SPECIAL INSTRUCTIONS

Rules referred to by numbers are the Rules for the Government of the Operating Department, unless otherwise specified.

N 2. THIRD RAIL.

Cars that do not clear third rail tell tales must not be run where there is a third rail.

When emergency requires that power be shut off third rail, telephone nearest substation, stating what tracks are affected and immediately notify train dispatcher. If pipes carrying transmission cables are involved, the load dispatcher must be notified promptly.

Power will not be restored until load dispatcher has been notified by responsible person that it is safe to do so. Load dispatcher must secure permission from train dispatcher to restore power if trouble was due to train accident.

If engineman desires power shut off, he will stop and sound whistle signals prescribed by Special Instruction 14, and repeat same until power is shut off. Conductor of such train will immediately communicate with nearest substation, load dispatcher or train dispatcher, requesting power to be shut off tracks affected and asking for other necessary relief. All employees hearing these whistle signals must also make immediate request by telephone to have power shut off tracks affected. Maintainers, trackmen and other employees must go to point of trouble promptly and render any assistance possible.

To shut power off in Park Ave. tunnel, give cord, suspended from wall on adjacent track, a steady pull first from the west and then from the east, which will shut power off track affected between 56th St. and 110th St. As a further precaution, go to nearest alarm box and send in a second alarm from the box. These boxes are located approximately three blocks apart. When cord is pulled, or when trains are stopped in tunnel because of loss of power, report must be made at once to train dispatcher from nearest telephone. Train employees and others who do work in the tunnel must familiarize themselves with location of cords and boxes to which they are attached. These cords and appliances belonging to this system must not be tampered with.

When emergency requires that power be shut off third rail on any track between 110th St. and Mott Haven Jct., third rail switch at Signal Station NK, or at cabin at east end of Park Ave. Drawbridge will be closed and held closed 3 seconds. The closing of one of these switches shuts power off all tracks between 110th St. and Mott Haven Jct. Employees shutting power off must at once notify Load Dispatcher that third rail switch has been closed, and the same employee must also notify Load Dispatcher promptly when it is proper to have power restored.

When communicating by telephone to have power shut off, use words "power emergency," and when by telegraph, use numeral "21" to obtain circuit. All others using line must give way at once.

When two or more electric trains have been stopped on the same track short distances apart, a period of 30 seconds must elapse between the starting of each train.

Where possible, authority should first be obtained from the Superintendent; if this is impracticable full information must be telegraphed the Superintendent as soon as possible.

When making movements against current of traffic, passenger trains and trains following passenger trains must be held until track is clear to next signal station, or point where flagman is stationed.

In making such movements, two flagmen must be used to hold trains running with the current of traffic, one at the crossover where diverted trains return to their proper track, and one a sufficient distance beyond to stop and notify trains before they reach such crossover. The conductor in charge must make his instructions to his flagmen clear and explicit, in writing if practicable, and flagmen must repeat the instructions so as to avoid misunderstanding. Trains must not move over a track so used without personal instructions from the conductor in charge. Where possible, the Superintendent will notify conductors and enginemen of all trains involved of the conditions, and instruct them to report at a designated point to the conductor in charge. If authority has been received from the Superintendent for such movement, normal operation must not be resumed without his permission; and under any conditions whenever the obstructed track is again in use the conductor in charge must provide for notice to conductors and enginemen who have been instructed to report to him and who have not arrived with their trains at the designated point.
