Out of accumulated capital have arisen all the successes of industry and applied science, all the comforts and ameliorations of the common lot. Upon it the world must depend for the process of reconstruction in which all have to share.

—JAMES J. HILL

THE successful farmer raises bigger crops and cuts down costs by investment in labor-saving machinery.

Good prices for the farmers' crops encourage new investment, more production and greater prosperity.

But the success of agriculture depends on the growth of railroads—the modern beasts of burden that haul the crops to the world's markets.

The railroads—like the farms—increase their output and cut down unit costs by the constant investment of new capital.

With fair prices for the work they do, the railroads are able to attract new capital for expanding their facilities.

Rates high enough to yield a fair return will insure railroad growth, and prevent costly traffic congestion which invariably results in poorer service at higher cost.

National wealth can increase only as our railroads grow.

Poor railroad service is dear at any price. No growing country can long pay the price of inadequate transportation facilities.

All information contained in this folder is subject to change without notice. In time tables where stations are in middle column and time on both sides, read the figures down on the left and up on the right. These tables show the time trains should arrive at and depart from the several stations, and connect with other trains, but their departure, arrival or connection at the time stated is not guaranteed. The time of connecting lines is published for the information of passengers, and every care is taken to keep it correct, but this company does not hold itself responsible for any errors or omissions therein. Where no time is shown trains do not stop. Note all reference marks very carefully. Time from 12.01 midnight to 12.00 noon is shown by LIGHT faced figures, and time from 12.01 noon to 12.00 midnight by DARK faced figures.
