**GREENWICH PIERS, PHILADELPHIA, PENNA.
Tidewater Coal Dumping Facilities**

Greenwich, Philadelphia, tidewater coal facilities are the most modern transshipping facilities along the Atlantic Seaboard. These facilities were expressly designed for the handling of Coal and Coke in volume in all seasons and under all conditions of weather and are conveniently located to serve the entire Philadelphia Harbor as well as all coastwise and export trade.

The facilities consist of two of the latest type rotary coal dumpers, one on each side of a pier, 1,100 feet long and 168 feet wide, with sufficient berthing space for all types of vessels.

These dumpers are equipped with conveyors and tele-

scopic chutes so that the coal slides into the hold of vessel without dropping, thus preventing breakage.

These combined facilities are capable of handling approximately 25,000 tons per day (24 hours).

Modern bunker facilities equipped with scales are also provided for coaling tugs and other small vessels.

There is also provided a modern thawing plant of 60 cars capacity for thawing frozen coal during extremely cold weather.

Ample and conveniently located supporting track storage facilities are available to make possible the most rapid movement of loaded cars to the dumpers.

Dimensions and gross weight of cars which can be handled over these dumpers are:

<i>Maximum Length Over Couplers</i>	<i>Maximum Height</i>	<i>Minimum Height</i>	<i>Maximum Width</i>	<i>Maximum Gross Weight</i>
54'0"	12'0"	7'0"	10'6"	324,000 lbs.

CANTON PIERS, BALTIMORE, MARYLAND

Tidewater Coal Dumping Facilities

Baltimore tidewater coal facilities are conveniently located so as to be accessible to all coastwise and export trade, as well as the entire Baltimore Harbor district.

The facilities consisting of one Mead-Morrison car dumper, the coal being dumped into a 100-ton capacity receiving hopper and from there conveyed to the loading machines on the pier by means of four-ton capacity cars operated on an endless cable.

The pier is 925 feet long and 66 feet wide, with ample berthing space to accommodate any type of vessel.

The pier is equipped with four movable loaders, one of which is also equipped with a standard scale to weigh all coal passing through it and is especially adapted for bunkering tugs and other small vessels.

This pier is capable of handling 20,000 tons per day (24 hours).

Facilities are provided for the efficient thawing of frozen coal during extremely cold weather.

Ample and conveniently located supporting track facilities are also available to make possible the most rapid movement of loaded cars to the dumper.

Dimensions and gross weight of cars which can be handled over this dumper are:

<i>Maximum Length Over Couplers</i>	<i>Maximum Height</i>	<i>Minimum Height</i>	<i>Maximum Width</i>	<i>Maximum Gross Weight</i>
54'0"	12'4"	6'0"	12'0"	280,000 lbs.

SOUTH AMBOY, NEW YORK HARBOR

Tidewater Coal Dumping Facilities

This pier is conveniently located to serve the entire New York Harbor territory, with ample harbor facilities to accommodate an unlimited number of boats.

The facilities consist of two McMyler car dumpers with a combined capacity of 40,000 tons per day (24 hours). Mechanical devices are provided for the trimming of cargo in barges and other vessels.

Sufficient depth of water is maintained to accommodate vessels drawing not in excess of 25 feet of water.

Thawing plant facilities are also provided for thawing coal during extremely cold weather, with 86 car capacity.

Ample and conveniently located supporting track facilities are also available to make possible the most rapid movement of loaded cars to the dumpers.

Dimensions and gross weight of cars which can be handled over these dumpers are:

	Maximum Length Over Couplers	Maximum Height	Minimum Height	Maximum Width	Maximum Gross Weight
No. 1 Machine	45'0"	11'4"	6'6"	10'5"	225,000 lbs.
No. 2 Machine	49'0"	12'0"	6'6"	10'6"	225,000 lbs.

SODUS POINT, N. Y.

Lake Ontario Coal Dumping Facilities

Sodus Point transshipping facilities are so situated that they can conveniently serve all ports on the Great Lakes and St. Lawrence River.

These facilities consist of a trestle with eight pockets, four on each side, so as to permit more than one vessel to load simultaneously.

The pier is equipped with electrically operated chutes and trimmers that can be regulated, so as to reduce the breakage of coal to a minimum.

The facility is equipped with electrically operated shake

outs to expedite the unloading of extremely fine sizes of coal, thereby facilitating dispatch of vessels.

This pier is capable of handling 20,000 tons per day (24 hours).

There is also provided ample and conveniently located track storage facilities to make possible the most rapid movement of loaded cars to the trestle.

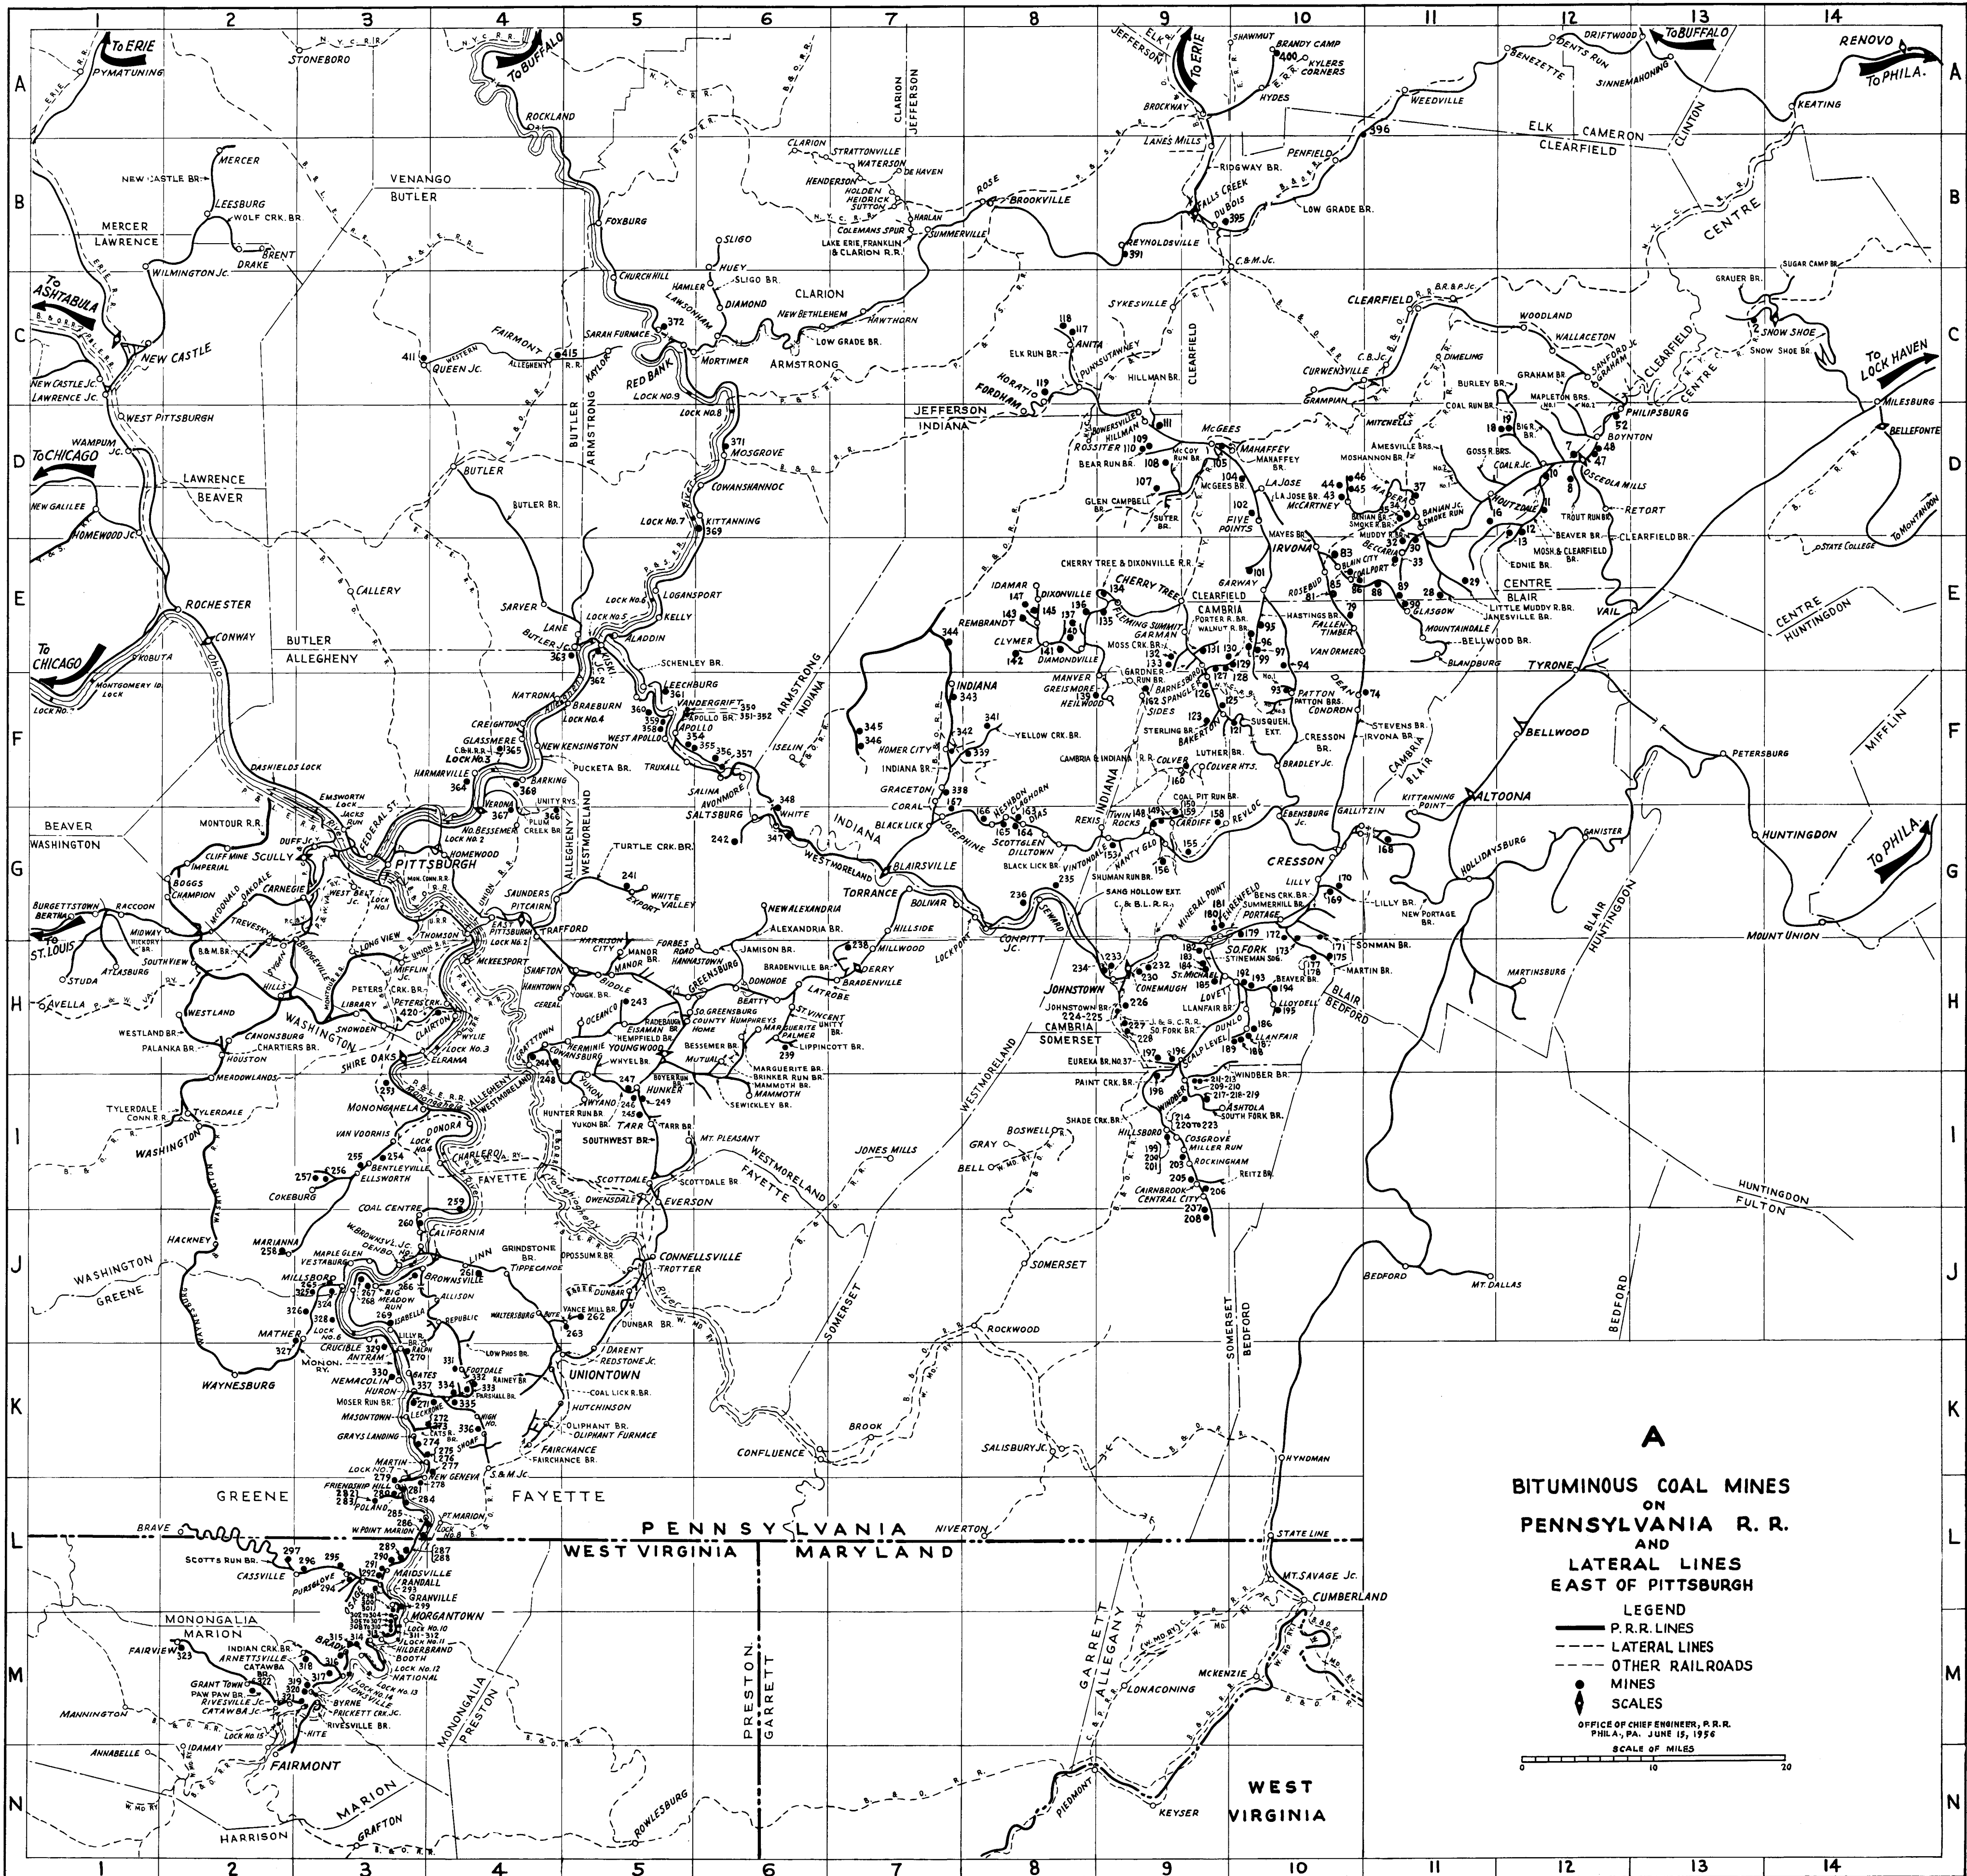

Ample harbor facilities are also available for berthing any number of vessels.

This pier is capable of handling all self-clearing hopper cars.

MAIL ADDRESS: Agent, Pennsylvania Railroad,
Sodus Point, New York
Telephone: Sodus 3551

VERNER DOCK – PITTSBURGH (JACKS RUN), PA.
Ohio River Coal Dumping Facilities

This facility located on the Ohio River 3.6 miles west of the "point" consists of two hoppers equipped with Shake-outs and electrically operated conveyor belts for transferring coal from cars to barges.

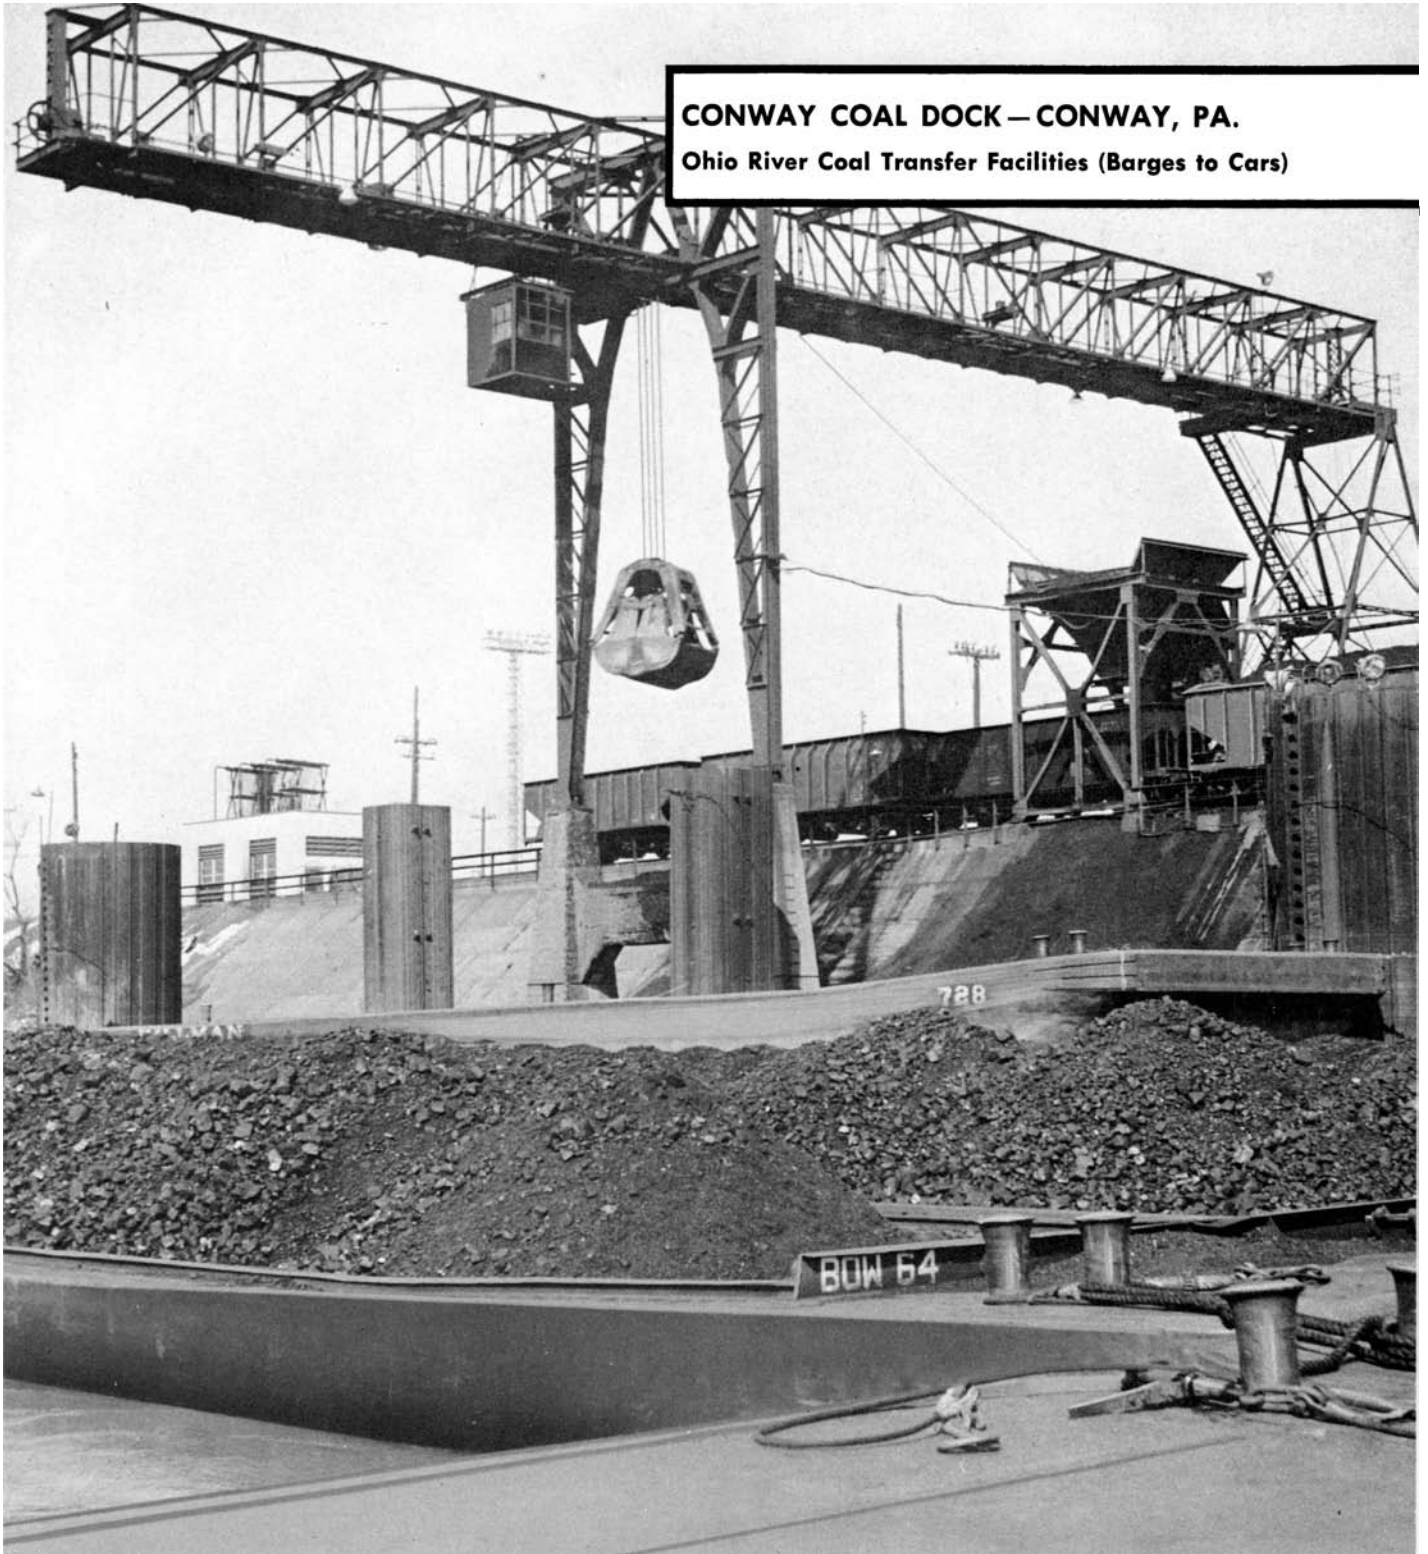

This dock is capable of handling 8,000 tons per day (24 hours).

All self-clearing hopper cars can be handled at this facility.

MAIL ADDRESS:

Agent,
Pennsylvania Railroad Company,
Federal Street,
Pittsburgh, Pa.

CONWAY COAL DOCK — CONWAY, PA.
Ohio River Coal Transfer Facilities (Barges to Cars)

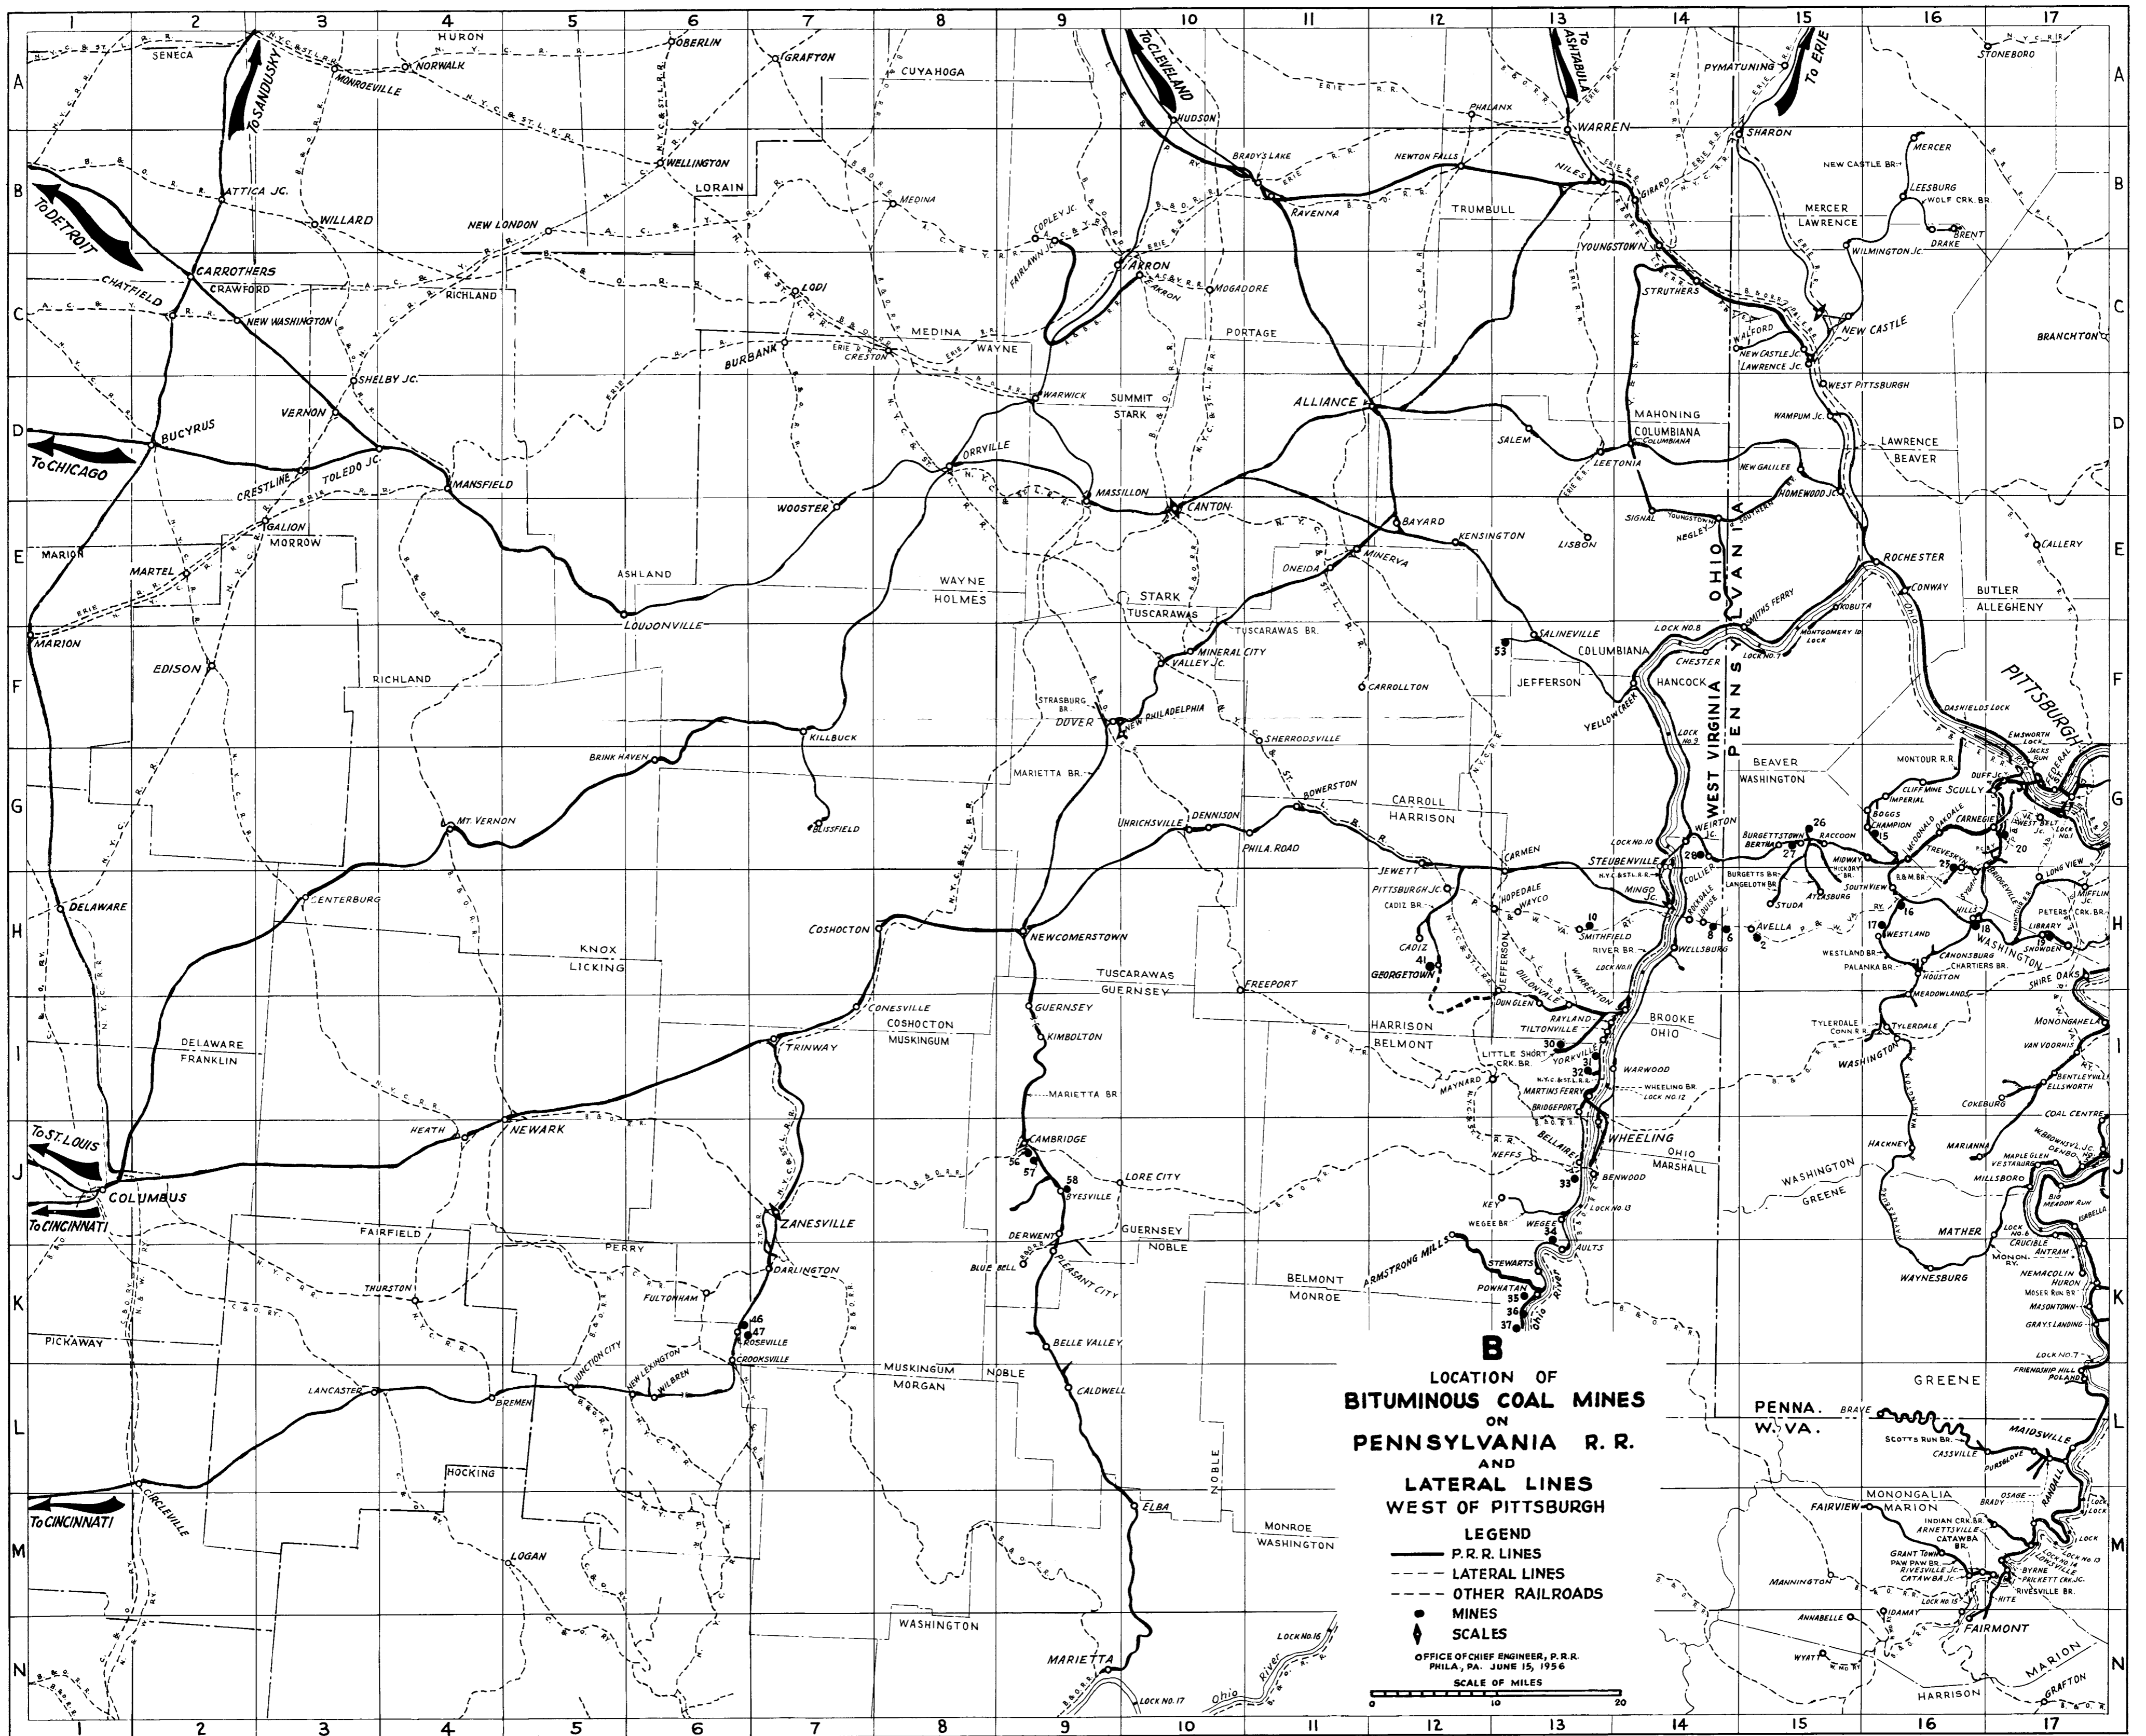

This Dock is located adjacent to the new Conway Yard. The facilities include one Dravo Whirler and one Heyl & Patterson Straight Line Machine with a combined capacity of 8,500 tons per day (24 hours).

Track Scales are located immediately adjacent to the dock.

MAIL ADDRESS:

CLEVELAND DOCK, CLEVELAND, OHIO

Lake Erie Coal Dumping Facilities

This dock is equipped with a Wellman-Seaver-Morgan type car dumper with gates on the telescope, sprinkling system, and retarder on the pan to assure careful and efficient handling of the coal. It has a dumping capacity of 40,000 tons per day (24 hours).

All boats have easy access to the slip which is 855 feet

in length, and is protected by a government break wall. The depth of water, 25 feet, is sufficient to accommodate the largest boats operating on the Lakes.

Available track space back of the machine has a capacity of approximately 475 cars, with supporting yard for 5,000 cars.

Dimensions and gross weight of cars which can be handled over this dumper are:

<i>Maximum Length Over Couplers</i>	<i>Maximum Height</i>	<i>Minimum Height</i>	<i>Maximum Width</i>	<i>Minimum Gross Weight</i>

ASHTABULA DOCK, ASHTABULA HARBOR, OHIO

Lake Erie Coal Dumping Facilities

The facilities at this dock consist of a McMyler car dumper which is equipped with a sprinkling system, and gates on the telescope to assure careful handling of the coal, with an average dumping capacity of 48,000 tons per day (24 hours).

A depth of 25 feet of water at the dock is sufficient to

take care of any loading desired. It is located on the Ashtabula River about one-eighth mile from the lake protected by a government breakwall.

Yard space adjacent to the machine has a capacity of about 1,200 cars, and the supporting yards will handle the same number.

Dimensions and gross weight of cars which can be handled over this dumper are:

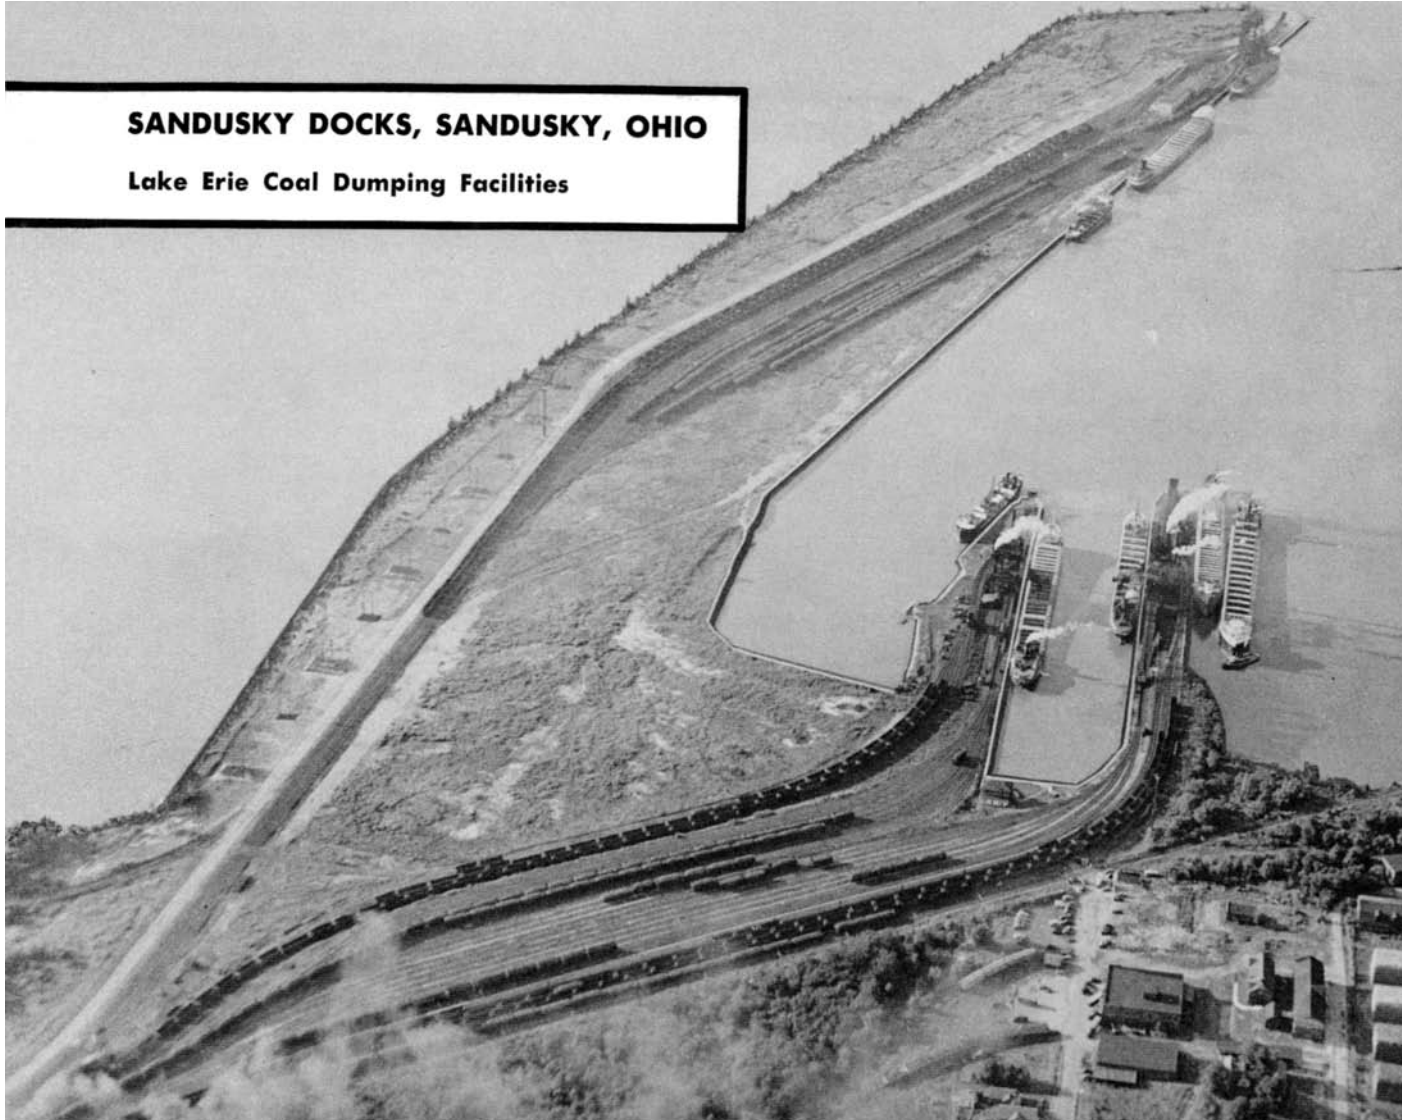

<i>Maximum Length Over Couplers</i>	<i>Maximum Height</i>	<i>Minimum Height</i>	<i>Maximum Width</i>	<i>Maximum Gross Weight</i>
52'6"	13'0"	6'6"	10'4"	240,000 lbs.

SANDUSKY DOCKS, SANDUSKY, OHIO

Lake Erie Coal Dumping Facilities

The Sandusky docks comprise the largest transshipping facility of the Pennsylvania Railroad on the Great Lakes. The equipment consists of three lift-and-turnover type unloaders, two of them modern steam operated machines, one a Heyl & Patterson and the other a Wellman-Seaver-Morgan; the third unloader is an electrically operated Heyl & Patterson machine into which have been incorporated all the latest developments in car dumper design, making it one of the most modern and efficient of its kind in the world.

Telescope gates and retarders are provided to assure careful dumping as well as automatic sprinkling and facilities for de-dusting coal.

The two steam operated machines have a combined dumping capacity of 100,000 tons per day (24 hours), and the new electric machine a capacity of an additional 86,000 tons per day (24 hours).

The steam machines are located on opposite sides of a slip approximately 1,000 feet long, 200 feet wide, and 22 feet deep. The electric machine is located on a dock 4,500 feet long served by a channel 400 feet wide and 22 feet deep. It is possible for vessels to enter and leave this dock channel without being turned.

The total yard capacity for the three machines is 10,215 cars.

Dimensions and gross weights of cars that can be handled over the car dumpers here are:

Dumper	Maximum Length Over Couplers	Maximum Height	Minimum Height	Maximum Width	Maximum Gross Weight
No. 1	64'0"	13'0"	6'6"	11'0"	330,000 lbs.
No. 2	53'0"	13'0"	6'6"	11'0"	280,000 lbs.
No. 3	64'0"	13'0"	6'6"	11'0"	333,000 lbs.
