RULES AND REGULATIONS

TRAINS ENTERING TERMINAL YARDS.

1. The Yard Master or his assistants will have full control of, and direct, traffic within the Terminal Station. Trains must, before entering Yard, receive proper signal to do so and decrease speed to, and not exceed, five miles per hour between Fifteenth Street and Nineteenth Street. Where Switch Tenders are stationed they must throw switch before giving signals to move.

DUTIES OF CONDUCTORS, BRAKEMEN AND PORTERS.

2. Conductors will have their brakemen and porters see that the closet doors are closed and locked while trains are standing on the property of this Terminal Company. Trainmen and Pullman employes will not permit passengers to enter cars without first ascertaining that they have proper transportation reading to points where train is scheduled to stop.

DUTIES OF ENGINEMEN.

3. Engineers must close the dampers while running through the depot grounds, and use all precautions possible to prevent the escape of fire. The bell must be rung whenever an engine is in motion on these Terminal tracks and before starting trains. Enginemen will be required to so regulate their fires as to prevent their engines from blowing off steam and causing unnecessary smoke while standing on tracks in Terminal yard.
