MORRIS AND ESSEX LINE
PHASE I
CONSTRUCTION SCHEDULE

On April 6, 1991, NJ TRANSIT will begin a major Track Improvement Project on the Morris and Essex Lines. The first phase will be conducted on the Gladstone Branch where new wooden crossties, bridge timbers, overhead catenary wire and continuous welded rail will be installed.

This phase will be conducted during weekday off-peak hours and on weekends only. Due to the single track operation on the Gladstone Branch, we will be providing substitute busing from certain stations depending upon the location of the work segments. The April 1991 Phase I timetable will reflect an additional 10 minutes of travel time needed to allow for these bus/train connections.

The second phase of the Morris and Essex Line work will begin on June 24, 1991 and will include installation of new crossties and continuous welded rail on the Morristown Line west of Summit. Prior to that time, we will be issuing a new public timetable outlining the constuction impacts on service.

Once the project is completed, riders will experience a smoother ride and an improvement in service by averting potential maintenance-related delays and speed restrictions resulting from older, worn rail. We regret any inconvenience you may experience as a result of this track work.
