

FORM 5

**KENTUCKY & INDIANA  
TERMINAL  
RAILROAD COMPANY**

---

**LIST OF INDUSTRIES  
SERVED**

•

**TELEPHONE DIRECTORY**

•

**ROUTING**

---

**May, 1979**

BEECHMONT PRESS

**INSTRUCTIONS FOR COMPLETING CONDUCTOR'S REPORT FORM 15 FOR PURPOSE OF PROPER PER DIEM, DEMURRAGE, SWITCHING, SWITCH COUNT, AND BLOCK COUNT CHARGES.**

Write clearly and legibly, using pencil or ball point pen.

Be sure of time and date. On 2nd trick job working beyond midnight or any 3rd trick job show dates went on duty and relieved, as Nov. 26/27, 1979. Begin a new Form 15 at midnight and show both dates on each form.

Be sure information given is accurate, not approximate.

Give exact description of movement. When two foremen handle the same cars, each must show the movement as made by his crew. Do not show cars to Airco Alloys if they are moved just to "L" Yard. Foreman handling cars into plant will show the final movement. Duplications caused by two foremen showing car into plant must be avoided.

Give complete information. Leave no column blank.

Be sure that initials are correct and not abbreviated. Show ATSF or SLSF, not just SF.

Use the industry numbers just as they are given in the book. **DO NOT GUESS.**

Be sure that figures in the car number are not transposed.

Show all movements in and out of shop and show the time and date in each instance.

Show all special runs on Form 15 even though they are shown on the time slips.

When car is moved from one track to another or from one spot to another on the same track in an industry, show whether or not it is done by order of the industry. Indicate all moves that are inter or intra-plant, cross-town, stop-off pulled without bills, etc. On intra-plant move complete Form F-387 in addition to putting it on Form 15.

Do not pull from industries or team tracks cars that require bills without having the bills or positive instructions that bills are on file at a K.&I.T. Office.

There are several industries that have two or more locations with different industrial numbers, these must be given special attention to insure accurate reporting.

R. L. Adkins  
Superintendent  
K.&I.T. R.R.

## INDEX

\* "Closed Siding" Explanation

A number of Southern industries in District 9 and in the Appliance Park — Buechel area are not open to reciprocal switching. They are designated by Southern as "Closed Siding" industries. Any inbound or outbound load to or from these plants must move to permit Southern line-haul earnings. Do not accept cars from connections on switching tickets. Waybills must accompany all inbound loads. All outbound loads must move via Southern Railway.

† "Restricted Switching" Explanation

Industries so designated in District 8 (Hub) are not subject to reciprocal switching in connection with L&N.

## ALPHABETICAL LIST

List of industries that are switched by the Kentucky & Indiana Terminal Railroad Company.

| Industry                                                                                                                | Located<br>On | Industry<br>No. | District |
