Main Street Station  
or Subway Terminal  
Los Angeles

THE Pacific Electric Railway system represents an investment of approximately \$110,000,000 and dates its growth in line with the development of Southern California since 1895, its total track miles at that date being ten and a quarter, whereas today, over 1106 miles of track are in use, extending from Los Angeles for a radius of approximately 75 miles, and over which in excess of 6,000 trains per day are operated. Freight and express service is also operated, serving fully practically every community of this section.

Located upon its lines are approximately fifty thriving cities and towns. It may be truly said that one may place his finger upon the map of Southern California almost any place and a line of the Pacific Electric Railway is not far distant; almost any time, and a train of that company will be along in a few minutes.

Stretching from the ocean shore of the west coast to the mountain tops of the San Gabriel and San Bernardino ranges, one may travel in comfort and at small cost to points of interest satisfying every taste and desire of the resident or visitor.

At the Main Street Station and Subway Terminal, Los Angeles, information relative to Southern California may be obtained, as well as folders, time-tables, etc., and the traveling public is urged to use these Information Bureaus freely. Literature, time-tables, etc., may be secured at the various branches of the Foster Bureaus, Los Angeles Chamber of Commerce, Railway Express Agency, and at other information bureaus throughout the country, or will be provided upon request by addressing H. O. MARLER, Passenger Traffic Manager, Pacific Electric Railway, Los Angeles.
