SPECIAL INSTRUCTIONS

Rules referred to by numbers are the Rules for the Government of the Operating Department, unless otherwise specified.

N. CONTAINERS.

Trainmen, in the performance of their duties, are not required to pass over the tops of containers.

N2. THIRD RAIL.

When emergency requires that power be shut off third rail, telephone nearest substation, stating what tracks are affected and immediately notify chief train dispatcher. If pipes carrying transmission cables are involved, the power supervisor must be notified promptly.

Power will not be restored until power supervisor has been notified by responsible person that it is safe to do so. Power supervisor must secure permission from chief train dispatcher to restore power.

If engineman requires power shut off, he will stop and sound whistle signals prescribed by Special Instruction 14, and repeat same until power is shut off. Conductor of such train will immediately communicate with nearest substation, power supervisor or chief train dispatcher, requesting power be shut off tracks affected and asking for other necessary relief. All employes hearing these whistle signals must also make immediate request by telephone to have power shut off tracks affected. Maintainers, trackmen and other employes must go to point of trouble promptly and render any assistance possible.

To shut power off between 59th St. and 96th St. Park Ave. tunnel, give cord, suspended from wall adjacent to track involved, a steady pull first from the west and then from the east, which will shut power off track affected between 59th St. and 110th St. As a further precaution, go to nearest alarm box and send in a second alarm from the box. These boxes are located approximately three blocks apart. When cord is pulled, or when trains are stopped in tunnel because of loss of power telephone report must be made at once to chief train dispatcher. Train employes and others who work in the tunnel must familiarize themselves with location of cords and boxes. Cords and appliances belonging to this system must not be tampered with.

When emergency requires that power be shut off between 110th St. and 151st St., Park Ave., third rail switch at NK or DB will be closed and held closed 3 seconds. The closing of one of these switches shuts power off tracks No. 4, No. 2, No. 1 and No. 3 between 110th St. and 151st St. Employes shutting power off must at once notify power supervisor that third rail switch has been closed, and the same employe must also notify power supervisor promptly when it is proper to have power restored.

When communicating by telephone to have power shut off, use words "power emergency," and when by telegraph, use numeral "21" to obtain circuit. All others using line must give way at once.

When two or more electric trains have been stopped on same track short distances apart, a period of 30 seconds must elapse between starting of each train.

Cars that do not clear third rail telltales or indicator blocks must not be run where there is a third rail.

O. OBSERVANCE OF PASSING TRAINS.

When trains are passing, trainmen of freight trains must observe the general condition of trains on other tracks for entire length of each train.

When a freight train is standing, trainmen of that train must place themselves in best position on ground to observe running gear of passing passenger trains, and, when other duties do not interfere, the same observation must be made of passing freight trains.

When approaching track pans or immediately after passing them, and frequently at other points, rear trainmen must observe each side of their train.

When trains are passing, signalman or operator, whenever practicable, must observe from signal station or station platform, the condition of the train for its entire length; trackmen, bridgemen, signal maintainers, pumpers and other employes must make similar observations.

If any indication of conditions endangering a train is observed, "Stop" signal must be given. If there are no apparent defects, employes, except crossing watchmen, must give "Proceed" signal.

All signals must be acknowledged.

Passenger trainmen will comply with the above as far as practicable.

When trouble is experienced with journals on trains, arrangements should be made to stop train immediately and have an examination made to determine whether or not the journal is in proper condition to continue to move the car to a convenient point for cutting out, or whether the car should be given immediate attention.

Between G. C. T. and White Plains No. Sta.
MO and Croton-on-Hudson.
St. Clair Place and DV.
Sedgwick Ave. and Getty Square.

If train is not in condition to make usual running time, conductor or engineman must notify signalman.

Trains will run against the current of traffic as shown below by block signals whose indications will supersede time table superiority and take the place of train orders. When signal cannot be cleared, this movement will be made only by train order.

Between	Tracks
FH and DV	No. 2, No. 1.
CR and HM	No. 4, No. 2, No. 1, No. 3.
HM and CD	No. 2.

Between 60th St. and 140th St., Park Ave.,

Trains will not change direction of movement between signal stations without flag protection, except by permission from train dispatcher.

253. TRAINS HAVING WORK IN BLOCK.

Trains must do no work on main track ahead of trains about due or overdue without permission from Superintendent. Rule D-253 is modified accordingly.

751. TIME SIGNAL STATIONS ARE OPEN.

Signal stations are open as specified in list of Stations, Office Calls, Signals and Telephones.

801. INTERLOCKING SIGNALS.

Interlocking signals may also be used as block signals and, where so used, will be indicated by the letters INT-M.B. in list of Stations, Office Calls, Signals and Telephones in time table.

Where a passenger train is to be diverted from a main track over crossover or switch at following locations or to a siding, the signalman must hold signal in stop position until train has stopped:

Signal Station	Track
BG	No. 1 to No. 3, No. 3 to No. 1.
BN	No. 1 to No. 3, No. 2 to No. 4.
DV	No. 5 to No. 6. No. 5 to No. 1, No. 3 or east wye. No. 1 to No. 2. No. 2 or No. 4 to No. 5 or No. 6. No. 6 to No. 5.
GD	No. 1 to No. 3, No. 3 to No. 1. No. 2 to No. 4, No. 4 to No. 2.
CR	No. 1 to No. 3.
HM	No. 1 to No. 3, No. 3 to No. 1. No. 2 to No. 4.
CD	No. 1 to No. 3.

When stopping at signal station for relief engine, engineman will leave room for relief engine to couple on without blocking track circuit.

Sand must not be used over movable parts of an interlocking or within interlocking limits. Rule 813 is modified accordingly, except at MO and HM rule 813 applies.

At interlockings where certain tracks are seldom run on, or are used for storage and rails are rusted, or cars have been standing and wheels are rusted, which may prevent shunting of track circuit, trainmen and signalmen must confer regarding movements to be made to insure interlocked switches will not be operated when cars are being moved over them.

1403. EMERGENCY OPERATION.

If necessary to operate a multiple unit train from other than head car, conductor and engineman will confer, and be held jointly responsible for safe movement of train, at speed permitting full control.

In event of irregularity or accident occurring to a train which endangers safety of passengers or train, notice must be given promptly to the engineman who will proceed, if safe to do so, to nearest station or first opening to street, if necessary to discharge passengers. Exits to street in Park Ave. tunnel are located at 59th, 72nd and 86th Sts.; on the viaduct at 110th St.

Proper operation of MU equipment, Diesel locomotives, or electric locomotives is with engineman located on end in direction of movement when conditions permit.

When necessary to make back-up movement with MU train, with engineman operating from end opposite to direction of movement, conductor will be located on leading platform of train with member of train crew at conductors valve in that car.

When necessary to make back-up movement with Diesel or electric locomotives, with engineman operating from end opposite to direction of movement, fireman must be located to observe conditions ahead and pass hand signals to engineman.

1405. SPECIAL USE OF TRACKS.

Harmon:

Regular movement for traffic over loop track is from engine house to HM. Movements in opposite direction must not be made except under flag protection.

White Plains:

JU-1 use Track No. 5 in both directions between NW and White Plains Station, 6.00 a.m. to 8.00 a.m. daily except Sunday and Monday.

White Plains Switcher use Track No. 5 in both directions between NW and White Plains Station, 6.00 a.m. to 8.00 a.m. Monday only.

Eastward trains use Track No. 5 between NW and substation No. 9, White Plains, 6.00 p.m. to 11.59 p.m.

The use of Track No. 5 between Substation No. 9 and NW at other times is for westward movements.

1406. TELEPHONES.

Conductor or engineman must use telephone whenever necessary to facilitate the movement of trains. Instructions received by telephone must be repeated, and name and occupation of the employes exchanged to avoid misunderstanding.

Substation telephone circuits are exclusively for the use of employes in controlling current to third rail and signal lines, and in train emergency.

1407. ELECTRIC EQUIPMENT.

Electrically propelled trains must not be operated through water when it is above the top of the running rail.

Three or more electric locomotives or electric locomotives and steam engines coupled must not be moved on main tracks except, west of PF, 4 electric locomotives, or electric locomotives, Class H heaters and steam engines coupled, may be operated. If more than 2 electric locomotives are coupled, power must be used on 2 only.

When third rail shoes are broken off, shoe fuses over broken shoes must be removed.

When overhead shoes are broken off, train or locomotive must come to a stop immediately and broken parts must be removed from track and train.

If emergency button of master controller on MU car is inoperative and car cannot be cut out, an employe must be assigned to ride with engineman.

West of 56th St., Park Ave.:

The cut-out cock in air pipe leading to overhead shoe on electric locomotives must be closed when not in use.
