lincoln Highway (4857 feet north of NX-HF Tower).
- Wyandotte.....Mulberry St. Spur at intersection of Mulberry and Biddle Sts. Trainmen will operate traffic signals at the intersection as follows:
Turn control switch handle to left position to indicate "Stop" to street traffic. When movement over crossing is completed turn control switch handle to normal (right) position.

Manual Control of Highway Crossing Signals:

When switching or when trains or cars are left standing on the approach track circuit of a highway crossing signal, a member of the crew must operate control switches in accordance with instructions posted at the crossing or at control switches.

Control switches are located adjacent to the crossings, except at the following points:

- Willow Run.....Crossing of M-17 and Ford Industrial Track.
Control switch 700 feet north of crossing.
- Marshall.....Kalamazoo St. Control switches located as follows:
At switches on westward and eastward main tracks east of depot.
At depot.
At switch on eastward main track between Mulberry and Kalamazoo Sts.
- Battle Creek.....
Spencer St. Control switches at Lansing Ave. and at crossover east of crossing.
E. Michigan Ave. Control switches at crossover east of crossing, and at west switch of crossover at Grenville St.
Kendall St. Control Switch at Rumley Switch.
Angel St. Control Switch at Mutchler Coal Co.'s track.
- Lawton.....Main St. Control switch at depot.
- Michigan City.....Michigan St. Control switch near westward home interlocking signal at C. I. & L. Interlocking.
- Eaton Rapids.....Main St. Control switches at depot and at switch east of crossing.
- Nashville.....Main St. Control switch at depot.
- Hastings.....Broadway. Control switch at depot.
- Middleville.....Main St. Control switches at crossing and west end of depot.
- Three Rivers
(Air Line Br.).....Broadway and Fourth Sts. Control switch at Diamond.
- Lansing (Sag. Br.)...Hazel St. Control switches at switches north and south of crossing.
- Lake Orion.....South Broadway. Control switch at switch south of crossing.
- Roscommon.....Lake St. Control switch at depot.
- Wyandotte.....Oak St. Control switches at crossings of northward and southward main tracks.

104. SWITCHES.

Switches must not be lined for a diverging movement until the diverging train has been definitely identified and is complying with Time-Table speed restrictions for diverging movements over switches and crossovers.

Jackson: Trains and engines must receive "Proceed" signal from switch tender before fouling crossover switches east of passenger station.

Jackson Yard, East Ave.: Trains moving with the current of traffic on freight tracks 1 and 2 will proceed on hand signal from switch tender. Trains moving against the current of traffic on freight track 2 will stop 300 feet from cross-over switch, then proceed on hand signal from switch tender. Trains to Wye track will stop 300 feet from cross-over, then proceed on hand signal from switch tender. Trains from Wye track will stop 300 feet from switch, then proceed on hand signal from switch tender.

Spring Switches.

Salzburg: At junction of northward and southward main tracks. Normal position for northward main track. Southward movements will trail switch. Trains or engines stopped while trailing through switch in normal position must not take slack or make reverse movement, unless switch is properly lined.

The color light switch indicator displays the following indications:

Green: Switch lined for straight track.

Yellow: Switch lined for diverging route.

Red: Switch points in open position. Before proceeding over switch, enginemen and trainmen must know that switch is properly lined.

Switch must be operated manually for all shifting movements.

104a. NORMAL POSITION OF SWITCHES.

Denmark Jct.: For Bay City Branch.
 S. B. Jct.: For main tracks.
 Saginaw: For Bay City Branch main track. Handled by operator.
 Paines: Junction switch for M. C.
 Bay City E. S.: For D. & M. at Foss near D. & M. river bridge.
 Haires: Junction switch for M. C.
 Notre Dame: For route to HF.
 In yards the normal position for inside switches is that which leaves them lined for the lead.

105. SIDINGS.

DESIGNATION AND USE OF MAIN TRACKS.

Single Track

Between: North Yard and Salzburg.
 Vassar and Bach.
 Denmark Jct. and Bay City W. S.
 Bay City E. S. and Foss.
 Wenona and Mackinaw City.
 B. C. & B. C. Jct. and Midland.
 Pinconning and Gladwin.
 Rives Jct. and Grand Rapids.
 Rives Jct. and MA Tower.
 North Lansing and Saginaw.
 Jackson Jct. and East End, on Air Line Branch.
 Ypsilanti and Hillsdale.
 Springport and Jonesville.
 Grand Rapids and White Pigeon.
 Kalamazoo and South Haven.
 East Gary and Joliet.
 South Bend and St. Joseph, on St. Joseph Branch.
 South Bend and Benton Harbor on South Bend Branch.

D-151.

Two Tracks

Between: YD and Alexis.
 Town Line and west end of Gibson Yard.
 Calumet Park and Kensington.
 Jackson and Rives Jct.
 MA Tower and North Lansing.
 Salzburg and Wenona.

Four Tracks

Between: West end of Gibson Yard and Calumet Park.
 Tracks are numbered from the north and will be used as follows:
 No. 1 Westward, for westward passenger and through freight trains.
 No. 2, Eastward, for eastward passenger and through freight trains.
 No. 3, Westward, for westward freight trains.
 No. 4, Eastward, for eastward freight trains.

Movements on tracks 3 and 4 are controlled by signalman at Hammond Interlocking Station. Eastward trains at Calumet Park Interlocking Station will be governed by interlocking signals. Westward trains at Columbia Ave. will be governed by hand signals from switchtender. Signalman at Calumet Park Interlocking Station and switchtender at Columbia Ave. will obtain authority from signalman at Hammond Interlocking Station before permitting trains to proceed. Trains must not foul these tracks between Calumet Park Interlocking Station and Columbia Ave. without authority from signalman at Hammond Interlocking Station.

Trains and engines moving against the current of traffic on tracks 3 and 4, when authorized by signalman at Hammond Interlocking Station, will be governed at Columbia Ave. by hand signal from switchtender with yellow flag or yellow light, and at Calumet Park Interlocking by signal indication Figure 175, Rule 290.

210, 211. MOVEMENT BY TRAIN ORDERS.

The "31" form of train order must be used:

When addressing the superior train in the application of Rules 208a and S-208b. In addition, when making a movement against the current of traffic under Rule 208a the signature of the conductor or engineman of the superior train must be received before the order to the inferior train is made "complete."

The "19" form of train order may be used:

(a) To fix a meeting or waiting point between trains or providing for a movement against the current of traffic, when the order is addressed to the operator at the meeting or waiting point and sent to the superior train before it reaches such station.

(b) To fix a meeting point between trains, other than a passenger train, at a point not a train-order office, or at one at which the office is closed, by sending the order to the superior train at least two open train-order offices in advance of, and to the last open train-order office before reaching such meeting point.

(c) In connection with Forms E and SE train orders. When addressed to opposing trains, the superior train must receive the order at least one station in advance of and at the station first named in the order.

(d) In connection with Form B train orders.

(e) For slow speed track, when protected by signals prescribed for impassable or obstructed track, and Rule 295; and to notify trains of unusual conditions.

(f) To notify trains of conditions that interfere with the safe passage of trains, provided such trains are brought to a stop before the order is delivered.

In starting a train from a point where there is no train register, also in relieving conductors and enginemen from checking the train register as provided in Rule 83c, the form "At 6.50 A.M. all overdue trains except have passed" or "have arrived at or departed from " must be used, as circumstances require.

When receiving train orders on a train in motion during the time when night signals are required, train employes must have a white lantern to indicate their position.

221(B). TRAIN ORDER SIGNALS.

Rule 221(B) governs on Single Track and Two Tracks in Automatic Block System territory.

Niles, Lake St.: Train-order signals will not govern eastward trains entering yard.

S-241, D-251. MOVEMENT OF TRAINS BY BLOCK SIGNALS.

Rules S-241 to S-244, inclusive, govern on Single Track in the Same Direction,

Between: North Yard and Salzburg.
Rives Jct. and Hughart.
Rives Jct. and MA Tower.
North Lansing and Saginaw.

Rules D-251 to D-254, inclusive, govern on Two or More Tracks With the Current of Traffic,

Between: Town Line and Kensington.
YD and Alexis.
Jackson and Rives Jct.
MA Tower and North Lansing.
Salzburg and Wenona.

292. STATION SEMAPHORES.

Rochester Jct. . . . Automatic. . . North and south.
Rochester. Automatic. . . North.
Goodison. Automatic. . . North and south.
Lapeer. South.
Vassar. North and south.

Bay City W. S. { Automatic. . . 1220 feet south of passenger station on northward track.
Automatic. . . 1155 feet north of passenger station on southward track.
Automatic. . . Midland St. on southward track.
Automatic. . . Bay City W. S. freight house on southward track.

Mackinaw City. Automatic. . . South.
Charlotte. Automatic. . . East and west.
Nashville. Automatic. . . East.
Hastings. Automatic. . . East.
Middleville. . . . Automatic. . . East and west.
Hughart. East and west.
Lansing Yard. . . Automatic. . . South.
Lamar. North and South.
White Pigeon. . . Automatic. . . North.

293. SWITCH TARGETS.

Lights on main track switches are not in use on Air Line, Caro, Ypsilanti, Lansing, South Haven, Midland and Gladwin Branches.

297. RAILROAD GRADE CROSSING SIGNALS.

Location	Signal	Position	Indication
Main Line			
Jackson Jct.	No. 6 Switches. Target . . .	Horizontal . . .	Eastward trains stop 200 feet from target.
		Diagonal . . .	Eastward trains proceed on Air Line track.

M. C. Spur (A. A. Spur)	Target	Vertical	Proceed.

305. MANUAL BLOCK SYSTEM.

Manual Block System is in use:

Single Track:

Between: North Yard and Lake Orion

Note: When signal station at Lake Orion is closed manual block extends to Oxford.

Oxford and Hoyt

Denmark Jct. and Bay City W. S.

Note: During hours office at Denmark Jct. is closed signalman at Vassar has control of the block between Vassar and Hoyt and between Vassar and Reese or Woodside when signal station at Reese is closed.

Rives Jct. and Hughart

Lamar and White Pigeon

Rives Jct. and MA Tower

Note: All northward extra freight trains and engines moving from Lansing Yard to MA Tower during hours when signal station at Lansing Yard is closed must obtain permission from signalman at MA Tower.

North Lansing and Paines

Mershon and Salzburg

East Gary and Joliet

Rules 317-A and 331-A for absolute block for opposing and following movements govern the movement of passenger trains.

Rules 317-B and 331-B for absolute block for opposing movements and permissive block for following movements govern the movement of trains other than passenger trains.

Vassar: A southward freight train may pass the manual block signal at Vassar to enter siding just south of the interlocking station as follows:

When the block between Vassar and Otter Lake is occupied the signalman at Vassar may authorize a southward freight train to pass the stop indication of the block signal to enter the siding by the issuance of Clearance Form "A" and indicating thereon the train orders to be received, if any, with the line giving block indication left blank.

A southward freight train receiving Clearance Form "A" from the signalman at Vassar with the line giving block indication left blank may pass the block signal to enter the siding. After the train has entered the siding it must not again enter the block until the conductor communicates with the signalman at Vassar and obtains verbal permission to enter the block for the purpose of leaving part of his train on West Storage Track, or clearance of the block and permission for the train to proceed; and the conductor must so inform the engineman.

Rules 317-A and 362 are modified accordingly.

Two Tracks:

Between: MA Tower and North Lansing

Salzburg and Bay City W.S.

Rules 318-A and 331-A for absolute block for following movements only govern the movement of passenger trains.

Rules 318-B and 331-B for permissive block for following movements only govern the movement of trains other than passenger trains.

Lansing: When the northward block is occupied and the main track is seen and known by the signalman at MA Tower to be clear for approximately 1000 feet north of the passenger station, he may admit a northward passenger train to the block, for following movement only, with Clearance Form A with the line giving block indication left blank, after such train has been stopped at home interlocking signal. When so authorized train may pass the block signal to a point 1000 feet north of the

passenger station, but must not proceed beyond that point without receiving Clearance Form A with the word "Clear" written on the line giving block indication. Rules 318-A and 221(C) are modified accordingly.

Except where Rule D-261 governs, Manual Block System Rules will govern movements against the current of traffic.

Rules 317-A and 331-A for absolute block for opposing and following movements govern the movement of passenger trains.

Rules 317-B and 331-B for absolute block for opposing movements and permissive block for following movements govern the movement of trains other than passenger trains.

Single and Two Tracks:

A signalman may admit a train other than a passenger train to a block that is wholly or partly within yard limits under a clear block indication when it is known that the block is not occupied by a passenger train or not occupied by a train other than a passenger train outside of yard limits.

Indications of manual block signals will convey to second class and extra trains information as to condition of that portion of the block that is not within yard limits. Second class and extra trains must move within yard limits prepared to stop unless the main track is seen or known to be clear.

Manual block signal indication does not govern trains on the length of track of a block within yard limits protected by automatic block signals.

Advance Manual Block Signals when in "Stop" position must not be passed without permission from the signalman. Conductor or engineman must communicate with the signalman and be governed by his instructions. Located as follows:

North Yard, 12,000 feet north of interlocking station for northward trains; controlled from North Yard.

Oxford, 7000 feet north of interlocking station for northward trains; controlled from Oxford.

Vassar, 3600 feet south of Vassar Interlocking Station for northward and southward trains; controlled from Vassar Interlocking Station.

Vassar, 1000 feet north of Vassar station for northward and southward trains. Controlled from Vassar.

Woodside, 2300 feet south of Woodside Interlocking Station for northward trains. Controlled from Woodside.

Woodside, 1300 feet south of Woodside for southward trains. Controlled from Woodside.

North Lansing, 1.5 miles north of North Lansing for northward trains; controlled from North Lansing.

326a. TRAINS OTHER THAN PASSENGER TRAINS MEETING AT CLOSED BLOCK STATION, NON-BLOCK STATION, OR SIDING BEYOND BLOCK SIGNAL.

Not in effect.

373. BLOCK STATIONS

Block stations are open as specified in list of Signal Stations and Telephones.

505. AUTOMATIC BLOCK SYSTEM.

Automatic Block System is in use:

Single Track:

Between: Lake Orion and Oxford when signal station at Lake Orion is open
Paines and Saginaw
Hoyt and Mershon

Two or More Tracks:

Between: Jackson and Rives Jct.
YD and Alexis
Town Line and Kensington
On Track 4, Calumet Park Interlocking and Hammond Interlocking.

On Track 3, Westward Automatic Block Signal 2653-3, located on signal bridge 3,900 feet west of Hammond Interlocking Station, and Calumet Park Interlocking.

Trains may pass Eastward Automatic Block Signal 2654-4 and Westward Automatic Block Signal 2653-3 located on signal bridge 3,900 feet west of Hammond Interlocking, when displaying indication as prescribed by Rule 291 without stopping, proceeding at restricted speed.

Freight trains receiving indication as prescribed by Rule 291 at the following automatic block signals must obtain permission from the signalman before proceeding:

Signal D92, located on northward main track at Ecorse; controlled by signalman at YD. Applies to all trains and engines.

Signal 1436, located on eastward main track west of Kalamazoo station; controlled by operator at BO Tower. Trains must stop clear of West Michigan Ave. before calling signalman.

Signal 762, located on eastward main track just west of Steward Ave., Jackson; controlled by signalman at Pearl St. Interlocking Station.

Signal 734, located on eastward main track west of East Yard; controlled from East Yard. Both freight and passenger crews are required to obtain permission from signalman at East Yard before passing this signal.

Signal 1183, located on westward main track east of Nichols Interlocking Station; controlled by signalman at Nichols.

Signal J12, located on eastward main track, Monroe St., Jackson; controlled by signalman at Pearl St. Interlocking Station.

Trains receiving indication as prescribed by Rule 292 at Northward Interlocking Signal located 8,553 feet south of south switch of east siding at Trenton must obtain permission from signalman at FN before proceeding. After permission has been received, or in case of failure of means of communication, trains may proceed at restricted speed to the next signal.

Except where Rule D-261 governs, Manual Block System Rules will govern movements against the current of traffic.

Rules 317-A and 331-A for absolute block for opposing and following movements govern the movement of passenger trains.

Rules 317-B and 331-B for absolute block for opposing movements and permissive block for following movements govern the movement of trains other than passenger trains.

Automatic block signals are also in use in Manual Block territory as follows:

Between: North Yard and Signal B972 at Eight Mile Road
Oxford and Signal B642, 7000 feet north of Oxford
Mershon and 2400 feet north of Zilwaukee
North Lansing and Signal R284, 1.5 miles north of North Lansing

Where an automatic signal is in use in Manual Block territory, it will indicate condition of track only between automatic signal and fixed signal reading "End of Automatic Block."

605. REMOTE CONTROLLED SWITCHES.

Remote controlled switch is located at:

Location	Signal Station	Signal	Track
1.2 miles west of	Porter	25 feet west of switch	Eastward main track to siding

Enginemen or trainmen finding signal governing movement over switch displaying the "Stop" indication, will call signalman at signal station for instructions. Additional instructions are located in the telephone box.

703. MAKE-UP OF FREIGHT TRAINS.

Scale test cars must be handled only in slow or local freight trains.

705. LEAVING CARS ON SIDE TRACKS.

Public crossings must not be obstructed for a period exceeding five minutes at any one time.

When cars are left near public crossings not protected by a watchman or by gates or automatic highway crossing signals, they must stand at least four car-lengths from the crossing, or a greater distance whenever conditions at the crossing require it to afford a better view of traffic to the public when approaching the crossing.

Cars with hot journals must not be left on any track in close proximity to where gasoline is loaded or unloaded.

824. MAKE-UP OF PASSENGER TRAINS.

Passenger equipment must be of steel construction, except that baggage, horse, refrigerator and milk cars of steel underframe construction may be hauled; also such steel underframe passenger cars as are used under special arrangements.

Trains containing more than 5 cars 60 feet or over in length will be limited to 30 cars. Trains containing not more than 5 cars 60 feet or over in length will be limited to 40 cars.

932. AIR BRAKES.

Rules for the Operation and Supervision of Air Brake, Train Air Signal and Steam Heat Equipment, Locomotives and Cars, effective February 1, 1930, govern.

Applying air brakes from the rear of freight trains by trainmen in the manner prescribed by Rules 1584 and 1585 must be confined to preventing accidents and damage to tracks.

When cars are being moved from one yard to another over or across a main track, or across a public highway at grade, air brakes must be coupled and in use.

A passenger train must not be backed any considerable distance without suitable back-up hose, or its equivalent, and a trainman on the rear platform.

When the air brakes become inoperative on a train, after proper understanding with the engineman and hand brakes arranged for, it will proceed carefully to the first available point of communication and report to the train dispatcher for instructions.

In case of air pump failure on descending grades, train must be immediately brought to a stop and secured by hand brakes before engineman begins investigation for defects. If trouble cannot be remedied train will proceed carefully to the first available point of communication and report to the train dispatcher for instructions.

When a test application of air brakes is made at points where air brake inspectors are not located, trainmen must see that the air brakes are all set properly, and must give the proper signal for releasing the air brakes and see that they are released. At points where air brake inspectors are located the trainmen will assist the air brake inspector.

An air brake which becomes inoperative en route and cannot be made effective must be cut out and the engineman notified.

AUTOMATIC TRAIN STOP

Rules for Enginemen and Firemen for the Operation of Intermittent Inductive Automatic Train Stop, effective October 1, 1935, govern.

Enginemen and firemen must be qualified on Rules for the Operation of Automatic Train Stop.

Road engines and motors operated between Town Line and Kensington, and between YD and Alexis, must be equipped with automatic train stop device in working order and cut in, except:

- a—When used as pusher or second engine.
- b—By specific authority of Superintendent.
- c—When train stop device becomes inoperative after leaving terminal, passenger, mail and express trains must be operated at a speed not exceeding 35 miles per hour, and other trains at a speed not exceeding 20 miles per hour. Engineman must notify Superintendent at the first communicating station, and relief engine, if available, must be obtained at first engine terminal. Train may proceed at normal speed when authorized by train order. Train Dispatcher will arrange for clear block between open signal stations in advance of such train, within the limits of the train order.

When forestalling whistle fails to sound while forestalling, engineman will reduce to and operate at speed specified in Paragraph c until he has occasion to again forestall as prescribed by the rules, and the whistle sounds; normal speed may then be resumed. Failure of whistle to sound must be reported on Form SC-1.

FATALITIES

In case of death on trains the usual proprieties must be observed and the Coroner notified. The body must be removed as soon as possible to a proper place and left in charge of an employe of the railroad until the Coroner's arrival. If the body is accom-

panied by an attendant, he should be consulted and his wishes respected. Prompt report must be made to the Superintendent.

Where persons have been killed on railroad property or bodies found on the right-of-way, the body should not ordinarily be moved from the place where found unless the Coroner is first notified and his permission is received to remove the body; but if it is apparent that the Coroner's permission cannot be secured without undue delay to trains, the body may first be moved to a position where trains can conveniently pass, after noting its condition and position for the Coroner's information. This is particularly important where death appears to be due to foul play. In all cases an employe must be left with the body until the arrival of the Coroner.

FREIGHT AND YARD TRAINMEN

Running switches may be made only in emergency and not until engine and cars have been brought to a stop and hand brakes and switch inspected and found in order.

HAND BRAKE TEST

A running test of hand brakes must be made on a motor car upon leaving initial terminal when operating as a single unit. As soon as speed permits engineman must shut off power and signal for brakes. The conductor or member of train crew must then apply hand brakes to determine if they are operating properly. In case hand brakes do not operate properly, motor car must proceed at restricted speed to the nearest point at which repairs can be made.

HAULING ENGINES AND TENDERS IN TRAINS

Not more than four dead engines may be hauled in any train and they must be separated by at least five cars, and side rods must be in place.

When disconnected engines are hauled in trains, the dispatcher and engineman must be notified and speed of 20 miles per hour must not be exceeded.

A dead engine in company's service hauled in a freight train must be placed next to the operating engine. Except when a rider is provided, the head brakeman must ride the dead engine, unless relieved by the Superintendent.

A live engine provided with a rider, when hauled in a freight train, must be placed next to the operating engine, to enable the rider to give engine whistle signal to the engineman in case of trouble on his engine.

LIGHT WEIGHT PASSENGER CARS EQUIPPED WITH ROLLER BEARINGS

When light weight passenger cars equipped with roller bearings are uncoupled from an engine, enough hand brakes must be set to prevent cars from moving. When switching, the air brakes on such equipment must be used. Each hand brake operates the brake on one side of a truck only, and the brakes on both ends and both sides of car must be observed to know that they are operative.

PASSENGER TRAINMEN

Train employes must not enter occupied observation, private, official or dining cars, except when necessary in the discharge of their duties, and must then perform such duties and leave the car promptly. Except when collecting tickets, they must remove their caps while in such cars. When passing through sleeping cars they must do so quietly.

The rear brakeman may ride in the observation car between 10:00 P.M. and 7:00 A.M. when the car is not occupied by passengers.

SIGNAL ASPECTS, INDICATIONS AND RULES

Signal Aspects, Indications and Rules will be found in the back of the Time-Table.

SPEED RESTRICTIONS.

Speed restrictions are shown in miles per hour and apply to entire train.

SIGNAL ASPECTS, INDICATIONS AND RULES

INTERLOCKING AND AUTOMATIC BLOCK SIGNALS

Rule 281
Proceed.

Rule 281A
Proceed approaching second signal at medium speed.

Rule 285

Proceed preparing to stop at next signal. Train exceeding medium speed must at once reduce to that speed. Reduction to medium speed must commence before passing signal and be completed before accepting a more favorable indication.

INTERLOCKING SIGNALS

Rule 292
Stop.

AUTOMATIC BLOCK SIGNALS

Rule 291
Stop, then proceed at restricted speed.

- NOTES:
1. Automatic block signals are designated by a horizontal number plate ∇ on the signal mast.
 2. Color light units shown in dotted lines on masts of signals are normally dark "light out".
 3. Rule and figure numbers followed by "x" are additional to or do not conform to the Signal Aspects, Indications and Rules of the Rules for the Government of the Operating Department.

SIGNAL ASPECTS, INDICATIONS AND RULES

INTERLOCKING AND AUTOMATIC BLOCK SIGNALS

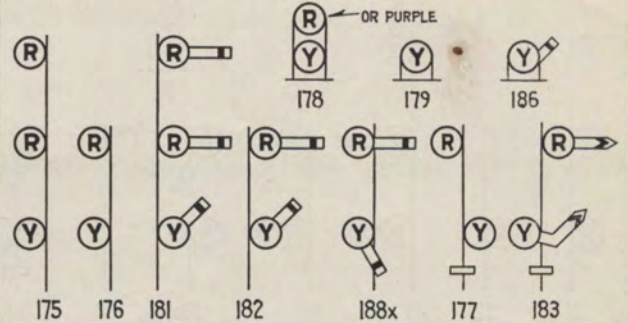

Rule 282

Proceed approaching next signal at medium speed.

Rule 282A

Proceed preparing to stop at second signal.

Rule 290

Proceed at restricted speed.

INTERLOCKING SIGNALS

Rule 283

Proceed; medium speed within interlocking limits.

Rule 286

Proceed at medium speed preparing to stop at next signal.

Rule 287

Proceed; slow speed within interlocking limits.

Rule 288

Proceed preparing to stop at next signal; slow speed within interlocking limits.

DISTANT SIGNALS

Rule 281

Proceed.

Rule 285x

Proceed preparing to stop at switch or next signal. Train exceeding medium speed must at once reduce to that speed. Reduction to medium speed must commence before passing signal and be completed before accepting a more favorable indication.

STATION SEMAPHORES

Rule 281

Proceed.

Rule 292x

Stop; then proceed at restricted speed and unless the way is seen to be clear must be preceded by a flagman.

SMASH BOARDS; BAY CITY DRAWBRIDGE

Rule 292

Stop.

Rule 281

Proceed.

INSTRUCTIONS: ALL TRAINS MUST STOP BEFORE PASSING THE SIGNAL, THEN BE GOVERNED BY SIGNAL INDICATION.

SIGNAL ASPECTS, INDICATIONS AND RULES

TRAIN ORDER SIGNALS

Rule 289C

No train orders ; also be governed by Interlocking or Automatic Block Signal Indications .

MANUAL BLOCK SIGNALS

Rule 289

Proceed .

Rule 289Dx

Reduce speed ; preparing to get clearance Form 'A', Form 19 orders or messages , also be governed by Interlocking or Automatic Block Signal Indications .

Rule 289E

Train orders ; also be governed by Interlocking or Automatic Block Signal Indications .

Rule 289B

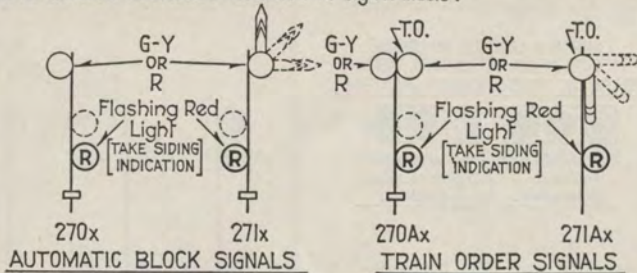

Stop

INSTRUCTIONS

1. Indications of signals 166Ax and 167Ax are to be given only after clearance Form 'A' and train orders have been delivered and trains are released in accordance with Rule 211a .
2. At Rives Junction the upper arm of train order and manual block signal will govern movements to the Grand Rapids Branch and the lower arm to the Saginaw Branch .

SIGNAL ASPECTS, INDICATIONS AND RULES

TAKE SIDING SIGNALS: Located on Signal Masts.

Rule 294x

FREIGHT TRAINS take siding; be governed also by the indication of the signal on the mast on which take siding indication unit is located.

GRADE SIGNALS

Located on the Masts of Automatic Block Signals

Rule 296x

When indication as prescribed by Rule 291 is displayed, heavy tonnage freight trains will not be required to stop, but may proceed at restricted speed.

RAILROAD GRADE CROSSING SIGNALS

Rule 297

Stop or proceed as prescribed by time table.
NOTE: Signal may be a target, gate, ball or other type.

TRACK PAN LIGHTS

Rule 299

Scoop may be lowered at this point.

Rule 299A

Scoop must be raised at this point.

MAIN TRACK SWITCH TARGETS

SIDING AND YARD SWITCH TARGETS

SIDING DERAIL TARGETS

Rule 293

REDUCE SPEED BOARD

LOCATION: Upon the right of and adjoining the track to which it refers, approximately 8000 feet from point to be protected.

Rule 295

Approach slow speed board at not exceeding speed shown on reduce speed board.

255

TEMPORARY SPEED BOARDS

SLOW SPEED BOARD

LOCATION: At the point to be protected, upon the right of and adjoining the track to which it refers.

Rule 295A

Speed between slow speed board and resume speed board must not exceed speed shown on reduce speed board.

256

RESUME SPEED BOARD

LOCATION: Upon the right of and adjoining the track to which it refers, and 50 feet in advance of the point protected.

Rule 295B

Resume speed after rear of train has passed this board.

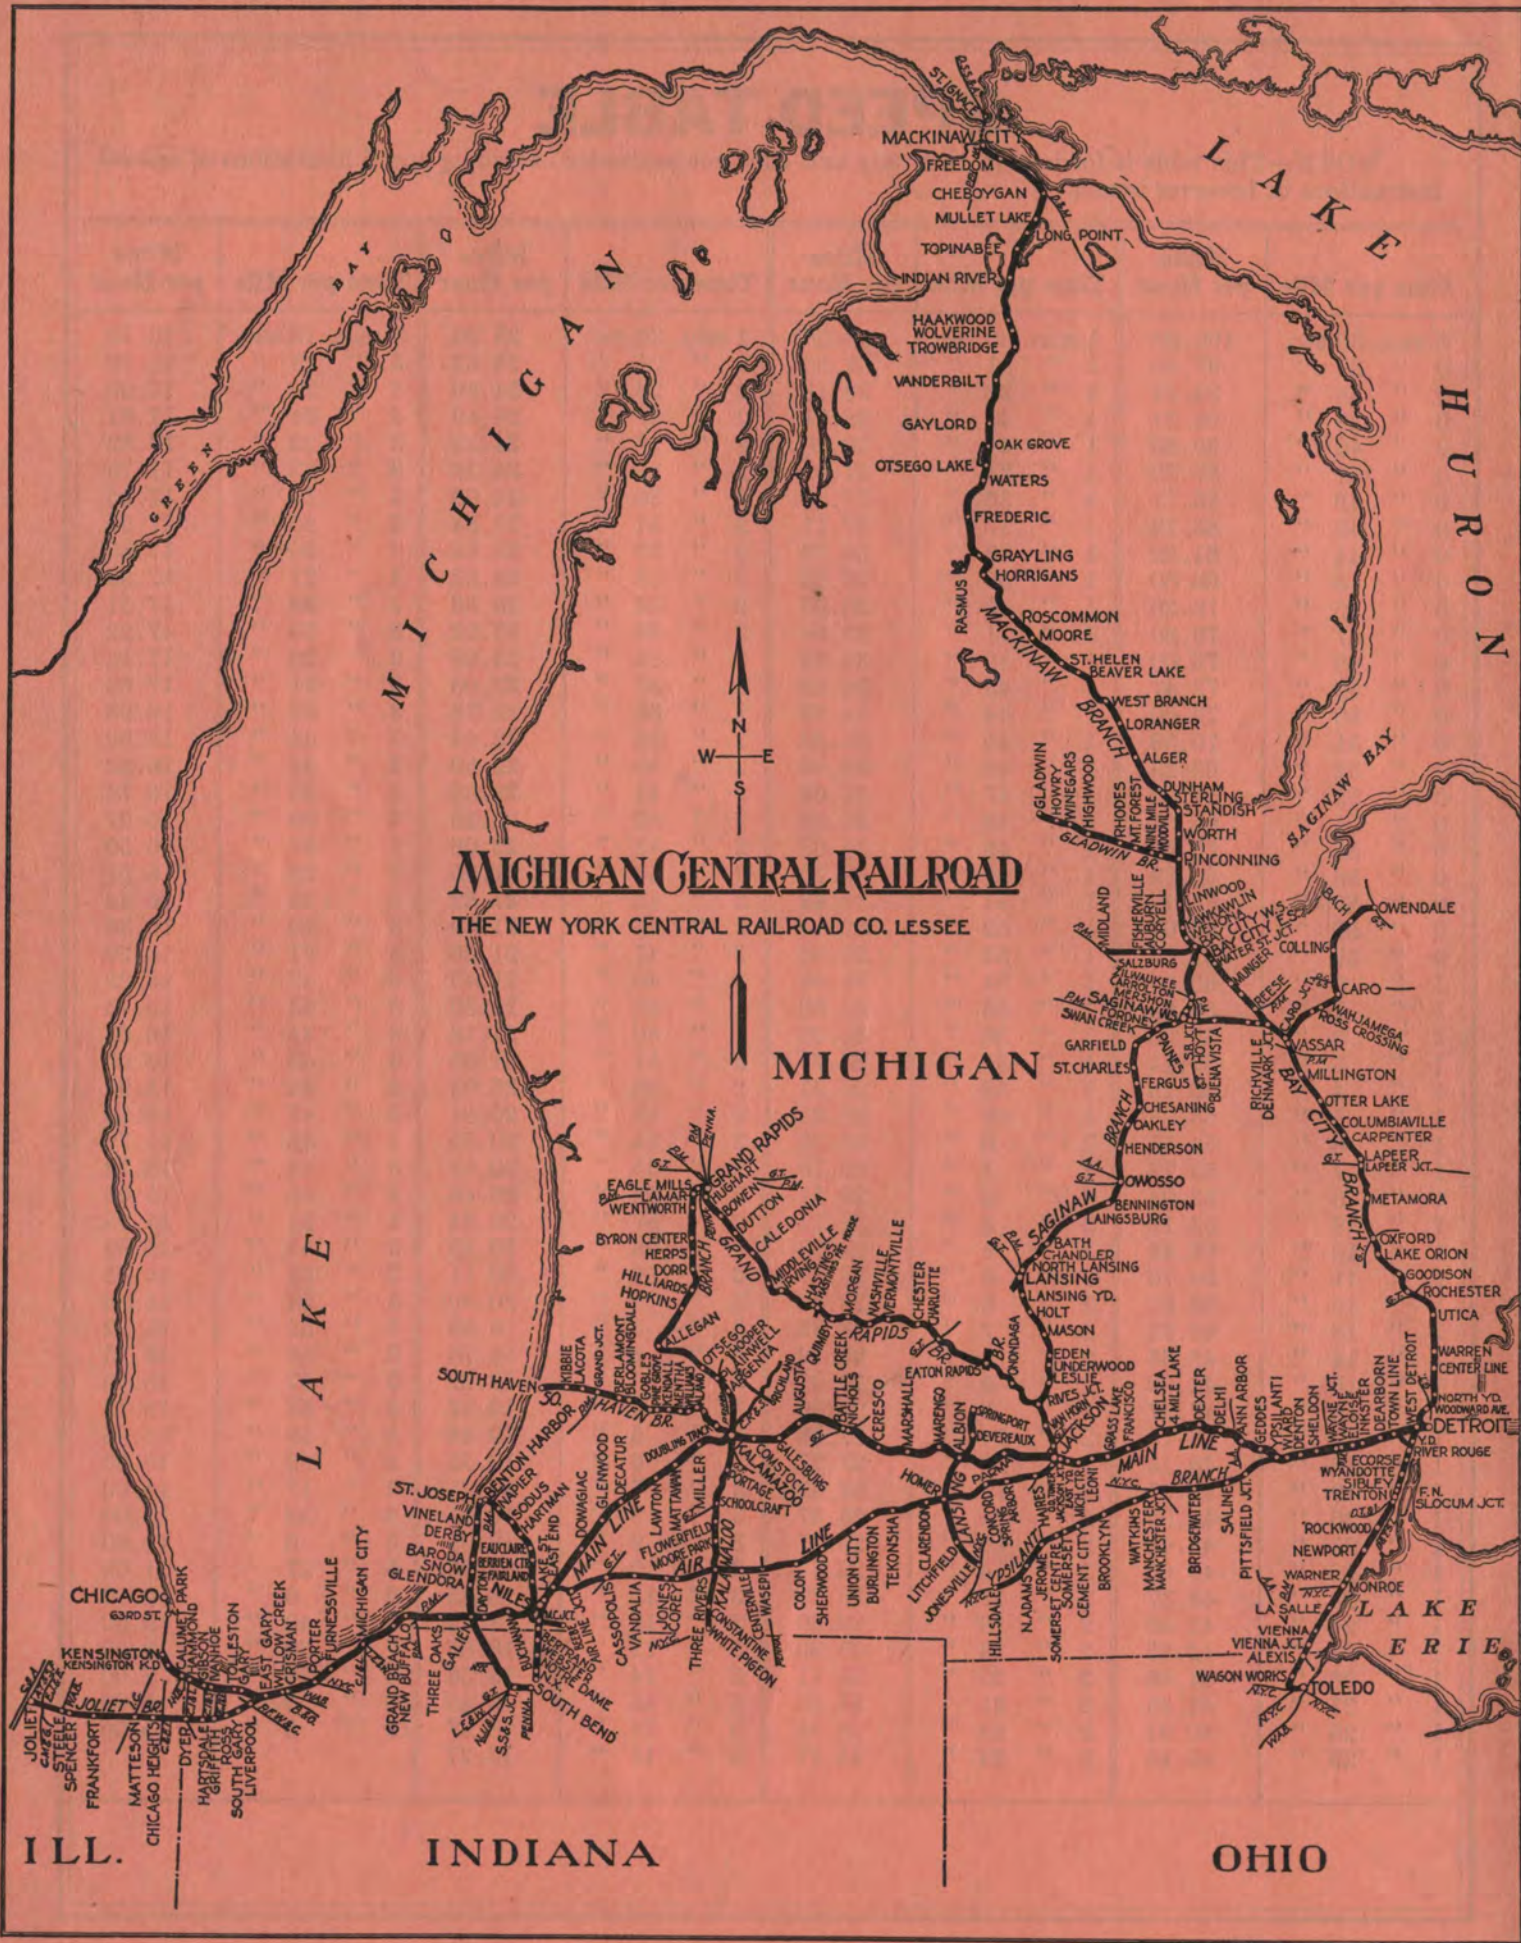

257

NOTE: Flags of prescribed color may be substituted for the boards when necessary. When yellow flags are substituted, or the reduce speed board does not designate the speed limit, speed must be reduced to 10 miles per hour. Lights of the prescribed color must be used by night in addition to the boards or flags. Where reduced speed is required, the point may be marked as prescribed by the rule, and in addition, trains must be notified by train order or bulletin order and the rate of speed permissible over the defective track specified.

SPEED TABLE

NOTE—This table is for information only and does not authorize exceeding speed limitations of special instructions or however issued.
